# CHARTER

AND

## BYE LAWS

OF THE

### CAMBRIDGE PHILOSOPHICAL SOCIETY.

THE CAMBRIDGE PHILOSOPHICAL SOCIETY was established November the 15th, 1819, for the purpose of promoting scientific enquiries, and of facilitating the communication of facts connected with the advancement of Philosophy and Natural History; and became a body corporate by virtue of a CHARTER granted by His Majesty King WILLIAM the Fourth. This Charter, bearing date the 3d day of August, 1832, was formally accepted by the Society at a general Meeting held after due notice for that express purpose, Nov. 6th, 1832.

### WILLIAM THE FOURTH,

By the grace of God, of the United Kingdom of Great Britain and Ireland, King, Defender of the Faith; TO all to whom these Presents shall come greeting:

Whereas ADAM SEDGWICK, Clerk, Master of Arts, Fellow of Trinity College and Woodwardian Professor in the University of Cambridge, has by his petition humbly represented

b.

unto us, That he together with others of Our loyal subjects, Graduates of the said University, did in the year One thousand Eight hundred and nineteen form themselves into a Society for the promotion of Philosophy and Natural History, and have subscribed and collected considerable sums of Money for such purposes, and have also collected and become possessed of a valuable Library and various Collections in Natural History, and other property to a considerable amount, and have also been and continue to be actively employed in the promotion of Philosophical and Natural Knowledge among the Graduates of the said University, by offering encouragements for Original Research, and especially by the publication of Volumes of Transactions composed of Original Memoirs read before the Society; ~~And Whereas~~ the said Petitioner believing that the well being and usefulness of the said Society would be most materially promoted by obtaining a Charter of Incorporation, hath therefore, on behalf of himself and other Fellows of the said Society, most humbly prayed that We would be pleased to grant a Royal Charter for incorporating into a Society the several persons who have already become Fellows, or who may at any time hereafter become Fellows thereof; subject to such Regulations and Restrictions as to Us may seem good and expedient: ~~Know~~ ~~That~~ We being desirous of encouraging a design so laudable, have of Our especial grace, certain knowledge and mere motion, willed, granted and ordained, and ~~do~~ by these Presents, for Us Our Heirs and Successors, will grant and ordain, That the said Adam Sedgwick, Clerk, and such others of Our loving subjects as have formed themselves into and are now Fellows of the said Society, or who shall at any time hereafter become Fellows thereof according to such Bye Laws as shall hereafter be framed or enacted, shall by virtue of these Presents be one Body Politic and Corporate by the Name and Style of the CAMBRIDGE PHILOSOPHICAL SOCIETY, by which name and style they shall have perpetual Succession, and a Common Seal, with full power to alter, vary, break and renew the same at their discretion; and by the same name and style to sue and be sued, to implead and be impleaded, to answer and be answered unto, in every Court of Us Our Heirs and Successors, and be for ever capable in the law to purchase, receive, hold, possess and enjoy to them and their successors any goods and chattels whatsoever; and also be able and capable in the law (notwithstanding the statutes of Mortmain) to take, purchase, possess, hold and enjoy to them and their successors a Hall or College, and any messuages, lands, tenements or hereditaments whatsoever, the

yearly value of which (including the said Hall or College) shall not exceed in the whole the Sum of Two Thousand Pounds, computing the same respectively at the rack rent which might have been had or gotten for the same respectively at the time of the purchase or acquisition thereof: and to act and do in all things relating to the said Body Politic and Corporate as fully and effectually, to all intents, effects, constructions and purposes whatsoever as any other of Our liege subjects, or any other body politic or corporate in Our United Kingdom of Great Britain and Ireland (not being under any disability) might or could act or do in their respective concerns; **And** We do hereby grant Our especial Licence and Authority unto all and every person and persons, bodies politic and corporate (otherwise competent), to grant, sell, alien and convey in Mortmain unto and to the use of the said Society and their successors any messuages, lands, tenements or hereditaments, not exceeding such annual value as aforesaid.

**And** Our Will and Pleasure is, and We further grant and declare, That there shall be a General Meeting of the Fellows of the said Body Politic and Corporate to be held from time to time as hereinafter mentioned, and that there shall always be a Council to direct and manage the concerns of the said Body Politic and Corporate.

**And** Our Will and Pleasure is, that Our most dearly beloved Cousin **WILLIAM FREDERICK** Duke of Gloucester, Chancellor of the said University, shall be the Patron; and Our most dearly beloved Brother **AUGUSTUS FREDERICK** Duke of Sussex, Our right trusty and right well beloved Cousin and Councillor **PHILIP** Earl of Hardwicke the High Steward of the said University, and the **VICE-CHANCELLOR** of the said University, shall be the Vice-Patrons of the said Body Politic and Corporate:

**And** We do hereby will, grant and declare, That the Council shall consist of a President, three Vice-Presidents, one Treasurer, not more than three Secretaries, and not more than twelve or less than seven other Fellows, to be elected out of the Fellows of the said Body Politic and Corporate; and that the first Members of the Council shall be elected within six Calendar Months after the date of this Our Charter, and that the said **ADAM SEDGWICK** shall be the first President of the said Body Politic and Corporate, and shall continue such until the Election as aforesaid.

**And** We do hereby further will, grant and declare, That it shall be lawful for the Fellows of the said Body Politic and Corporate hereby established to hold General Meetings once in the year or oftener for the purposes hereinafter mentioned; viz. That the General Meetings shall choose a President, Vice-Presidents, Treasurer, Secretaries and other Members of the Council: That the General Meetings shall make and establish such Bye Laws as they shall deem to be useful and necessary for the regulation of the said Body Politic and Corporate, for fixing the days on which the Ordinary Meetings of the Society shall be held, for determining the mode in which Fellows and Honorary Members shall be elected, admitted or expelled, for the management of the estates, goods and affairs of the said Body Politic and Corporate, and for fixing and determining the manner of electing the President, Vice-Presidents, Treasurer, Secretaries and other Members of the Council, and the period of their continuance in office; **And** We do further declare, that it shall be lawful at the General Meetings of the said Body Politic and Corporate to alter or revoke former Bye Laws and to make such new Bye Laws as they shall think useful and expedient: But it is Our Will and Pleasure, that no Fellow who has filled the office of President for two successive years shall be again eligible to the same situation until the expiration of one year from the termination of his office.

**And** Our Will and Pleasure is, That no such General Meetings as aforesaid shall, without the consent of the Council of the said Society or Body Politic, have the power of altering or repealing any existing Bye Law, or of making any new one, unless the Fellow or Fellows of the said Society or Body Politic who shall be desirous of so altering or repealing any such existing Bye Law, or of making any new one, shall have given to the Council of the said Society or Body Politic one month's previous notice of such his or their intention.

**And** We further will, grant and declare, That the Council shall (but not inconsistently with or contrary to the provisions of this Our Charter, or by any existing Bye Law or the Laws and Statutes of this Our Realm, or the Statutes of the University of Cambridge,) have the sole management of the Income and Funds of the said Body Politic and Corporate, and also the entire management and superintendence of all the other affairs and concerns thereof, and shall or may do all such acts and deeds as shall appear to them necessary or essential to be done for the purpose of carrying into effect the objects and views of the said Body Politic and Corporate.

And We further will, grant and declare, That the whole Property of the said Body Politic and Corporate shall be vested, and We do hereby vest the same, solely and absolutely in the Fellows thereof, and that they shall have full power and authority to sell, alienate, charge or otherwise dispose of the same as they shall think proper; but that no Sale, Mortgage, Incumbrance or other disposition of any messuages, lands, tenements or hereditaments belonging to the said Body Politic or Corporate shall be made except with the approbation and concurrence of a General Meeting.

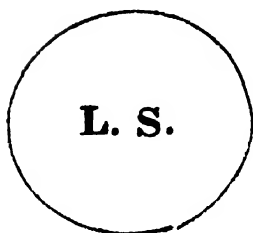

And We lastly declare it to be Our Royal Will and Pleasure, That no Resolution or Bye Law shall on any account or pretence whatsoever be made by the said Body Politic and Corporate in opposition to the general scope, true intent and meaning of this our Charter, or the Laws and Statutes of this Realm, or the Statutes of the University of Cambridge; and that if any such Resolution or Bye Law shall be made, the same shall be absolutely null and void to all intents, effects, constructions and purposes whatsoever.

~~IN WITNESS~~ whereof We have caused these Our Letters to be made Patent.

Witness Ourselves at Our Palace at Westminster  
this Sixth day of August, in the Third year  
of Our Reign.

By Writ of Privy Seal,

**Brougham.**

# ABSTRACT OF THE LAWS

## PRESCRIBED BY THE CHARTER.

IT is expressly provided by the Charter—

1. THAT the Society consist of such Graduates of the University as are now Fellows thereof, or shall at any time hereafter become Fellows thereof, agreeably to the Bye Laws of the Society.

2. That His Royal Highness WILLIAM FREDERICK, Duke of Gloucester, Chancellor of the University, be Patron of the Society.

3. That His Royal Highness AUGUSTUS FREDERICK, Duke of Sussex, The Right Hon. PHILIP, Earl of Hardwicke, High Steward of the University, and the Vice-Chancellor of the said University, be Vice-Patrons.

4. That there always be a Council to manage the concerns of the Body Corporate, and that the said Council consist of a President, three Vice-Presidents, one Treasurer, not more than three Secretaries, and not more than twelve nor less than seven other Fellows, to be elected out of the Fellows of the said Body Corporate.

5. That General Meetings of the Body Corporate be held once in the year, or oftener; for the purpose of electing the Officers and Council of the Society, and determining the period of their continuance in office—of enacting such Bye Laws as seem useful and necessary for the regulation of the said Body Corporate—of fixing the days on which the ordinary Meetings of the Society shall be held—of determining the mode in which Fellows and Honorary Members shall be elected, admitted, or expelled—and of managing the affairs of the said Body Corporate.

6. That the Fellow who has filled the office of President for two successive years shall not be again eligible to the same situation until the expiration of one year from the termination of his office.

7. That it be lawful at the General Meetings of the Body Corporate to alter or revoke former Bye Laws, and to make such new Bye Laws as they shall think good and expedient.

8. That no such General Meeting shall (without the consent of the Council) have the power of altering or repealing any Bye Laws or making any new one, unless the

Fellow or Fellows of the Society desirous of altering or repealing any Bye Law or of making any new one shall have given to the Council one month's previous notice of such his or their intention.

9. That no Bye Law shall on any pretence whatsoever be made in opposition to the true intent of the Charter, the Laws of the Realm, or the Statutes of the University of Cambridge.

10. That the Council (in conformity with the Charter and Bye Laws of the Society) have the sole management of the Funds and affairs of the Society, and do all such acts as shall appear to them necessary to carry into effect the objects and views of the Body Corporate.

11. That the whole property of the Body Corporate be vested in the Fellows thereof: but that no disposition of any lands, tenements, or hereditaments belonging to the said Body Corporate be made except with the approbation and concurrence of a General Meeting.

## BYE LAWS

OF THE

### CAMBRIDGE PHILOSOPHICAL SOCIETY.

#### I. OF THE ELECTION OF THE MEMBERS OF THE COUNCIL.

1. THE President, Vice-Presidents, Treasurer, Secretaries, and three ordinary Members of the Council, shall be annually elected by ballot from among the Fellows of the Society.

2. The same Fellow shall not be eligible to fill the office of Vice-President, for more than two years successively.

3. The three senior ordinary Members of the Council shall retire annually.

4. No Fellow under the degree of M.A., M.B., or LL.B., shall be a Member of the Council.

#### II. OF THE ELECTION, ADMISSION, AND EXPULSION OF FELLOWS.

1. ANY Graduate of the University of Cambridge desirous of becoming a Fellow of the Society, shall be proposed and recommended by a certificate in writing, signed

by three or more Fellows. The certificate shall specify the Christian and surname of the Candidate, his Degree, the name of his College and his usual place of residence; all of which must be certified from the personal knowledge of at least one of the subscribing Fellows.

The following shall be the Form of the Certificate.

<i>Name.</i>	<i>Degree.</i>	<i>College and place of residence.</i>
--------------	----------------	--

.....  
 being desirous of becoming a Fellow of the Cambridge Philosophical Society, we, whose Names are underwritten, do recommend him as a proper person to be a Fellow of the said Society.

(Signed) \_\_\_\_\_ from personal knowledge.

This Certificate shall be read by one of the Secretaries at the Meeting at which the Candidate is proposed, and remain suspended in the Meeting Room of the Society till he be ballotted for.

2. The Ballot shall take place on the second Meeting (Ordinary or Extraordinary) after that at which the Candidate is proposed: but all Heads of Houses, Doctors, and Professors, and all persons who have been admitted to Honorary Degrees, shall be ballotted for at the Meeting at which they are proposed.

3. No person shall be declared elected, unless he have in his favour at least two thirds of the Members voting, and if it appear upon the ballot, that the person proposed is not elected, no notice thereof shall be taken in the minutes.

4. The Vice-Chancellor for the time being, when regularly proposed, shall be admitted a Fellow without a ballot.

5. No person shall be admitted a Fellow, or be entitled to any of the privileges of the Society, till he has paid his admission fee and his subscription for the current year, or the sum specified in lieu of his admission fee and annual contributions.

6. Every Fellow elect after having complied with the preceding regulations shall (at the first ordinary or extraordinary Meeting after) be declared admitted by the President in the following terms:

I ..... in the name and by the authority  
 of the Cambridge Philosophical Society declare  
 ..... to be a Fellow thereof.

After this admission, the name of the Fellow shall be inscribed by one of the Secretaries in a Book prepared for that purpose.

7. If the annual subscription of any Fellow be twelve months in arrear, a notice of the same shall be suspended in the Reading-room, and the Secretary shall inform the Fellow thereof; and if the said subscription be still due at the expiration of the succeeding twelve months, the name of such Fellow shall be struck off the list of the Society.

8. Any person whose name has been removed from the list of the Society on account of the non-payment of his subscription, may, on payment of his arrears, be re-admitted by ballot without a fresh admission fee.

### III. OF HONORARY MEMBERS.

1. No Graduate or Member of the University of Cambridge shall be an Honorary Member.

2. Honorary Members shall be proposed, after a sanction of the Council, by at least six Fellows of the Society. The Certificate of recommendation shall specify the grounds on which each Honorary Member is proposed; and his mode of election shall be subject to the same regulations as that of the Fellows.

### IV. OF THE FUNDS OF THE SOCIETY.

1. THE annual subscription of each Fellow shall be one guinea, and shall be due on the first of January in every year.

2. Every Fellow, previous to admission, shall pay one guinea, and also the subscription for the current year.

3. Any Fellow, or Fellow elect, may compound for all annual subscriptions, on paying ten guineas.

### V. OF THE COUNCIL.

1. THE Council shall meet at the house of the Society, at least once in every fortnight during full term, and not less than five shall constitute a quorum. Due notice of each Meeting shall be sent to every Member of the Council.

2. All questions shall be determined in the Council by vote, unless a ballot be demanded. The determination of the Council, whether by vote or by ballot, shall, at the desire of any two or more members present, be deferred to the next

succeeding Meeting. If the number of votes be equal, the Chairman shall have the casting vote.

3. The Council shall draw up a Report on the state of the affairs of the Society, to be presented at the general annual Meeting. In this Report shall be inserted an abstract of the proceedings of the Society during the year.

4. Nothing shall be published by the Society, which has not been previously approved by the Council; and the Council shall be at liberty to call in the aid of any Fellow of the Society, well skilled in the particular branch of science, which may happen to be the subject of any paper under consideration.

#### VI. OF THE ORDINARY MEETINGS.

1. THE Meetings of the Society shall be held on Mondays, once in every fortnight, during full term.

2. The President shall take the Chair at Seven P.M. and shall quit it before Nine.

3. The business of each Meeting shall be conducted in the following order :

- (1) The Minutes of the preceding Meeting read and approved.
- (2) Notices of new Motions presented.

- (4) Members balloted for.
- (5) Presents acknowledged.
- (6) Miscellaneous business.
- (7) Communications read.

4. Each Member shall be at liberty to introduce a visitor on delivering his name to the President or Chairman at the time.

#### VII. OF THE ANNUAL GENERAL MEETING.

THE Annual General Meeting of the Society shall take place on the Sixth of November (the anniversary of the acceptance of the Charter), unless the sixth fall on a Sunday, in which case the Meeting shall take place on the following day. At this Meeting the Report from the Council shall be read on the state of the Society, the Accounts of the Treasurer shall be audited, and the Officers elected for the succeeding year.

#### VIII. OF SPECIAL GENERAL MEETINGS.

1. THE Council may at any time call a Special General Meeting of the Society.

2. At least three days' notice of such Meeting shall be given by one of the Secretaries to the resident Members of the Society.

3. The Council, on receiving a requisition to that effect, signed by not less than six Fellows of the Society, shall call a general Meeting, to take place within a week after the expiration of the month's previous notice prescribed by the Charter.

#### IX. OF THE DUTIES OF THE PRESIDENT AND VICE-PRESIDENTS.

1. THE duty of the President shall be, to take the Chair at the Meetings of the Society and Council; to regulate and keep order in all their proceedings; to state questions and propositions to the Meeting; to report the result of ballots; and to carry into effect the regulations of the Society.

2. In the absence of the President, the Chair shall be taken by one of the Members of the Council in the following order; viz. the Senior Vice-President, Treasurer, or Senior Ordinary Member of the Council.

#### X. OF THE DUTIES OF THE TREASURER.

THE Treasurer shall receive all sums of Money due to the Society, transact all its pecuniary affairs, and keep a regular account of receipts and payments, in the mode which may seem most proper to the Council.

#### XI. OF THE DUTIES OF THE SECRETARIES.

1. THE Secretaries shall have the management of the correspondence of the Society and Council.

2. They shall attend all Meetings of the Society and Council, take minutes of their proceedings, and enter them in books provided for that purpose; they shall transact the business of the Ordinary Meetings according to the mode specified in Section vi. Rule 3.

3. One of the Secretaries shall have the care of the Reading-Room; and his office shall be to procure and take care of the books, to see that the papers are filed, and the Room properly prepared for the reception of the Members: to collect the bills, sign them, and send them to the Treasurer for payment.

4. The Secretaries shall have the charge, under the direction of the Council, of printing the Memoirs of the Society, and of correcting the press.

**XII. OF THE SOCIETY'S PROPERTY.**

1. AN inventory of the Furniture and other articles in the Meeting Room of the Society, shall be made every year. Catalogues of the Library, Collections in Natural History, &c. shall also be made for the use of the Members of the Society.

2. The Common Seal, Charter, and Deeds of the Society shall be kept in an Iron Chest with two locks and two different keys, the one to be kept by the President, and the other by the Treasurer.

**XIII. OF DONATIONS.**

EVERY person who shall contribute to the Museum or Library of the Society, shall be recorded as a Benefactor, his name shall be read at the annual General Meeting, and shall be inserted in the next succeeding Volume of the Society's Memoirs.

**XIV. MISCELLANEOUS REGULATIONS.**

1. ALL communications, presents, &c. shall be sent to one of the Secretaries, if not personally presented by a Member at a Meeting of the Society.

2. The Author of any communication, if a Member, shall have the liberty of reading his own paper.

## OBSERVATIONS.

**STATUTABLE CONGREGATIONS.**—One upon the last day of each Term ; two on the 10th day of October ; one on the 3d, and one on the 4th of November ; two on the day after the second Tripos ; two on the 11th of June.

The Divinity, Law, and Physic Schools are open during the whole of every Term, and the keeping of all Acts, except the former which are confined to every other Thursday, is entirely at the discretion of the respective Professors.

All Festivals, Saints' days, and Sundays, are surplice days, and the evenings preceding are surplice evenings ; but on May 29, June 26, and November 5, surplices are worn in the morning only.

On Litany days the Doctors and Noblemen wear their robes, and the Proctors their congregation ruffs.

Commemoration of Benefactors is at St Peter's, Clare, Pembroke, Caius, Queens', Catharine, Jesus, Christ's, and St John's Colleges. the day after the end of each Term, on which occasion there is a feast in the several college halls.

# UNIVERSITY OF CAMBRIDGE.

DEUM TIMETO: REGEM HONORATO: VIRTUTEM COLITO:  
DISCIPLINIS BONIS OPERAM DATO.

*Stat. Acad. Cantab.*

## Introduction.

THE UNIVERSITY of CAMBRIDGE is a society of students in all and every of the liberal arts and sciences, incorporated (13th Eliz. c. 29,) by the name of "*The Chancellor, Masters, and Scholars of the University of Cambridge.*" The frame of this little commonwealth standeth upon the union of seventeen colleges, or societies, devoted to the study of learning and knowledge, and for the better service of the Church and State. All these colleges\*, or halls, have been founded since the beginning of the reign of King Edward I.† and are maintained by the endowments of their several founders and benefactors. Each college is a body corporate, bound by its own statutes; but is likewise controlled by the paramount laws of the University. The present University Statutes were given by Queen Elizabeth, and, with former privileges, were sanctioned by Parliament. They are the foundation upon which all new laws are framed.

Each of the seventeen departments, or colleges, in this literary republic, furnishes members both for the executive and legislative branch of its government. The place of assembly is the Senate-House.

All persons who are ‡Masters of Arts, or Doctors in one or other of the three faculties, *viz.* Divinity, Civil Law, or

\* Colleges and Halls are synonymous here, though not so at Oxford. Thus Clare Hall is called "Collegium, sive Domus, sive Aula de Clare."

† The first authentic charter is said to be dated 45 Henry III. and to be found among the records in the Tower.

‡ Those Bachelors in Divinity who are Members of the Senate, deduce their privilege from having previously taken the degree of M.A.

Physic, having their names upon the college boards, holding any University Office, or being resident in the town of Cambridge, have votes in this assembly. The number of those who have a title to the appellation of Members of the Senate, is at present about two thousand four hundred. Those who erase their names from their respective college boards, lose the privilege of being Members of the Senate, unless they *re-enter* their names, and reside the greater part of three several terms.

The SENATE is divided into two Classes, or Houses; and, according to this arrangement, they are denominated Regents, or Non-Regents, with a view to some particular offices allotted to the junior division by the statutes of the University.

Masters of Arts of less than five years' standing, and Doctors of less than two, compose the Regent, or Upper, House; or, as it is otherwise called, the White-Hood House, from its members wearing their hoods lined with white silk. All the rest constitute the Non-Regent, or Lower-House; otherwise called the Black-Hood House, its members wearing black silk hoods. But Doctors of more than two years' standing, and the Public Orator of the University, may vote in either House, according to their pleasure.

Besides the two Houses, there is a Council called the Caput, chosen annually upon the 12th of October, by which every University Grace must be approved, before it can be introduced to the Senate.

The CAPUT consists of the Vice-Chancellor, a Doctor in each of the faculties, Divinity, Civil Law, and Physic, and two Masters of Arts, who are the representatives of the Regent and Non-Regent Houses. The Vice-Chancellor is a member of the Caput by virtue of his office. The election of the other members of this Council is effected in the following manner:—The Vice-Chancellor and the two Proctors severally nominate five persons properly qualified for the trust, and out of the fifteen, the Heads of Colleges, Doctors, and Scrutators, choose five. In general, the Vice-Chancellor's list is honoured with the appointment: and in case any member thus appointed should afterwards be chosen Vice-Chancellor, or should die, the vacancy in the Caput is not filled up by election, but the senior in the faculty present in the Congregation supplies his place.

A few days before the beginning of each Term, the Vice-Chancellor publishes a list of the several days on which a Congregation; or assembly of the Senate, will be held for transacting University business; these fixed days occur about once a fortnight; but in case of emergency, the Vice-Chancellor calls a meeting of the Senate for the dispatch of extraordinary

affairs. This is done by means of a printed notice, specifying the business, exhibited in the halls of the several colleges three days before the time of assembly. Any number of members of the Senate, being not less than twenty-five, including the proper officers, (or their legal deputies,) who, by virtue of their oaths, are obliged to be present, constitutes a Congregation, and may proceed to business. There are also Statutable Congregations, or days of assembling enjoined by the statutes, for the ordinary routine of University affairs, such as conferring degrees, electing officers, &c., for which no notice is required. A Congregation may also be held without three days previous notice, provided *forty* Members of the Senate be present at its *first* assembling, and twenty-five at the second. Previous to every Congregation the University bell rings for the space of one hour. Every member has a right to present any proposition, or Grace, to the consideration of the Senate; but previously to its being voted by the two Houses, it is to be read and approved by the Council, or Caput, each member of which has a *negative* voice. After a Grace has passed the Caput, it is read in the Non-Regent House by the Senior Scrutator; and also in the Regent House by the Senior Proctor; and the Congregation is prorogued by the Vice-Chancellor. It is read in like manner at the second Congregation; and if a *non-placet* is put in by a member of the Non-Regent House, it is there voted; and in case the number of *non-placets* is equal to, or exceeds, that of the *placets*, the Grace is thrown out, and can proceed no further; but if the *placets* exceed the *non-placets*, it is carried up into the Regent House, and there undergoes the same process, and if it passes through both Houses, it is considered a regular act of the Senate; and if the subject be of a public nature, it becomes a statute.

We have selected, as a specimen, the following Grace, which passed Feb. 28, 1806:—

*“ Cum tempora, quibus hactenus haberi solita est Matriculatio, usu comperta sint incommoda, et propter hanc atque alias causas, ipsa Matriculatio ab Alumnis cœperit prætermitti;*

*“ Placeat Vobis, ut in posterum, pro die insequente cujusque termini finem, dies instituaturs ad Matriculationem peragendam, qui vel proxime vel uno interjecto sequatur mediam termini cujusque partem: Atque ut iis, qui post decimum Octobris diem, Anno Domini millesimo octingentesimo quinto, intra Academiam per tres terminos commorati, non matriculati fuerint, nullus omnino computetur terminus, nisi ab illo die, in quo Matriculationem rite perfecerint.”*

No degree is ever conferred without a Grace for that purpose, which undergoes the same scrutiny and process as above related; those for Bachelors of Arts, Honorary degrees, and Masters of Arts of King's college, excepted, which require reading at *one* Congregation only. After the Grace has passed, the Vice-Chancellor is at liberty to confer the degree. A Grace in this instance is termed a Supplicat. It is signed by the Prælector of the college to which the candidate belongs, and the subscriber is made responsible for the assertion it contains. The penalty for subscribing a false Supplicat, is "*ipso facto*," two years deprivation of the privilege of voting in the Senate, or holding any public office in the University. *Lib. Stat.* p. 234.

#### Form of a SUPPLICAT for the degree of M.A.

*Coll....., 5to Aprilis, 18*

*" Supplicat Reverentiis vestris A.B. ut novem termini completi post finalem ejus Determinationem, in quibus ordinarias lectiones audiverit, (licet non omnino secundum formam Statuti) una cum omnibus oppositionibus, responsionibus, disputationibus, declamationibus, cæterisque exercitiis per Statuta Regia requisitis, sufficiant ei ad incipiendum in Artibus."*

*" C. D. Prælector."*

For every other degree there is a proper form.

The University confers no degree whatever, unless the Candidate has previously subscribed a declaration that he is *bonâ fide* a member of the Church of England as by law established.\*

The executive branch of the University is committed to the following officers :—

A CHANCELLOR, who is the head of the whole University, and presides over all cases relating to that body. In him is placed the sole authority within the precincts, except in matters of mayhem and felony. He seals the diplomas and letters of degrees, provisions, &c., given by the University. He is to preserve and defend its rights and privileges, to convoke assemblies, and to do justice among the members under his jurisdiction.

A HIGH STEWARD, who has special power to take the trial of scholars impeached of felony within the †limits of the Uni-

\* This suffices for B.A. M.B. and B.C.L.; but for other degrees it is necessary that persons should subscribe to the 36th Canon of the Church of England, inserted in the Registry's Book.

† The jurisdiction of the University is a mile every way round, reckoning from any part of the suburbs.

versity, and to hold and keep a leet according to the established charter and custom. He appoints a Deputy by Letters Patent, which are confirmed by a Grace of the Senate.

A VICE-CHANCELLOR, who is elected annually on the 4th of November, by the Senate. His office, in the absence of the Chancellor, embraces the execution of the Chancellor's powers, and the government of the University, according to her statutes. He must, by an order made in 1587, be the Head of some college; and during his continuance in office he acts as a magistrate for the University and County.

A COMMISSARY, who is an officer under the Chancellor. He holds a court of record for all privileged persons and scholars under the degree of M.A. In this court, all causes are tried and determined by the civil and statute law, and by the custom of the University. He also is allowed a Deputy.

A PUBLIC ORATOR, who is the voice of the Senate upon all public occasions. He writes, reads, and records the letters to and from the body of the Senate, and presents to all honorary degrees with an appropriate speech. This is esteemed one of the most honourable offices in the gift of the University.

The ASSESSOR is an officer specially appointed, by Grace of the Senate, to assist the Vice-Chancellor in his court, *in causis forensibus et domesticis*.

Two PROCTORS, who are peace-officers, elected annually. It is their especial duty to attend to the discipline and behaviour of all persons in *statu pupillari*, to search houses of ill fame, and to take into custody women of loose and abandoned character, and even those *de malo suspectæ*. Another part of their duty is to be present at all Congregations of the Senate, to stand in scrutiny with the Chancellor or Vice-Chancellor, to take the open suffrages of the House, both by word and writing, to read them, and to pronounce the assent or dissent accordingly; to read the Graces in the Regent House, to take secretly the assent or dissent, and openly to pronounce the same. They must be Masters of Arts of two years standing at the least; and, of whatever standing in the University, are Regents, by virtue of their office. They determine the seniority of all Masters of Arts at the annual commencement.

A LIBRARIAN, to whom the regulation and management of the University Library is confided.

A REGISTRARY, who is obliged, either by himself, or by deputy properly authorized, to attend all Congregations, to

give directions (if it be required), for the due form of such Graces as are to be propounded, to receive them when passed in both Houses, and to register them in the University records. To register also the seniority of such as proceed yearly in any of the arts and faculties, according to the schedules delivered unto him by the Proctors.

**TWO TAXORS**, who must be Masters of Arts, and are Regents by virtue of their office. They are appointed to regulate the markets, to examine the assize of bread, the lawfulness of weights and measures, and to call all abuses and defects thereof into the Commissary's court.

**TWO SCRUTATORS**, who are Non-Regents, and whose duty it is to attend all Congregations, to read the Graces in the Lower House, to gather the votes secretly, or to take them openly in scrutiny, and publicly to pronounce the assent or dissent of that House.

**TWO MODERATORS**, nominated by the Proctors, and appointed by a Grace of the Senate. They act as the Proctors' substitutes in the Philosophical Schools, superintending alternately the exercises and disputations in philosophy, and the examinations for the degree of Bachelor of Arts. They are also generally appointed Deputies in the absence of the Proctors.

**TWO PRO-PROCTORS**, who are appointed, in consequence of the increasing magnitude of the University, to assist the Proctors in that part of their duty which relates to the discipline and behaviour of those persons who are in *statu pupillari*, and the preservation of public morals; but in the other parts of the Proctors' office they have not any concern, or control.

**THREE ESQUIRE BEDELLS**, whose office is to attend the Vice-Chancellor, whom they precede with their silver maces upon all public occasions and solemnities. To attend the Doctors present in the Regent House, by bringing them to open scrutiny, there to deliver their suffrages either by word or writing, according to the order of the statutes; to receive from the Vice-Chancellor and the rest of the Caput, the Graces delivered unto them, and to deliver them first to the Scrutators in the Lower House, and from thence, if they be granted, to carry them to the Proctors in the Upper House; to attend the Professors and Respondents in the three faculties from their colleges to the Schools, and during the continuance of the several acts; to collect fines and penalties from all

members of the University; and to summon to the Chancellor's Court all members of the Senate.

The UNIVERSITY PRINTER, the LIBRARY KEEPER, the UNDER LIBRARY KEEPER, and the SCHOOL KEEPER, are elected by the Senate.

The YEOMAN BEDELL is appointed by Letters Patent under the hand and seal of the Chancellor.

The UNIVERSITY MARSHAL is appointed by Letters Patent under the hand and seal of the Vice-Chancellor.

There are two Courts of Law in this University, *viz.* the *Consistory Court of the Chancellor*, and the *Consistory Court of the Commissary*.

## THE CONSISTORY COURT OF THE CHANCELLOR.

IN this Court, the Chancellor, and in his absence the Vice-Chancellor, with the assistance of some of the Heads of colleges, and one Doctor or more of the Civil Law, administers justice desired by any member of the University, or by any requiring the same to be put in execution against any of that body, in matters and causes belonging to this court.

All pleas and actions personal, as of debts, accounts, contracts, &c. or of any other injury (begun or grown within the limits of the University), whereunto a privileged person is a party, and not concerning mayhem and felony, are solely to be here heard and decided.

The manner of the proceeding is according to the course of the civil law, *viz.* by citation, libel, &c.

In matters of delict (arising from the buying of victual or victualling, or from the trial of victual), the Chancellor, in his proceeding and judgment, receiveth direction from the law given to the University by charter, or from the customs of the University, and from the statutes of the land where the charters and customs are wanting. In this proceeding he is authorized by a charter, confirmed by Act of Parliament.

From the judgment of this court there lies an appeal unto the Senate, who commit the examination thereof to certain delegates (either Doctors, or Masters of Arts), being three at the least, and not more than five, with a power either to reverse or to ratify the appeal.

## THE CONSISTORY COURT OF THE COMMISSARY.

IN this Court, the Commissary doth, by authority given him by deputation under the seal of the Chancellor of the University, sit, as well in the University, as at Midsummer and Stourbridge fairs, there to take knowledge, and to proceed in all causes *ad instantiam et promotionem partis ut supra*, the parties, or one of them, being privileged; saving, that within the University all causes and suits whereunto the Proctors, or Taxors, or any of them, or a Master of Arts, or any other of superior degree, is a party, are reserved solely and wholly to the jurisdiction of the Chancellor, or Vice-Chancellor.

The manner of proceeding in this, is the same as in the other court, where the Chancellor himself, or the Vice-Chancellor presideth: being for the service thereof attended by the Registry and the Yeoman Bedell, and having procurators and advocates there to plead, as in the other court required.

The party aggrieved is, by the statute, allowed his appeal unto the Chancellor's court, and so from thence to the Delegates, if the cause and grief of the party render such an application necessary.

The TWO MEMBERS, whom the University sends to the Imperial Parliament of the United Kingdom of Great Britain and Ireland, are chosen by the collective body of the Senate.

The UNIVERSITY COUNSEL are appointed by Grace of the Senate, and are consulted upon various occasions.

The SOLICITOR is appointed by the Vice-Chancellor.

The SYNDICS are members of the Senate, appointed by Grace to transact all special affairs relating to the University, such as the framing of laws, regulating fees, inspecting the library, buildings, printing, &c.

The PROFESSORS have stipends allowed them from various sources; some from the University chest, others from Government, or from estates left for that purpose. The annual income of the University chest is about 16,000*l.*, including about 3000*l.* of floating capital. This arises from stock in the funds, manors, lands, houses, fees for degrees, government annuity (for surrender of the privilege of printing almanacks), profits of the printing-office, &c.

The Annual Expenditure is about 12,000*l.*, disbursed to the various officers, professors, the library and schools, the University press, taxes, charitable donations, &c. &c. The whole is managed by the Vice-Chancellor of the year, and the accounts are examined by three auditors, appointed annually by the Senate.

The STATUTES of the University were printed in 1785, and a copy of them may be found in the Public Library, in the Library of every college, and in the Senate-House; the Vice-Chancellor and the two Proctors for the time being have also each one. The book of Statutes is divided into the following heads:—*Statuta Antiqua in ordinem redacta*:—*Statuta Antiqua in ordinem non redacta*—*Statuta Regis Henrici octavi*—*Statuta Regis Edvardi sexti*—*Statuta Reginae Elizabethæ anno primo regni sui edita*—*Decreta edita auctoritate Gul. Cecilii, 1562*—*Statuta Reginae Elizabethæ anno duodecimo regni sui edita*—*Literæ Regiæ ad Academiam datæ*—*Interpretationes Statutorum*—*Senatusconsulta, sive gratiæ*—*Decreta præfectorum*—*Confirmatio compositionis inter Universitatem et Collegium Regale*—*Juramenta*—*Formulæ*—*Tabulæ feodorum*—*Appendix Statutorum, continens Statuta Reginaldi Pole, 1557, &c.* The statutes of the 12th of Elizabeth, and the *Senatusconsulta*, are those which are chiefly regarded at this time. Many of the old statutes, decrees, interpretations, &c. are looked upon as obsolete, or unnecessary, in the present state of the University.

The TERMS of this University are three, and are fixed by invariable rules. Michaelmas, or October, Term begins on the 10th of October, and ends on the 16th of December. Lent, or January, Term begins on the 13th of January, and ends on the Friday before Palm Sunday. Easter, or Midsummer, Term begins on the eleventh day (the Wednesday se'nnight) after Easter-day, and ends on the Friday after Commencement-day. Commencement-day is always the first Tuesday in July.

When any member of the Senate dies within the University during Term, on application to the Vice-Chancellor, the University bell rings for one hour: from which period *non-term*, as to public lectures and disputations, commences for three days.

If any member of the Senate change his college, twenty-four hours *only* are allowed for that purpose; if he exceed that time, he must again keep three terms, before he can be re-instated as a member, or qualified to vote.

The seventeen Colleges which constitute this University were founded by different individuals: all the founders enjoin the

cultivation of *religion*, in the first place, and next to that, polite literature and the sciences; all which combined are to set forth the glory of God in his works of Creation and Redemption. The statutes of some of the colleges require the Fellows to be born in England—in particular counties, districts, &c. The Fellowships at Trinity, St John's, Jesus, Sidney, Downing, Clare-Hall, and Trinity-Hall, are *perfectly* open to all competitors, and those in the other colleges are nearly so; and it is particularly worthy of notice, that with regard to all, there is this law and determination: “WHOSOEVER HATH ONE ENGLISH PARENT, ALTHOUGH HE BE BORN IN ANOTHER COUNTRY, SHALL BE ESTEEMED AS IF BORN IN THAT COUNTY TO WHICH HIS ENGLISH PARENT BELONGED. BUT IF BOTH PARENTS WERE ENGLISH, HE SHALL BE RECKONED OF THAT COUNTY TO WHICH HIS FATHER BELONGED.” *Stat. Acad.* p. 268.

*The respective Orders in the several Colleges are as follow :*

1. A HEAD of a College or House, who is generally a Doctor in Divinity; excepting of Trinity-Hall, Caius College, and Downing College, where they may be Doctors in Civil Law or Physic. The Head of King's is styled Provost; of Queens', President; all the rest, Master.

2. FELLOWS, who generally are Doctors in Divinity, Civil Law, or Physic; Bachelors in Divinity; Masters or Bachelors of Arts; some few Bachelors in Civil Law or Physic, as at Trinity-Hall and Caius College. The number of Fellowships in the University is 430.

3. NOBLEMEN GRADUATES, DOCTORS in the several faculties, BACHELORS IN DIVINITY (who have been Masters of Arts), and MASTERS OF ARTS, who are not on the foundation, but whose names are kept on the boards for the purpose of being members of the Senate. The expense of keeping the name upon the boards varies a little in some colleges—in general it is about £4. per annum.

4. GRADUATES, who are neither members of the Senate, nor in *statu pupillari*, are Bachelors in Divinity, denominated Four-and-Twenty-men, or Ten-year-Men. They are allowed by the 9th statute of Queen Elizabeth, which permits persons, who are admitted at any college when 24 years of age and upwards, to take the degree of Bachelor in Divinity after their names have remained on the boards *ten* years. During the two last years they must reside in the University the greater part of three several terms, and perform the exercises which are required by the statutes.

5. **BACHELORS** in **CIVIL LAW** and **PHYSIC**, who sometimes keep their names upon the boards till they become Doctors. This is a needless expense, unless they propose to derive some advantage from becoming members of the Senate.

6. **BACHELORS** of **ARTS**, who are in *statu pupillari*, and pay for tuition whether resident or not, and generally keep their names on the boards, either to shew their desire to offer themselves candidates for Fellowships, or to become members of the Senate. If they erase their names, they save the expense of tuition and college *detrimenta*; and may nevertheless take the degree of **M.A.** at the usual period, by putting their names on the college boards a few days previous to incepting. Some of these are styled Bachelor-Commoners, from the privilege of being allowed to dine, &c., with the Fellows.

7. **FELLOW-COMMONERS**, who are generally the younger sons of the nobility, or young men of fortune, and have the privilege of dining at the Fellows' table, from whence the appellation possibly originated.

8. **PENSIONERS** and **SCHOLARS** pay for their respective commons, rooms, &c.; but the latter are on the foundation, and, from the enjoyment of scholarships, read the graces in hall, lessons in chapel, &c. The number of Scholarships and Exhibitions in the University is upwards of 830.

9. **SIZARS** are generally men of inferior fortune. They usually have their commons free, and receive various emoluments.

# UNIVERSITY OFFICERS, &c.

## CHANCELLORS.\*

**T**HE office of Chancellor is *biennial*, or tenable for such a length of time beyond two years as the *tacit consent of the University* may choose to allow. The election of a Chancellor must be within fourteen days after the vacancy. At the time of election, the Vice-Chancellor, the two Proctors, and the junior D.D. present, stand in scrutiny, (in failure of the latter, the junior D.C.L., and in the absence of such, the junior M.D.) and first write their votes. All Members of the Senate then bring their votes written in the same form, and the Senior Proctor pronounces the election.

## REPRESENTATIVES IN PARLIAMENT.

JAMES I., by his Charter, in the first year of his reign, granted power to the Chancellors, Masters, and Scholars of the two Universities, to elect and return two persons in each, to represent them in Parliament. Whenever there is a vacancy in the representation, the Sheriff sends the precept to the Vice-Chancellor; and the election, of which the Vice-Chancellor gives four days notice at least, is to be within eight days from the receipt of it. At the time of election, the two Proctors, and the junior D.D. present, stand in scrutiny with the Vice-Chancellor, who is the returning officer. The members of the Senate then give their votes in writing, and a majority of such determines the election.

## COMMISSARIES.

THE Commissaries are appointed by Letters Patent under the hand and seal of the Chancellor.

## PROCTORS.

Two Colleges are every year to nominate persons for Proctors, in the order prescribed in a cycle of 51 years; in which time, King's, Trinity, and St John's Colleges have each of them eleven turns; St Peter's, Christ's, Queens', and Pembroke, seven each; Clare Hall, six; Corpus Christi, Jesus, Caius, Magdalene, Emmanuel, and Sidney, five each; Catherine Hall, four; and Trinity Hall, one. Each of the two colleges nominates one person. The person nominated may be a Regent or Non-Regent Master of Arts. If he be a Regent, he must be in the third year of his Regency at least.

He must be presented to the Vice-Chancellor, in the presence of the Registry, by the Head of his college, or by some one in his name, before the 1st day of August.

If any one who has been presented should die, or refuse the office, or be found incapacitated, before the 10th of October following, the Heads of colleges nominate two persons to be offered to the Senate, one of whom is to be elected. The same course is observed in case any college neglects to present in due time.

If the office becomes vacant before the expiration of the year Trinity Hall presents a Proctor for the remainder.

The Proctors are elected on the 10th of October, by the *Regents* only.

### TAXORS.

ACCORDING to the decree, by which the cycle of Proctors, now in use, was established, the several colleges are to present persons to be Taxors in the year immediately following that in which they have presented to the Proctorship. They may be either Regent or Non-Regent Masters of Arts; but by their office they are Regents during the year. They are to be presented to the Vice-Chancellor by the Masters of

their colleges, or by others in their names, before the 1st of September immediately preceding the election. Presentation, &c., the same as the Proctors; and in case of a vacancy, the like rule is observed. The election of Taxors takes place on the 10th of October, and the *Regents* only are the Electors.

### PRO-PROCTORS.

THE office of Pro-Proctor was instituted by a Grace of the Senate, April 29, 1818; and, by the regulations, Bachelors in Divinity, as well as Masters of Arts, are eligible. They are nominated by the Vice-Chancellor and the two Proctors, for the approbation of the Senate; and the election, which is by Grace, takes place at the first Congregation after the election of Proctors. The annual Salary of each Pro-Proctor is £40.

## LADY MARGARET'S PROFESSOR OF DIVINITY.

**A**N election to this Professorship, founded 1502, by LADY MARGARET, mother of Henry VII., is to be every *two* years. The Professor is to be chosen on the last day of Easter Term, and his two years are to commence from the next following feast of the Nativity of the Virgin Mary, (Sep. 8.) When the Lectureship becomes vacant, the same person may be re-elected, but this ceremony is generally dispensed with, and the Professor continues in his office as before. When, however, an election does occur, the electors are, the Chancellor, or Vice-Chancellor, Doctors, Inceptors, and Bachelors in Divinity, who have been Regents in Arts. Lady Margaret's stipend was 20 marks per annum. Augmented by James I. with the rectorial tithes of Terrington, Norfolk.

1765 Zach. Brooke, D.D. Joh.

1788 J. Mainwaring, B.D. Joh.

1807 Herbert Marsh, B.D. Joh.

## BISHOP MARSH'S LECTURES.

THE present Professor soon after his election commenced a course of Theological Lectures which have from time to time been delivered before the University in Great St Mary's Church. Thirty-four Lectures have been already given, and published at intervals in seven parts, under the general title of "A course of Lectures, containing a description and systematic arrangement of the several branches of Divinity, accompanied with an account both of the principal authors, and of the progress which has been made at different periods, in Theological learning."

They embrace almost every topic of Biblical criticism and interpretation, arranged under the following heads. Part 1. *The Criticism of the Bible.*—Part 2. *The same continued.*—Part 3. *The Interpretation of the Bible.*—Part 4. *The Interpretation of Prophecy.*—Part 5. *The Authenticity of the New Testament.*—Part 6. *The Credibility of the New Testament.*—Part 7. *The Authority of the Old Testament.* A revised edition of the first four parts has been published in one volume 8vo. under the title of "*Lectures on the Criticism and Interpretation of the Bible.*" Camb. 1828.

\* Formerly Master of St John's, and author of "The Reasonableness of Christianity."

## REGIUS PROFESSOR OF DIVINITY.

THE electors are, the Vice-Chancellor, the Master, and the two Senior Fellows of Trinity, the Provost of King's, and the Masters of St John's and Christ's colleges. If any of the electors of the aforesaid colleges be Vice-Chancellor, the President of Queens' is to supply his place. The candidates must be B.D., or D.D., and the day of examination is the eighth after the vacancy. This professorship, founded by HENRY VIII. 1540, and endowed with a stipend of £40, per annum, has since been augmented by James I. with the rectory of Somersham, Hunts.

## DR GELDART'S LECTURES.

THE King's Professor of the Civil Law delivers his course of lectures at Trinity Hall, in three successive Terms, beginning before the division of the Michaelmas Term, and ending at the division of the Easter Term. The lectures are read in the College Hall, and the usual hour is from ten to eleven in the morning. The terms of attendance are five guineas for the first course, afterwards *gratis*. By a *senatus-consultum* in 1768, it was enacted, that no person should be admitted to the degree of B.C.L. without producing to the Caput a certificate of his having attended the lectures in Civil Law for three terms.

\* The celebrated Critic. † Author of the Academic, and Lord Bishop of Lincoln.

‡ Author of the System of Nat. Philosophy, and Institutes of Nat. Law.

§ Late Lord Bishop of St. Asaph.

The \*plan of these lectures may be seen in a work, of which the fourth edition was printed at Cambridge in 1795, entitled "*An Analysis of the Roman Civil Law*," in which a comparison is occasionally made between the Roman Laws and those of England, by Samuel Hallifax, late Lord Bishop of St Asaph, and formerly the King's Professor of the Civil Law in this University.

Dr Geldart upon his appointment instituted an †examination in the subjects of his lectures, and all persons who have since been candidates for the degree of B.C.L. have been examined previously to performing the public exercise in the Schools.

Candidates for the *first* Class are expected to be prepared in the whole of the Analysis of the Lectures in the Civil Law, The Professor however does not examine them in the whole of the Analysis. He usually selects a certain number of Chapters, of which he gives notice in the course of his Lectures, and mentions the days, on which he intends to hold Examinations. And *every Student* in the Civil Law is expected to pass a satisfactory Examination, in the whole of the first book of the Analysis, and the first *seven* Chapters of the second book.

The third Classes for the year 1822—23, are in alphabetical order.

The Students in the Classes whose names are inserted within brackets are equal.

The following is the order of the Classes from October 1815, to July 1834.

Some Students in each year whose names are not inserted in these Classes, were permitted to pass, but not judged worthy to be classed.

## CHEMISTRY.

FOUNDED by the the UNIVERSITY, 1702.

THE Professors, previous to the year 1773, were elected by a Grace of the Senate; but there being several competitors for the office at that time, this mode of election became impracticable; and, as it appeared that no adequate provision had been made for such cases, it was decided that the election should, on that occasion, be "*more burgensium*:" by a Grace dated 24th October, 1793, it was determined that all subsequent elections to this Professorship should be in the same manner.

The salary is £100. per annum, which is paid by the Lords Commissioners of his Majesty's Treasury, on exhibiting a certificate of the delivery of a course of Lectures.

It appears, by the Graces appointing the first Professors, that a house and apparatus were attached to this Professorship: but the Laboratory has for many years been dismantled, and there is no apparatus exclusive of what is the private property of the Professor.

The Lectures are given in the Schools in the Botanical Garden.

## ASTRONOMY AND EXPERIMENTAL PHILOSOPHY.

THE candidates may be bachelors, married men, Englishmen (*Nostrates*), or Foreigners. The election is not to be before the thirtieth, nor protracted beyond the sixtieth day after the

schedule is affixed. The electors are, the Vice-Chancellor, the Masters of Trinity, Christ's and Caius colleges, and the Lucasian Professor. If any of the Masters be Vice-Chancellor, the Master of St John's acts in his stead. Founded by Dr PLUME, Archdeacon of Rochester, 1704.

This Professorship was endowed with the rent of an estate situated at Balsham. The stipend was increased by the bequest of Dr Smith; £50. per annum, being left by him to the Plumian Professor, on condition of an examination for Smith's Prizes being annually made. The present Professor having represented to the University, that the income of the Professorship offered no adequate remuneration for the increased labours occasioned by the superintendence of the Observatory, a Grace of the Senate was passed Feb. 27, 1829, for granting annually to the Professor from the Common Chest (by Grace), such a sum as would raise the income of the Professorship to £500 per annum.

#### PROFESSOR AIRY'S LECTURES.

THE object of these Lectures is, to illustrate, and (as far as is practicable) to prove, the principal laws of Mechanics, Hydrostatics, Pneumatics, and Optics: and the most important consequences of those laws. Many practical applications of these principles are explained: and various mechanical, optical, and other instruments, are exhibited.

#### ANATOMY.

AT the period of election, the Vice-Chancellor, the two Proctors, and the junior Doctor in Divinity present, stand in scrutiny: in failure of the latter, the junior D.C.L., and in the absence of such the junior M.D. All members of the Senate have votes, and the majority of such decide the election. Founded by the UNIVERSITY, 1707; salary £100. per annum.

**DR CLARK'S LECTURES ON HUMAN ANATOMY.**

**THE** course consists of at least fifty Lectures, which are delivered in the Anatomical School in the Michaelmas and Lent Terms (after the division of each), between the hours of one and two. The terms of attendance are five guineas for each of two courses: afterwards gratis.

These Lectures—(a certificate of attendance on which is required by the Senate from Candidates for medical degrees, provided they amount to fifty in number)—are intended to serve as a basis of medical education. After a full demonstration of the healthy textures of the human body, the alterations produced in them by disease are exhibited in various specimens, and the principles of Physiology and Pathology established.

The pupils have the opportunity of dissecting in private.

The Museum, which is appropriated to the use of the Professor of Anatomy for the time being, originated in a small collection of preparations which were presented by Mr Lawrence. It has been increased by the purchase of the Museum of the late Sir B. Harwood, consisting of several hundred preparations; by a series of Anatomical models in wax, executed under the direction of the present Professor, at Florence and Bologna; and more recently by an additional grant from the common chest.

New buildings have lately been erected for an Anatomical Museum upon an extended scale, with a lecture-room and dissecting-rooms. It is confidently expected that, before many years shall have elapsed, this Museum of Human and Comparative Anatomy will be able to compete with most of the other similar collections in the kingdom.

As soon as the buildings shall have been completed, and the Museum arranged, the Professor of Anatomy proposes to deliver in the Easter Term a series of Lectures on Zoology and Comparative Anatomy. The object of these lectures will be:

To point out the relative importance of those characters upon which Zoological classification is based:

To notice the progressive developement of individual systems of organs in the different species of Animals:

To connect these with the corresponding differences in the phenomena of life:

To point out the series of gradations through which these phenomena pass, until they attain their utmost perfection in Man.

The particulars of these Lectures will be hereafter more fully detailed: and an announcement given of that portion of the subject which will constitute the first course.

## BOTANY.

THIS Professorship was founded by the University in 1724. A Salary of £100. was allowed by Government, on condition of a course of Lectures being annually delivered, as in the case of the Professorships of Anatomy, Chemistry, &c. Government afterwards increased the salary to £200., and made the Professorship a Patent office.

## GEOLOGY.

THIS Professorship was founded by Dr WOODWARD, in the year 1727. On January 31, 1731-2, the four executors of the Founder's will appointed Dr Conyers Middleton the first Professor. After their decease the election was vested in the members of the Senate; in addition to whom the following persons were allowed to give their votes by proxy, *viz.* the Chancellor of the University, the Archbishop of Canterbury, the Bishop of Ely, the President of the Royal Society, the President of the College of Physicians, and the Members for the University. The original collection in the Cambridge Museum consisted exclusively of those specimens which are described in Dr Woodward's Catalogues, printed in 1729. The English Fossils were bequeathed by him to the University: and by a Grace of the Senate, dated Feb. 26, 1728-9, the Vice-Chancellor was empowered to purchase of his heirs, for a sum not exceeding £1000. the foreign fossils described in the above-mentioned catalogues. This purchase having been carried into immediate effect, the whole collection came into the possession of the University, and remains nearly in the same order in which the Doctor first arranged it. Two graduates of the University are annually appointed to inspect its condition, and their report is delivered on the 1st of May to the Heads of Houses, who form a board of auditors for that purpose.

This noble monument of the talents and unwearied labours of Dr Woodward unfortunately remains in a room ill fitted for its reception; where the specimens which form the collection cannot be well exhibited.

Among the native fossils which have had a place in this collection more than one hundred years, the mineralogist will find the Corundum, Native Meteoric Iron, the fossil Copal of Highgate, and some other substances, in describing which Dr Woodward anticipated the discoveries of succeeding naturalists; and the extraneous fossils of the same cabinets, prove that many discoveries in that branch of natural history have been in like manner anticipated.

Professor Green added some valuable organic remains to the Woodwardian cabinets. But Professor Hailstone, after his appointment, formed another distinct collection composed of many rare and beautiful simple minerals, and of specimens illustrative of the physical structure both of the British isles and some portions of the Continent. In this labour he was assisted by the munificence of various friends of the University.

To this part of the collection the present Professor has, by the active assistance of some of his friends, been enabled to make large and important additions. He has also established a course of Lectures, in which it is his endeavour to explain the structure of the earth; more especially as it is illustrated in the successive formation of the British isles.

The erection of a new Museum, now in the contemplation of the University, will, it is hoped, enable him before long to exhibit the whole collection in such a manner as to carry into full effect the intention of its Founder.

(Mr NORRIS'S.)

THE Stewards of this institution are, the Master of Trinity, the Provost of King's, and the Master or President of Caius. The candidates for the Professorship give a written notice to

the three Stewards within the first fourteen days of November. The Stewards select two, and signify their names to the Heads of Houses on or before the 1st day of February next ensuing, and the election of one of the two nominated must be within the first fourteen days of the succeeding May. The electors must be a majority of ten Heads of Houses. The Professor may have been educated at either University, may be lay or clerical, but cannot be elected under his thirtieth, or re-elected after his sixtieth year. No person can continue in office longer than five years, but may be re-elected.—Founded by JOHN NORRIS, Esq. of Whitton in Norfolk, 1760. Salary, £105. per annum.\*

The Norrisian Professor of Divinity delivers fifty Lectures during the Michaelmas and Lent Terms, gratuitously, in conformity with the Founder's directions, to those who have been matriculated or incorporated into the University, on three days in the week, at the Lecture-Room under the Public Library. The Lecture-Room opens ten minutes before one o'clock, and closes at ten minutes after; the Lecture concludes at two o'clock precisely. Twenty Lectures must be attended to obtain the Professor's certificate; and no undergraduate who has not passed his examination for a degree, will be admitted to attend for the purpose of obtaining the certificate, unless his name has been entered immediately after two o'clock on some lecture-day, in a preceding lecture term, in a book kept at the Lecture-Room for that purpose.

By the will of the Founder, the Professor is required to read, during each course of fifty Lectures, certain portions of Bishop Pearson's Exposition of the Creed. These portions of Bishop Pearson's Work, the present Professor has incorporated with his own Course of Lectures, a Syllabus of which is published.

the greater part of the year previous to the day of election (excepting only such Masters of Arts as are under one year's standing, who may vote though they have not been resident for that term); which said Regent Masters, on notice assigned by the Master, Fellows, and Scholars of Trinity College, shall assemble on a day, and choose, within one month after such notice is received, by a majority of votes given in writing under the hand of each voter, and taken by the Proctors, such a person as appears best qualified in Natural and Experimental Philosophy and Chemistry. A member of Trinity college is to be preferred (*cæteris paribus*), next a Staffordshire, Warwickshire, Derbyshire, or Cheshire man. In cases of disputes about the majority of the electors, the same is to be determined by the Vice-Chancellor, the Provost of King's, and the Master of Trinity, or if either of the two latter be Vice-Chancellor, by the Master of St John's. ### PROFESSOR FARISH'S LECTURES.

THE Lectures embrace a great variety of subjects. In the original arrangement of them, the Professor conceived that the application of the principles of Natural Philosophy, Natural History, Chemistry, &c., to the Arts, Manufactures, and Agriculture of Britain, presented a new and useful field of instruction:—After having taken an *actual survey* of almost every thing curious in the kingdom on such subjects, he contrived a mode of exhibiting the operations and processes that are in use in nearly all of them. Having provided himself with a number of brass wheels of all forms and sizes, such that any two of them can work with each other; and also with a variety of axles, bars, screws, clamps, &c., he constructs at pleasure, with the addition of the peculiar parts, working models of almost every kind of machine. These he puts in motion by a water-wheel, or a steam-engine, in such a way as to make them in general do the actual work of the real machines, on a small scale; and he explains, at the same time, the chemical and philosophical principles on which the various processes of the arts exhibited depend.

In the course of his Lectures he explains the natural history of minerals, the theory and practice of mining, and of smelting metallic ores—of bringing them to nature—of con-

verting, purifying, compounding, and separating the metals : and the numerous and various manufactures which depend upon them, as well as the arts which are more remotely connected with them, such as etching and engraving. He exhibits the method of obtaining coal, and other minerals—the processes by which sulphur, alum, common salt, acids, alkalies, nitre, and other chemical substances, are obtained, and in which they are used—the mechanical process in the formation of gunpowder, as well as its theory and effects. He adverts to the agriculture of the country, and shews the arts of procuring and working animal and vegetable substances; the great staple manufactures of the country, in wool, cotton, linen, silk, together with the various chemical arts of bleaching, of preparing cloth, of printing it, of using adjective and substantive colours, and mordants and intermediates in dying, and the processes by which various products are obtained from vegetable and animal substances. He explains in general the nature of machinery—the moving powers, such as water-wheels, wind-mills, and particularly the *agency* of steam, which is the *great* cause of the modern improvement and extension of manufactures. He treats likewise on subjects which relate to the carrying on, or facilitating, the commerce of the country, such as inland navigation, the construction of bridges, aqueducts, locks, inclined planes, and other contrivances by which vessels are raised, or lowered, from one level to another. On the whole, it is the great design of these Lectures to excite the attention of persons already acquainted with the principles of mathematics, philosophy, natural history, and chemistry, to the advancement of useful arts, and by drawing their minds to the consideration of the most important discoveries of ingenious men, in all parts of the kingdom, to enlarge their sphere of amusement and instruction, and to promote the improvement and progress of the arts.

These Lectures are given in the Schools in the Botanic Garden. The terms of attendance are, three guineas for the first course, two guineas for the second, afterwards *gratis*.

The founder appoints that twelve students should be admitted *gratis*; of whom four are to be of Trinity college, if they choose to attend.

## DOWNING PROFESSOR OF THE LAWS OF ENGLAND.

THE Professor is elected by the Archbishops of Canterbury and York, and the Masters of St John's, Clare Hall, and Downing. Founded in pursuance of the will of Sir GEORGE DOWNING, Bart. K.B., 1800. Salary £200. per annum.

1800 Edw. Christian, M.A. Joh. | 1823 T. Starkie, M.A. Cath.

The Downing Professor of the Laws of England reads every year, in Michaelmas Term, a course of Lectures, upon the Constitution and Laws of England, in the Hall of Downing college.

Two gentlemen of any description, recommended by the Master or Tutors of each college, and all who have attended two courses, are admitted *gratis*.

## DOWNING PROFESSOR OF MEDICINE.

THE foundation, election, and salary, the same as the preceding.

Dr Hewett, the Downing Professor of Medicine, gives a course of Lectures on PATHOLOGICAL ANATOMY, illustrating it by specimens of Diseased Structure, and shewing the connexion between each structural læsion and its corresponding symptoms and treatment, and on the USE and ABUSE of MERCURY, every year in the Michaelmas Term, on the usual terms of public attendance.

## MINERALOGY.

THIS Professorship was founded by the UNIVERSITY in the year 1808, and afterwards endowed by Government with a salary of £100. per annum.

Lectures had been given by Dr Clarke for two years prior to the establishment of the Professorship, and specimens exhibited which had been collected during his travels. His principal object was to call the attention of the University to the importance of Mineralogical studies; to illustrate the

natural history of the materials used by architects, sculptors, and lapidaries, both ancient and modern; the mineralogy of the sacred Scriptures, and of the ancient poets and historians; and, finally, to suggest the means of pursuing this branch of knowledge without the expence and incumbrance which have usually been its attendants.

After the death of Dr Clarke, the Senate decreed that the Professorship should be continued, and the sum of £1500. was given for the Collection of Minerals which he had formed.

This collection was for some time kept in the room belonging to the Botanical Professor, but on the appointment of Professor Henslow to that office, he found it necessary to appropriate his apartment to the purposes of his own science. The University is for the present entirely destitute of any place where the Mineralogical collection can be deposited, and the present Professor has been compelled to receive it into his own chambers. It is here necessarily in a situation incapable of allowing it to be exhibited, and by no means adequate to its proper preservation. It is hoped, however, that the University will before long be possessed of a Museum more worthy of the Collection, and adapted to that exhibition of arrangement which is one of the student's most important aids in acquiring the science. The Professor delivers a course of Lectures in the Lent Term.

## POLITICAL ECONOMY.

THE title of Professor of Political Economy was conferred by a Grace of the Senate, in May 1828, on George Pryme, Esq. M.A., late Fellow of Trinity college.

Lectures on this science had been given for some years previous, under the sanction of the University. They attempt to analyse the original and efficient causes of national prosperity—to shew by what measures of the legislature, and by what conduct of individuals in private life, it is augmented or diminished—and to assist the reader of history, in explaining the phænomena of the strength or weakness, the rise or fall, of states.

They are of an elementary and popular nature, requiring no previous knowledge of the subject. They are intended to

facilitate the study of a science, hitherto inaccessible without the most arduous perseverance; to simplify the order, explain the obscurities, and point out the errors of A. Smith's Inquiry into the Wealth of Nations; to combine with his discoveries what the experience of subsequent events, and the researches of subsequent authors, have taught, and to place some part of the subject in a point of view different from what any writer has done. Their plan is—1st. To trace the history of national wealth from the rudest to the richest state of society, and to examine each change as it naturally arises in the progress of opulence and civilization; 2dly. Briefly to explain the systems of the ancients, of Dr Paley, of the French economists, and what is called the commercial system; and 3dly. To explain the principles of taxation and finance.

They are given every day, at 12 o'clock, during Easter term, on the usual plan of attendance on public lectures.

## LADY MARGARET'S PREACHER.

THIS preachership, value £10. per annum, was founded in 1503, and, according to the grant, is to be retained for only three years, but that practice is now dispensed with, and the preacher continues without a fresh election. When a vacancy does occur, an election must take place within fourteen days. The electors are the Vice-Chancellor and the Heads of Houses. Doctors, Inceptors, and Bachelors in Divinity, only are eligible to this office, and one of Christ's college is, *cæteris paribus*, to be preferred. The preacher is now required by his office, to preach a *Concio ad Clerum*, before the University, on the day preceding Easter term.

## SADLERIAN LECTURES.

THE following seventeen Algebra Lectureships were founded by Lady Sadler, and the lectures commenced in 1710. The Lecturers, who are required to be Bachelors of Arts at least, are appointed and chosen by the Heads, who are the Trustees, and by the Vice-Chancellor for the time being, from all the colleges.—The Stipend of the Lecturers is £40. per annum each, Emmanuel excepted, which is £60. Every Lecturer produces a certificate, signed by the Master of his college, testifying that the lectures have been by him regularly given, before payment of the salary, which is half-yearly, at Emmanuel Lodge. The Lectureships are tenable only for ten years, and no one can at any time be elected, unless previously examined and approved by the Mathematical Professor.

## MR HULSE'S FOUNDATIONS.

THE REV. JOHN HULSE was educated at St John's college, became Bachelor of Arts in 1728, and died in 1789, bequeathing his estates in Cheshire to the University for the advancement and reward of religious learning. The various purposes to which he appropriated the revenue of these estates, are—first, the maintenance of two Scholars at St John's college—secondly, to recompense the exertions of the Hulsean Prizeman—thirdly, to found and support the office of Christian Advocate—and fourthly, that of the Hulsean Lecturer, or Christian Preacher. The salaries of these offices vary according to the annual rent of Mr Hulse's estates, different proportions of which are set apart for each, the largest belonging to the Lecturer. After the death of the principal legatee, the emolument will be considerable.

The trustees and electors of Mr Hulse's bequest are, the Vice-Chancellor for the time being, the Master of Trinity college, and the Master of St John's college. If the Master of Trinity or St John's be Vice-Chancellor, the Greek Professor supplies his place. The Bishop of Ely is visitor, with power to determine, in reason and equity, in all disputes.

## CHRISTIAN ADVOCATE.

*Extract from Mr HULSE'S Will, dated July 21, 1777.*

THE person to be elected into such office (on Christmas Day, or within seven days after, for a term not exceeding five or six years) to be a learned and ingenious person of the degree of Master of Arts, or of Bachelor or Doctor of Divinity, of the age of 30 years, and resident in the University; who is to compose yearly, whilst in office, some proper and judicious answer or answers every year, to all such new and popular, or other cavils and objections, against the Christian or revealed religion, or against the religion of nature, as may, in the opinion of the trustees, or any two of them, seem best or most proper to deserve or require an answer, whether the same be ancient or modern objections, but chiefly such as are most modern, and especially such as have appeared in the English language of late years against Christianity, and which may not seem to have received a full and sufficient answer, if any such there shall be, unto the year preceding his election; as likewise to be ready to satisfy any real scruples or objections in a private

way, that may be brought from time to time by any fair and candid enquirer against the same: such writer to be called the Christian Advocate, and such his written answers to be in English, and only against notorious infidels, whether atheists or deists, not descending to any particular controversies or sects among Christians themselves, except some new or dangerous error, either of superstition or enthusiasm, as of popery or methodism, either in opinion or practice, shall prevail: in which case only it may be necessary for that time to write or to reason against the same; and such treatise or treatises to be every year printed, the expence whereof shall be deducted out of the temporary stipend or salary; and the remainder of the said stipend or salary, or rents and profits, shall be paid or given every year to the several authors successively as a reward for the same; but if the person chosen into the said office shall neglect or not discharge his office as he ought to do, he is to forfeit and lose his salary for that year, which is, in such case, to be equally divided between the six senior fellows of St John's college.—The Christian Advocate is not afterwards eligible to the office of Hulsean Lecturer.

## HULSEAN LECTURER OR CHRISTIAN PREACHER.

*Salary, nearly £300. per annum.*

THE election to this office is to take place on Christmas Day, or within eight days after. The persons eligible are, Masters of Arts of the University of Cambridge, under forty years of age. The office is only annual, but the same individual may, under certain circumstances, be re-elected for any successive number of years, not exceeding six. The duty of the Lecturer is, by Mr Hulse's will, to preach and *print* twenty sermons in each year, ten in April, May, and the former part of June, and ten in September, October, and the former part of November. The subject of the discourses is—to shew the evidence for revealed religion, or to explain some of the most difficult texts or obscure parts of Holy Scripture,—or both. The time and place of delivery are to be in Great St Mary's church, and either on the

Friday mornings or the Sunday afternoons of each week in the above-mentioned period ; and if the duties be not discharged by the person appointed, his salary is divided amongst the six senior fellows of St John's college\*. The Preacher is not afterwards eligible to the office of Christian Advocate.

By a decree of the Court of Chancery in 1830, it was ordered that the number of Lectures shall be reduced to *eight*, and that the time of printing be enlarged for the term of one year from the delivery of the last Lecture.

Various circumstances prevented any appointment taking place until the year 1819, when the first election was made, and Lectures have since been delivered and published in the following order :

1820 †Chr. Benson, M.A. Trin. *The Evidences of Christianity, as derived from the answer of our Lord to the disciples of John the Baptist : from the predictions of Christ, and from the propagation of Christianity.*

1821 J. C. Franks, M.A. Trin. *Deputy. The Evidences of Christianity, as they were stated and enforced in the Discourses of our Lord.*

1822 Chr. Benson, M.A. Magd. *Scripture Difficulties.*

1823 J. C. Franks, M.A. Trin. *The Apostolical preaching and vindication of the Gospel to the Jews, Samaritans, and devout Gentiles, as exhibited in the Acts of the Apostles, the Epistles of St Peter, and the Epistle to the Hebrews.*

1824 }  
1825 } No Lecturer appointed.

1826 Temple Chevallier, M.A. Cath. *The Historical Types contained in the Old Testament.*

1827 Temple Chevallier, M.A. Cath. *The Proofs of Divine Power and Wisdom derived from the study of Astronomy, and on the evidence, doctrines, and precepts of revealed religion.*

1828 }  
1829 }  
1830 } No Lecturer appointed.

1831 J. J. Blunt, B.D. Joh. *The Veracity of the Historical Books of the Old Testament, argued from the undesigned coincidences to be found in them.*

1832 J. J. Blunt, B.D. Joh. *Principles for the proper understanding of the Mosaic writings stated and applied.*

1833 Henry John Rose, B.D. Joh. *The Law of Moses viewed in connexion with the history and character of the Jews. With a defence of the genuineness of the Book of Joshua against Professor Leo of Berlin and the modern critics of Germany.*

## TRAVELLING BACHELORS.

**WILLIAM WORTS**, M.A. of Caius College, formerly one of the Esquire Bedells of this University, gave two pensions of £100. per annum each, to two junior Bachelors of Arts, \*nominated by the Master of the college whose turn it is to present, and elected by the Senate, at which election the Vice-Chancellor and the Proctors stand in scrutiny, the senior of whom, after reading the votes, declares the election. The Bachelors are required to visit foreign countries, to take different routes, and to write during their travels two Latin letters each, descriptive of the customs, curiosities, &c. &c.; which letters, as soon as received by the Vice-Chancellor, are laid before the Senate, and afterwards deposited in the Public Library.

The income of these travellers is continued for the space of three years, the period they are obliged to be absent.

# ANNUAL PRIZES.

## Classical.

### CHANCELLOR'S MEDALLISTS.

**T**WO gold medals, value 15 guineas each, are given annually by the CHANCELLOR of the University, to two commencing \*Bachelors of Arts, who, having obtained Senior Optimes at least, shew themselves the greatest proficient in classical learning. On the day after the first Tripos Day, the candidates for these medals send in their names to the Vice-Chancellor, who appoints an early day for examination, of which notice is given to the several candidates. The successful candidates declaim on the second Tripos Day, upon a subject appointed by the Vice-Chancellor. These prizes were established in 1751, by his Grace Thomas Holles, Duke of Newcastle, and have been continued by the succeeding Chancellors. H. R. H. the Duke of Gloucester, the present Chancellor, gives annually, a third gold medal, to be conferred upon a resident undergraduate, who shall compose in English the best ode or best poem in heroic verse†. The subject is given out at the end of Michaelmas Term, and the exercises are to be sent in to the Vice-Chancellor on or before the 31st of March following, and are not to exceed 200 lines. Each candidate is to send his exercise privately: each is to have some motto prefixed: and to be accompanied by a paper sealed up, with the same motto on the outside; which paper is to enclose another, folded up, having the Candidate's name and college written within. The papers containing the names of those persons who do not succeed, are destroyed unopened. No prize will be given to any exercise which is written, wholly, or in part (or of which the title, motto, superscription, address, &c., are written), in the hand-writing of the candidate; nor to any one who has not, at the time for sending in the exercises, resided one term at least. Any candidate is at liberty to send in his exercise *printed* or *lithographed*. The successful candidate recites his Poem in the Senate-House on Commencement-day.—The examiners appointed by His Royal Highness to determine all these prizes are, the Vice-Chancellor, the Provost of King's,

\* No one is a complete Bachelor until after the second Tripos Day.

## MEMBERS' PRIZEMEN.

THE REPRESENTATIVES in Parliament of this University give four annual prizes of fifteen guineas each, which are adjudged by the Vice-Chancellor and Heads of colleges, to two Bachelors of Arts, and two Undergraduates, who compose the best Dissertations in Latin prose, which are read publicly by them in the Senate-House on a day appointed near to the Commencement, and afterwards sent by them to the aforesaid Members. Of these prizes, two are open to all Bachelors of Arts, without distinction of years, who are not of sufficient standing to take the degree of M.A.;—and the other two are open to all Undergraduates who shall have resided not less than seven terms at the time when the exercises are to be sent in. The subjects are delivered out at the end of Michaelmas Term, and each candidate is to send his exercise privately to the Vice-Chancellor, on or before the 30th of April, in the same manner as the exercises for the Chancellor's Medal. These prizes, confined until 1827 to Senior and Middle Bachelors, were established by the Hon. EDWARD FINCH and the Hon. THOMAS TOWNSHEND, and have been continued by the succeeding Members.

## SIR WM. BROWNE'S MEDALLISTS.

SIR WILLIAM BROWNE, Knt. M.D. directed three gold medals, value five guineas each, to be given yearly to three Undergraduates on the Commencement-day, when the exercises are publicly read, and copies of them sent by the successful candidates to Sir W. J. B. Folkes, Bart. The first to him who writes the best Greek Ode in imitation of Sappho; the second for the best Latin Ode in imitation of Horace; the third for the best Greek and Latin Epigrams: the former after the manner of the Anthologia, the latter after the model of Martial†. The subjects (delivered out at the end of Michaelmas Term) are appointed by the Vice-Chancellor, the sole adjudicator of these prizes. The exercises must be sent in on, or before, the 30th of April, in the same manner as the exercises for the Chancellor's Medal. The Greek Ode is not to exceed 25, and the Latin Ode 30 stanzas.

## PORSON PRIZE.

THE REV. CHARLES BURNEY, D.D. and the REV. JOHN CLEAVER BANKES, M.A. only surviving trustees of a fund raised by the friends of the late Professor Porson, and appropriated to his use during his lifetime, did, by deed, bearing date the 27th November 1816, transfer to the University the sum of £400. Navy 5 per cents. upon trust, that the interest arising therefrom shall be annually employed in the purchase of one or more Greek books, to be given to such resident Undergraduate as shall make the best translation of a proposed passage in Shakspeare, Ben Jonson, Massinger, or Beaumont and Fletcher, into Greek Verse.

The metre of the translation, if the selection be from a tragedy, shall be *Tragicum Iambicum Trimetrum Acatalecticum*, or *Tragicum Trochaicum Tetrametrum Catalecticum*; if from a Comedy, the metre of the translation shall be *Comicum Iambicum Trimetrum Acatalecticum*, or *Comicum Trochaicum Catalecticum*. The exercises (the subjects of which are delivered out at the end of Michaelmas Term) must be distinctly written and accentuated, and accompanied by a literal Latin prose version of the Greek, and sent in privately to the Vice-Chancellor on or before the 30th of April, in the same manner as the exercises for the Chancellor's Medal. The examiners are, the Vice-Chancellor or his deputy, the Provost of King's, the Masters of Trinity, St John's, Christ's, and Caius colleges, the Greek Professor, and the Public Orator. The prize translation is to be printed at the expense of the author, and copies to be given to the Vice-Chancellor and Heads of Houses, previous to the Commencement, at which time it is to be recited in the Senate-House. And if in any year there

be no translation worthy of the prize, the book or books provided for that year shall be reserved and given to the candidate who shall be considered second best in the subsequent year, and so from time to time the book or books provided in any year, and not given in that year as a prize, shall be reserved till the examiners shall adjudge the same to be given in some subsequent year to a candidate whose translation is second best, or third best to the prize translation, but worthy to be rewarded, and then shall be disposed of accordingly; provided also that they be printed and recited as in the case of the prize translation. All the prize translations, and every such second best or third best translations, shall be transcribed in a book to be kept by the Vice-Chancellor.

## THEOLOGICAL.

### NORRISIAN PRIZEMEN.

**J**OHN NORRIS, Esq. the Founder of the Divinity Professorship, by his Will bequeathed a premium of £12. per annum, £7. 4s. of which is to be expended upon a gold medal, the residue in books, to the author of the best prose Essay on a sacred subject, which is to be proposed by the Norrisian Professor. The qualifications for a Candidate are—1st. That he

be above twenty years of age and under thirty.—2d. That he must have attended twenty of the Norrisian Lectures in the course of some one year.

The subject is delivered out early in November, and the Essay must be sent either to the Master of Trinity, the Master of Caius, or the Provost of King's college, on or before the tenth day preceding Palm Sunday. A sheet of paper, folded up like a letter, with the name of the candidate inclosed, and sealed, must be sent with the Essay. Also a Greek or Latin motto must be inscribed on the Essay, and the same on the sheet inclosing the name. The three above-mentioned persons compare and decide which is the best Essay, and are directed by its motto to the letter which contains the name of the successful candidate, to whom the event is communicated on the Thursday in Passion week. The prize he receives within 14 days, giving at the same time a promissory note for the payment of £12. if he neglects to publish the Essay within two calendar months. The rest of the sealed papers are burnt unopened.

No doctrine must be advanced in the Essay contrary to the Liturgy, Articles, and Homilies of the Church of England.

## HULSE's PRIZEMEN.

THE Rev. JOHN HULSE, B.A. of St John's college, bequeathed to the University certain estates for the advancement of religious learning, and directed in his Will that out of the rents and profits, an annual premium of £40. (since increased to £100.) should be given to any member of this University, under the degree or standing of M.A., who composed the best Dissertation in the English language, on the Evidences in general, or on the Prophecies or Miracles in particular, or on any other particular argument, whether the same be direct or collateral proofs of the Christian religion, in order to evince its truth and excellence.

The subject is delivered out on Christmas-Day, or New Year's-Day, and the Dissertations are to be sent to the Vice-Chancellor, or to the Masters of Trinity and St John's, who are the trustees, on or before the 20th of the ensuing October, with the names of the respective authors, sealed up.

The writer of the Dissertation best approved is to print it at his own expense, and not to offer himself a second time for the premium.

## SEATONIAN PRIZE.

**T**HE Rev. THOMAS SEATON, M.A. late Fellow of Clare Hall, bequeathed to the University the rents of his Kislbury estate, now producing clear £40. per annum, to be given yearly to that Master of Arts who shall write the best English Poem on a sacred subject. The Vice-Chancellor, the Master of Clare Hall, and the Greek Professor (who are the disposers of this premium) determine the subject, which is delivered out in January, and the Poem is to be sent to the Vice-Chancellor on or before the 29th of September following. The Poem is to be printed, and the expense deducted out of the product of the estate: the remainder is given as a reward to the composer. The prize is determined a few days previous to the resignation of the Vice-Chancellor's office.†

## UNIVERSITY SCHOLARSHIPS.

### CRAVEN'S SCHOLARS.

**J**OHAN, LORD CRAVEN, founded two classical Scholarships of £25. per annum each, arising from estates vested in the hands of six trustees. The Cambridge trustees are, the Bishop of Peterborough, the Bishop of Bath and Wells, and the Master of Trinity college. Electors, the Vice-Chancellor, the five Regius Professors, and the Public Orator. Whenever a vacancy occurs, any undergraduate may offer himself a candidate by signifying his intention in a Latin letter addressed to the above electors, within the time limited by the Programma which declares the vacancy. If any one of the name or kindred of the founder should be in indigent circumstances, and a scholar of this University, he, (by the Will) is to be preferred. This annuity cannot be enjoyed after fourteen years standing in the University, nor by any one who may attain to preferment of double its value. The possessors are not allowed to be absent from the University above three months in the year, without the express permission of

\* The Examiners also gave notice, that should any Poem appear to them to possess distinguished merit, a premium of 100*l.* would be adjudged. The above premium was this year awarded to the Rev. T. E. HANKINSON, M.A. of Corpus Christi College.

the Vice-Chancellor or the major part of the electors then resident in the University.

These rules have been modified in part by the regulations enacted in 1817; which will be found at the end of this list of University Scholarships.

By a decree of the Court of Chancery, in 1819, the income of the Scholars has been augmented to £50. per annum each, and three additional Scholarships founded, under the same regulations as the preceding, except that they cannot be held for more than seven years.

## BATTIE's SCHOLARS.

WILLIAM BATTIE, M.D. Fellow of King's college, left an estate, present value £18. per annum, on a plan similar to the preceding, but subject to the following conditions:—1st Every Scholar shall reside nine calendar months in the year, except he be a graduate in Physic, or one who designs to profess the same; in that case his residence may be dispensed with at the University, provided he produces once every year a certificate signed by one Hospital Physician in London, testifying his regular conduct and diligent attendance with the said Physician at the Hospital. 2d. No Scholar is capable of being elected who has been admitted three years, or receives any benefit or advantage from either of Lord Craven's exhibitions; and if any one, after being admitted to this Scholarship, shall become entitled to any emoluments from the said exhibitions, his claim to this benefaction is void. 3d. When any Scholar shall have entered nine years at the college to which he first belonged, or shall have obtained any ecclesiastical benefice or preferment, excepting he is a Fellow of some one college, his right to this legacy shall then cease and determine. The electors to this Scholarship are, the Vice-Chancellor, the Provost of King's, the Regius Professors of Divinity, Civil Law and Physic, and the Proctors for the time being.

## BROWNE's SCHOLARSHIP.

SIR WILLIAM BROWNE, Knt. M.D. left a perpetual rent charge of £21. per annum, upon sundry estates for founding a Scholarship, to be paid clear of taxes and disbursements, to the Chancellor, Masters, and Scholars of the University. A candidate for this Scholarship must offer himself for examination within a year from his matriculation; public notice being given by the Vice-Chancellor a month before such election. The Scholarship, with all the arrears which may happen

### DAVIES'S SCHOLARSHIP.

THE REV. J. DAVIES, D.D. formerly Fellow of King's, and afterwards Provost of Eton college, bequeathed (by Will dated July 1804,) to the Vice-Chancellor for the time being, and the Provost of King's, in the University of Cambridge, in trust, the sum of £1000. in the 3 per cents. to found a Scholarship, to be called Dr Davies's University Scholarship, on the same footing as those called Craven's Scholars, for the greatest proficient in classical learning. The examiners to be the same, only with the addition of the Provost of King's; and to be tenable for the same number of years as the above-mentioned Scholarships.

### BELL'S SCHOLARSHIPS.

THE REV. WILLIAM BELL, D.D. Prebendary of the collegiate church of Westminster, and late Fellow of Magdalene college in this University, in the year 1810, transferred £15,200. stock, 3 per cents., to the University of Cambridge, in trust, to found eight new Scholarships. The Scholars to be the sons or the orphans of those Clergymen of the Church of England, whose circumstances and situations are altogether such as not to enable them to bear the whole expense of sending their sons to this University. On the receipt of this benefaction, Scholars were elected in such a manner, and for such a period, that two Scholarships will become vacant every year.

The regulations of these Scholarships are, that candidates for them must be in their first year of admission, and every Scholar elected on this foundation shall promise in writing to take the degree of B.A. in the most regular way. Where personal merits are equal, those are to be preferred who stand most in need of assistance. If any Scholar shall degrade or determine, and go out in a bye-term, or declare for law, or be rusticated or expelled, his Scholarship shall be *ipso facto* vacant. The profits to continue for four years, and no more. No persons shall ever have two sons Scholars, nor shall there be two orphans, brothers, Scholars at the same time. If no sons or orphans of clergymen shall be found properly qualified for these Scholarships, then, and then only, the electors shall elect the sons of laymen, being undergraduates, who stand in need of assistance. No Scholar to be elected from King's College, or from Trinity Hall.

The electors are, the Vice-Chancellor, the Regius Professors of Divinity and Civil Law, the Lucasian Professor of Mathematics and the Public Orator; and the election takes place on the Friday after Midlent Sunday.

In the following list, wherever two or more gentlemen are recorded as *æquales*, their literary merits were considered by the Electors as nearly equal. In this case the choice of the Scholar or Scholars was made simply on the ground of pecuniary circumstances, according to the express direction of the Supplemental clause to Dr Bell's Deed of Foundation.

## PITT SCHOLARSHIP.

*Rules for the Foundation of the Pitt Scholarship, and for the Election of a Scholar, confirmed by Grace of the Senate, Dec. 9, 1813.*

1.—THE sum of £1000. given by the SUBSCRIBERS to Mr PITT'S STATUE, for the purpose of founding the Pitt Scholarship, and which has since been augmented by a donation of £500. from the Pitt Club in London, shall be placed in the public funds, until the Syndics shall be able to vest it in land; and the clear annual income arising from it shall be paid to the Pitt Scholar.

2.—The Vice-Chancellor or his deputy, the Public Orator, the Greek Professor, and two members of the Senate, to be appointed by the different colleges in their turn, shall be the electors. Two colleges, according to the cycle of Proctors commencing with the year 1817, shall respectively nominate an elector. But if the Vice-Chancellor, the Public Orator, and the Greek Professor, or any two of them, be members of the same college, no elector in that case shall be appointed by the college according to the cycle of Proctors, but the appointment shall be made by the University. Or if the Public Orator or the Greek Professor shall be prevented by illness or otherwise from attending the examination, or if the colleges shall have neglected to signify to the Vice-Chancellor the appointment of the electors according to their respective turns, then deputies shall be appointed by *Grace*.

3.—The first examination commenced on Monday, January 17, 1814; and the Vice-Chancellor or his deputy, the Public Orator, and the Greek Professor, shall, in future, on or before the 1st day of December after every vacancy, cause a writing, under their hands, declaring the said vacancy and the time of examination, to be affixed to the door of the Public Schools; and they shall notify the same to the two colleges which are to nominate the electors, and the Heads of those colleges, or their deputies, shall, within one week after such notices, signify to the Vice-Chancellor the names of the electors so appointed.

4.—The examination, which shall be solely classical, shall always take place during the week of the public examinations in the Senate-House, previous to the Bachelors' Commencement, and the Scholar elected shall receive all the dividends or rents that shall have become due subsequent to the last vacancy.

5.—Any undergraduate, of whatever rank, may be a candidate for the Pitt Scholarship, provided he be not of more than three years standing from the time of his first residence; but he shall, on or before the 31st day of December preceding the examination, signify, in a Latin epistle to each of the electors, his intention of becoming a candidate, and in case he shall omit sending such an epistle, he shall be considered as incapable of being elected at that time.

6.—The Pitt Scholar shall not hold any other University Scholarship.

7.—Every Scholar shall, during the time of his holding this Scholarship, reside the major part of each term; and if he shall not have kept such residence, he shall vacate his Scholarship, unless he has been prevented by illness or any other cause which shall be approved of by the Vice-Chancellor, the Public Orator, and the Greek Professor.

8.—Every Scholar who shall obtain any ecclesiastical benefice or preferment, or shall be of Master of Arts standing, shall vacate his Scholarship.

## TYRWHITT'S HEBREW SCHOLARSHIPS.

THE REV. ROBERT TYRWHITT, M.A. late Fellow of Jesus college, who died in 1817, by his Will bequeathed £4000. Navy 5 per cents., for the promotion and encouragement of Hebrew

learning, the mode and disposition of this bequest to be left to the University.

The Senate in 1818 decreed the foundation of three Scholarships, which decree was revised in 1826, and the number increased to six; this was again revised in 1830, when the following Regulations passed the Senate:

DECREE OF THE SENATE, *April* 28, 1830.

1.—THAT there shall in future be six Scholarships, called Tyrwhitt's Hebrew Scholarships.

2.—That the candidates for these Scholarships shall be Bachelors of Arts, who are not of sufficient standing to be created Masters of Arts, and Students in Civil Law or Medicine, of not less than four or more than seven years standing, who shall be required, before they are admitted to become candidates, to produce certificates from their respective Professors, that they have kept the exercises necessary for the degree of Bachelor of Law or Physic.

3.—That out of the net annual proceeds of Mr Tyrwhitt's Benefaction the sum of £150. be divided among the six Scholars, in the proportions herein after specified.

4.—That the electors to these Scholarships shall be the Vice-Chancellor, the Regius Professor of Hebrew, the Professor of Arabic, and two Members of the Senate, to be nominated by the different colleges, according to the cycle of Proctors.

5.—That if the Regius Professor of Hebrew, or the Professor of Arabic, or both of them, shall decline or be prevented from examining, a deputy or deputies shall be appointed by a Grace of the Senate.

6.—That if it shall happen at any time, that two of the offices severally constituting electors are united in the same person, the deputy for the elector in respect of one of the said offices shall be the Lord Almoner's Reader in Arabic; but if in any case the Lord Almoner's Reader shall decline the office of deputy examiner, or shall be prevented from undertaking the said office, a deputy examiner shall be appointed in his place by a Grace of the Senate.

7.—That if the Vice-Chancellor, the Regius Professor of Hebrew, the Professor of Arabic, or any two of them shall be members of the same college, no elector shall in that case be appointed by that college according to the cycle of Proctors; but the appointment shall be made by Grace of the Senate.

8.—That the appointment, when requisite, of an examiner or examiners by Grace of the Senate take place at the first Con-

gregation in the Lent Term of the year, and that the examiner or examiners so appointed continue in office until the first Congregation in Lent Term in the following year.

9.—That two Scholars be elected annually in the month of May, in this and each succeeding year, to be denominated Tyrwhitt's Hebrew Scholars of the First Class; and that the first in the order of merit of these two, receive an annual stipend of £30., and the second an annual stipend of £20., for three years from the time of election. That in case of equality of merit, the stipends be £25. to each Scholar: and in case only one Candidate appears of sufficient merit to entitle him to be a Scholar of the First Class, the examiners shall have power to elect the second Candidate in the order of merit Scholar of the Second Class; and in that case also the stipends shall be £30. and £20. respectively.

10.—That should it appear in any case to the majority of the electors that no one of the candidates is deserving of a Scholarship of the first class, it shall be competent for them to elect one of the second class only.

11.—In case of a deficiency of Candidates for the two Scholarships in any one year, the electors shall have power to elect additional Scholars according to the above Regulations in the second or third succeeding year; after which the stipends belonging to such Scholarships not filled up shall be appropriated in the manner appointed in the next Regulation.

12.—The residue of the net annual proceeds of Mr Tyrwhitt's benefaction, not already disposed of by the third Regulation, together with all accumulations which may arise under the eleventh Regulation, shall form a fund to be employed in the following manner: viz. That a premium of not less than £50. be given, as often as this fund will allow, for such a *Latin* Dissertation, upon some subject connected with Hebrew Literature, as may be agreed upon by the Electors, or the majority of them.

13.—That the subject of such Dissertation be published on or before the first day of February, and that the Dissertations be sent to the Vice-Chancellor, in the usual manner, on or before the first day of December in the same year.

14.—All persons qualified according to the second Regulation, and all of higher Degree, shall be qualified to become Candidates for the above Premium.

15.—That the Examiners, if they think it expedient, be empowered to print any Prize Dissertation at the expense of this fund; and that all Prize Dissertations not printed under their direction, be deposited in the Public Library.

16.—That the Accounts of this Bequest be kept distinct from the general Accounts of the University, and be annually audited by the Electors in Michaelmas Term before the first of November; and being so audited, shall be laid on the Registry's Table in the Senate-House at the next Congregation, for the inspection of the Senate.

17.—That these Regulations shall be in force until the first Congregation in Lent Term, 1836.

## CROSSE SCHOLARSHIPS.

THE REV. JOHN CROSSE, late Vicar of Bradford in Yorkshire, left to George Buxton Browne, Esq. in trust the sum of £2000. free of legacy duty, for the purpose of founding three Theological Scholarships, “for promoting the cause of true Religion,”—to be under the following Regulations: which were confirmed by a Grace of the SENATE, *Dec. 4, 1832.*

- 1.—That they be called “The CROSSE SCHOLARSHIPS.”
- 2.—That the Candidates for the same be Bachelors of Arts in the first year from their degree; and that such Scholarships be tenable till the Scholars attain the standing of Masters of Arts, viz. for three years.
- 3.—That the first Elections be so arranged as to make one of them vacant yearly for ever; and for this purpose, that at the first Election the persons elected be a Junior, a Middle, and a Senior Bachelor.
- 4.—That the annual Examination and Election take place in the Michaelmas Term after the division of the said Term.
- 5.—That in case of any vacancy of a Scholarship before the person is of Master of Arts standing, that at the next annual Election a Bachelor of Arts of the same year with the Scholar so vacating be elected into his room.
- 6.—That the sum of £2000. proposed to be transferred to the University be vested in Government Securities, in the name of The Chancellor, Masters and Scholars, the annual interest arising from the same to be divided equally among the three Scholars.
- 7.—The Electors to be The Vice-Chancellor, the Margaret Professor of Divinity, the Regius Professor of Divinity, the Regius Professor of Hebrew, the Regius Professor of Greek, the Norrisian Professor of Divinity, and the Professor of Arabic.
- 8.—The Examination to turn upon a knowledge of the Holy Scriptures in their Original Tongues, Hebrew and Greek, of Ecclesiastical History, of the earlier and later Heresies, and such other subjects of useful enquiry, as may be thought most likely to assist in the formation of valuable Characters, fitted to sustain and adorn “the Cause of true Religion.”

## LUMLEY EXHIBITIONS.

THE Right Honourable ELIZABETH, Viscountess LUMLEY, by a deed bearing date October 8, 1657, directed certain Trustees therein named, to pay and allow yearly to *ten* poor Scholars of the Universities of Oxford and Cambridge, educated in the School founded by her at *Thornton*, in the county of York, or in default of such, to any other poor Scholars, not exceeding *ten* in number (subsequently reduced to *five*), who should be nominated thereto by the respective Convocations of the said Universities for the time being; the sum of £4. a year each to be continued until they should have time to become graduates in one of the said Universities.

By an Order of the Court of Chancery, issued in the year 1820, it was directed that, in consequence of the increased rents these five Exhibitions should in future be £15. per annum each, and that the rents not called for should accumulate.

## REGULATIONS

RESPECTING

## THE UNIVERSITY SCHOLARSHIPS.

[*Confirmed by a Grace of the SENATE, 1817.*]

ON the last Saturday in November in every year, there shall be a meeting at the Vice-Chancellor's of the electors to the Craven's and Davies's Scholarships, and of the *permanent* electors to the Pitt Scholarship, to consider whether any one and which of those Scholarships shall be then declared vacant; and the examination for such vacant Scholarship shall commence in the last week of January following.

At this meeting, of the Scholarships which shall have become *voidable* by non-residence, that shall be declared *vacant* which has been held for the longest time; provided that no one Scholarship shall have become *necessarily* void before the day of this meeting, in which case no other shall be declared vacant for that year.

When it is decided at this meeting which of the Scholarships is to be declared vacant, the rules pointed out by the founder for notice, examination, and election (where any such rules are particularly prescribed by the founder) will be pursued, so as to bring on the examination in the last week of January. Where

no such regulations have been prescribed by the founder, the notice of the vacancy is to be affixed to the door of the Public Schools, on or before the 1st of December; and the candidates are to deliver their Latin Epistles to each of the examiners, on or before the 31st of December, as in the case of the Pitt Scholarship; and all prior regulations made by the University, inconsistent with these, are hereby repealed.

With respect to non-residence, it is to be understood that the holders of the Craven, Davies's, and Pitt Scholarships shall, generally speaking, have such leave of absence, as will enable them to retain their Scholarships until the holder becomes senior Scholar, according to the above regulations.

But in case of any instance of non-residence in the University, for one whole term, before the Bachelor's degree, the electors, at their meeting, shall have the power of declaring vacant the Scholarship of the person so non-resident in preference to that of the senior Scholar: if it appear to them that such non-residence is without sufficient excuse.

## UNIVERSITY AND COLLEGE PRIZES.

THE prizes for the encouragement of literature, free and open competition for the whole University, amount to upwards of £1,300., three-fourths of which are given for Classics and English Composition, the remainder for Mathematics.

The amount of the annual prizes in the different colleges is about £600., two-thirds of which are given for the encouragement of Classical Literature.

## WHITEHALL PREACHERS.

THE Whitehall Preacherships were established by GEORGE I. in the year 1724. The preachers are 24 in number, twelve from each University. They must be Fellows of colleges during the whole time they hold the office, to which they are appointed by the Bishop of London, as Dean of his Majesty's Chapel.

## PATRONAGE

### IN THE GIFT OF THE UNIVERSITY.

WHEN a benefice becomes vacant, the senior Proctor declares the vacancy, and a candidate is chosen by the Senate.

In regard to the vicarage of Burwell, the University, within four months after a vacancy, names two candidates, and the Earl of Guilford presents one of them to the Bishop of Norwich.

## EXHIBITIONS,

IN THE GIFT OF THE COMPANIES IN LONDON,

*For Students in this University.*

BOWYERS', three, £10. per annum each, requiring residence according to the Statutes of the University, tenable for seven years, but vacated earlier on receiving any preferment.

CARPENTERS', one, £4. per annum, not confined to any college, and tenable for three years.

CLOTHWORKERS', two, £10. per annum each, open; and one, £5. to St Peter's, tenable till M.A.

CORDWAINERS', two or three, £10. per annum each, tenable till M.A.

CUTLERS', one, £3. 6s. 8d. to St John's: one, £6. 13s. 4d. open, and tenable till M.A.

FISHMONGERS', twelve, £20. per annum each, for either University, and tenable till M.A. They have also one of £6. or £8. per annum, and confined to Sidney College, and two others, one of which is confined to St John's.

GOLDSMITHS', one, £5. per annum, tenable seven years.

GROCERS', four or five, £5. per annum each, tenable till B.A.

HABERDASHERS', three, £6. 13s. 4d. to Trinity; two, £10. open; two, £12. to Sidney; and two, £12. to Emmanuel.

IRONMONGERS', four or five, £5. per annum, tenable till B.A. There is also one in the gift of this company, tenable as the preceding, and confined to Corpus Christi college.

LEATHER-SELLERS', seven, four of £16. and three of £8. per annum, for either University, tenable for four years.

MERCERS', four, £24. per annum each, four, £20. and two, £6. tenable till M.A. Also three, of £12. annually, to poor scholars on commencing M.A.

MERCHANT TAYLORS', one, £9. 12s. per annum.

SALTERS', two, £5. to St John's.

SKINNERS', two, £15. and one £5. tenable till M.A.

Independent of the before-mentioned, some other public bodies have exhibitions in their disposal. The Corporation of the Sons of the Clergy, in Bloomsbury Place, Holborn; and the Trustees of Mr Cholmondeley's Charities, allow exhibitions to the Universities for the Sons and Orphans of poor Clergymen. Applications for these latter must be made to the Secretary of the Almonry-Office, Whitehall. Bread Street Ward has the disposal of Lane's Exhibition of £5. per annum to a freeman's son, born in the city of London. The parish of St Sepulchre has two exhibitions for either University, one of

£5. the other of £4. per annum each, tenable for five years. These exhibitions are in the gift of the vestry, and preference is given to a parishioner.

Respecting the Fishmongers' Company, as before stated, each Member of the Court of Assistants in his turn nominates a candidate, whom all the others elect. All the other exhibitions are disposed of by the Court of Assistants of the respective companies; those excepted which are in the gift of the Mercers', and confined to Cambridge; of them the whole Livery has the disposal.

## TRIPOSES.

OR,

*LISTS of those who have obtained HONORS on commencing BACHELORS of ARTS; with the names of the MODERATORS of the respective years.*

ON the Tripos papers originally published, the names of the Honors, till the year 1755, seldom appeared; and in the Registry's book, where all degrees, in the order of seniority, are inserted, no mark of distinction was ever observed, previous to that time, between the Wranglers and Senior Optimes.—As it was formerly the custom for the Vice-Chancellor and Proctors to confer Honorary Senior Optimes, a mark of distinction not then unfrequently conferred upon Wranglers, the regular order of previous years cannot be precisely ascertained, especially as these Honorary degrees were placed *ad libitum*. The years 1752 and 1753 are copies from the Registry's book of Entry. The year 1754 was arranged according to the wrangling paper. The custom of conferring Honorary Senior Optimes has for some years past been abolished.

The Chancellor's Medals were first instituted in 1752; (A) denotes senior, (B) junior.

Dr Smith's Mathematical Prizes were founded in 1769; (1) denotes senior, (2) junior.

The *Classical* Tripos was instituted in 1824;  $\alpha$  affixed to a name in the *Mathematical* Tripos denotes that the person was in the first class of the Classical Tripos,  $\beta$  in second,  $\gamma$  in the third.

The \* designates late or present Fellows.

## TERMS AND EXERCISES,

*Required by the Statutes for the several Degrees.*

A Bachelor of Arts must reside the greater part of twelve several terms, the first and last excepted. The statutable exercises before admission *ad Respondendum Quæstioni*, are two acts and two opponencies; these in part, are sometimes dispensed with, and kept by what is termed huddling. In order to take this degree at the regular time, the person must be admitted of some college before the end of the Easter Term of the year in which he purposes to come into residence. The mode of admission is, either, by a personal examination before the Tutor and some of the college officers, or, which is more usual, by sending to the Tutor a recommendatory certificate, signed by some Master of Arts of this University, stating the name, age, qualifications, &c. &c. of the candidate, and transmitting with it the usual caution-money. If this certificate be considered satisfactory, the admission takes place, and the person's name is immediately entered on the boards which are suspended in the butteries of the several colleges. The person thus admitted, usually comes into residence about the 20th of October following, and then commences his academical career.

A Master of Arts\* must be B.A. of three years' standing, which time is reckoned from the second Tripos Day following his admission *ad Respondendum Quæstioni*.

A Bachelor in Divinity must be M.A. of seven years' standing. His exercises is one act, (after the 4th year), two opponencies, a *clorum*, and an English sermon.

A Bachelor in Divinity (Ten year man). These are allowed by the 9th statute of Queen Elizabeth, which permits persons who are admitted of any college, being 24 years of age and upwards, to take the degree of B.D. at the end of 10 years, without having taken any other. During the last two years they must reside the greater part of three several terms.—Exercises the same as required for other Bachelors in Divinity. They are also examined, by the Regius Professor, in the Scriptures, the Evidences and Doctrines of Christianity, and the writings of some Greek or Latin Fathers.

\* A Bachelor of Arts who intends to take the degree of M.A. is not required to keep his name on the boards during the interval between each degree: he loses his vote unless he purposes becoming a Member of the Senate. An entry of his name a few days before admission is sufficient.

A Doctor in Divinity must be a Bachelor in Divinity of five, or a \*Master of Arts of twelve years' standing. The exercises are one act, two opponencies, a clerum, an English sermon, and a determination.

A Bachelor in the Civil Law, must be of six years' standing complete, and must reside the greater part of nine several terms. The exercise is one act. A Bachelor of Arts of four years' standing may be admitted to this degree.

A Doctor in the Civil Law must be of five years' standing from the degree of B.C.L. or a Master of Arts of seven years' standing. The exercises are two acts and one opponency.

A Bachelor in Physic must reside the greater part of nine several terms, and may be admitted any time in his sixth year. The exercise is one act and one opponency.

A Doctor in Physic is bound to the same regulations as a D.C.L.

A Licentiate in Physic is required to be M.A. or M.B. of one term's standing after he has been admitted M.B. No exercise, but examination by the Professor and another Doctor in the faculty.

A Bachelor in Music must enter his name in some college, and compose and perform a solemn piece of music, as an exercise, before the University.

A Doctor in Music is generally Mus. B. and his exercise is the same.

*Degrees of NOBLEMEN, and of those who proceed to their Degrees 'tanquam Nobiles.'*

By an interpretation, made May 31, 1786, it was determined that the following persons are entitled to Honorary Degrees: viz.

1. Privy Counsellors.
2. Bishops.
3. Noblemen:—Dukes, Marquisses, Earls, Viscounts, Barons.

\* When a Master of Arts takes a Doctor's degree in any of the three faculties, he is said to graduate *per Saltum*, though properly the phrase belongs only to the degree of D.D.

4. Sons of Noblemen.
5. Persons related to the King's Majesty by consanguinity or affinity; provided they be also Honourable.
6. The eldest sons of such persons.
7. Baronets, }
8. Knights, } to the degree of M.A. only.

By a Grace of the Senate, passed March 18, 1825, all the above persons (before they are admitted to any degree) are to be examined and approved of, in the same manner as others who are admitted *ad Respondendum Quæstioni*; but they have the privilege of being examined after they have kept *nine* Terms, the first and last excepted. They are then entitled to the degree of Master of Arts.

Though no person can claim a degree in right of Nobility, who has not previously undergone the usual examination, yet the University sometimes confers degrees, without either examination or residence, on such individuals of mature age, as are illustrious, not on account of their birth only, but also for the services they have rendered to the State, or to Literature.

No person taking a degree in right of Nobility, is entitled to a vote, unless he shall previously have resided three Terms.

## COMPOUNDERS.

EVERY person, who is admitted to any degree, must, if he be a Compounder, pay over and above the usual fees, the sum of £8. 6s. 4d.

All persons are reputed and reckoned Compounders, who, before admission to their degree, have presentation to, collation, institution, induction, or any manner of possession of, any Living or Livings Ecclesiastical, of what kind soever, which are rated (even though discharged) to the yearly value of £26. 13s. 4d. in the King's Books.

Endowed Chapels, or other Ecclesiastical preferment not in the King's Books, are rated according to their real value.

Also any estate, annuity, or certain income for life, by whatever tenure possessed, (except University, or College income) whether in the person's own right, that of his wife,

or any other person, if of the annual amount of £26. 13s. 4d. makes a Compounder.

Ten-year men B.D., and persons taking a degree *per saltum*, if Compounders, pay the Composition money for the degree, or degrees, passed over, as well as for that taken.

*N.B.* Every person, before admission to his degree, makes oath that he has not omitted to *pay* any of the fees required of him by the Statutes of the University.

### CAUTIONS FOR EXERCISES.

THE University Statutes require certain Exercises (as appears under the head Terms and Exercises) to be performed for the several degrees, which are sometimes granted to *non-gremials* with the omission of part, or of the whole, but with this condition, that they shall be performed within the following Term. The party deposits, as a pledge, the under-mentioned sums with the Vice-Chancellor, which, on non-performance of the exercises, are forfeited to the University Chest:

THE METHOD OF PROCEEDING TO THE DEGREE  
OF  
BACHELOR OF ARTS.

STUDIES AND EXERCISES.

THE ordinary course of study preparatory to the degree of B.A. may be considered under the three heads of Natural Philosophy, Theology and Moral Philosophy, and the Belles Lettres. On these subjects, independently of the *public* Lectures which are delivered by the several Professors in the University, the Students attend the Lectures of the Tutors of their respective colleges; and the instructions comprehended in the three general heads above named may be thus stated. In the *first*, Euclid's Elements, the Principles of Algebra, Plane and Spherical Trigonometry, Conic Sections, Mechanics, Hydrostatics, Optics, Astronomy, Fluxions, Newton's Principia, Increments, &c. &c. In the *second*, Beausobre's Introduction, Doddridge's and Paley's Evidences, the Greek Testament, Butler's Analogy, Paley's Moral Philosophy, Locke's Essay, and Duncan's Logic. In the *third*, the most celebrated Greek and Latin Classics.

Besides a constant attendance on lectures, the Undergraduates are examined in their respective colleges yearly, or half-yearly, in those subjects which have engaged their studies; and, according to the manner in which they acquit themselves in these examinations, their names are arranged in classes, and those who obtain the honour of a place in the first class receive, according to merit, prizes of books of different value.

By this mode of procedure the Students are prepared for those *public* Examinations and Exercises which the University requires of all candidates for degrees. The first, viz., the Previous Examination, takes place in the Lent Term of the second year from that in which a student commences his academical residence, according to the following plan, confirmed by Grace of the Senate, Oct. 29, 1829.

*Plan of the PREVIOUS EXAMINATION.*

1. THAT the Previous Examination of the Junior Sophs in the Senate-House shall begin on the Monday in the week before the end of the Lent Term in each year; and that this examination shall continue throughout that week (with the exception

of Friday) and during the Monday, Tuesday, Wednesday, and Thursday of the week following.

2. That the subjects of examination shall be one of the four Gospels or the Acts of the Apostles in the original Greek, Paley's Evidences of Christianity, one of the Greek and one of the Latin Classics.

3. That the appointment of the particular subject in the New Testament, and in regard to the two last-mentioned subjects, the appointment both of the authors and of the portions of their works which it may be expedient to select, shall rest with the Vice-Chancellor for the time being, the three Regii Professors of Divinity, Civil Law, and Physic, the Regius Professor of Greek, and the Public Orator (provided that not more than two of them are members of the same college); upon this clear understanding, that in the exercise of the powers thus to be vested in them they shall so limit the examination, that every one who is to be examined may be reasonably expected to shew a competent knowledge of *all* the subjects.

4. That in case three or more of those to whom the appointment of the subjects of examination has been assigned shall belong to the same college, deputies for any number exceeding two shall be appointed, every year, by a Grace of the Senate.

5. That every person when examined, shall be required: (1) to translate some portion of each of the subjects appointed as aforesaid; (2) to construe and explain passages of the same; and (3) to answer printed questions relating to the Evidences of Christianity.

6. That previously to the commencement of the examination, the Examiners shall prepare an alphabetical list of all the persons to be examined, and divide them into equal portions according to the number of days of examination; and that they shall send a copy of such list to the Prælector of each college, notifying the day on which each of the persons to be examined belonging to that college shall be required to attend the examination.

7. That each of the persons to be examined shall be required to attend from eight o'clock till eleven in the morning, and from twelve o'clock till three in the afternoon on the day of which he has previously received notice.

8. That the persons to be examined each day shall be formed into two divisions; that each of these divisions shall be examined in the Greek subject by two of the Examiners, and in the Latin subject by the other two during the morning; and that the Greek Testament, and Paley's Evidences shall be the subjects of examination in the afternoon.

9. That the persons under examination, shall be employed in translating the passages or answering the printed questions proposed, each individual being called upon in turn during the time of examination to construe and explain passages of the appointed subjects.

10. That in general the examination of each individual shall be concluded in one day, and that the result of each day's examination shall be notified as soon as conveniently may be to the Prælector of each college: but if the Examiners shall judge it expedient to examine any person further in order to ascertain whether he shall be permitted to have a certificate of approval, they shall send notice of the day on which his further attendance will be required.

11. That every Undergraduate shall be required to attend the examination in the year next but one after that in which he commences his residence.

12. That in case any one shall be prevented by illness (a certificate of which shall be submitted to the Vice-Chancellor and Proctors for the time being, for their approbation,) from attending the regular examination of his year, he shall be required to attend the next following examination, and so on; and that, if any one shall absent himself upon any other account from the proper examination of his year, he shall not be allowed the term in which the examination takes place, and shall, moreover, be required to attend the examination of the next year, and so on.

13. That two classes (each of them arranged alphabetically) shall be formed out of those examined—the first consisting of those who have passed their examination with credit—and the second, of those to whom the Examiners have *only not refused* their certificate of *approval*.

14. That those who shall not be *approved* by the Examiners, shall be required to attend the examination of the following year, and so on; and that no degree of B.A., M.B., or B.C.L., shall be granted, unless a certificate be presented to the Caput, shewing that the candidate for such degree has passed, to the satisfaction of the Examiners, some one of these examinations.

15. That public notice of the subjects of examination in each year shall be issued in the first week of the Lent Term of the year preceding.

16. That in every year, at the first Congregation after the 10th day of October, the Senate shall elect four Examiners (who shall be members of the Senate, and appointed by the several colleges according to the cycle of Proctors and Taxors,) to conduct the examination of the succeeding year.

17. That each of the Examiners shall receive £20. from the University chest.

18. That the foregoing regulations shall not interfere with the composition between the University and King's college.

The Student having passed this preparatory step, has next to perform the usual exercises required by the Statutes for the degree which he has in view.

In the beginning of the month of January, one of the Proctors' servants goes round to every college in the University, (King's college excepted) and requires of the tutors a list of the students (denominated Sophs) who, in the subsequent January, intend to offer themselves candidates for the degree of Bachelor of Arts. The names being thus collected, are delivered to the Moderators.

Upon the second Monday in Lent Term, the Moderator whose turn it is to preside, gives written notice to one of the students in his list to appear in the schools to keep an act on that day fortnight. The notice (delivered by a person styled the Moderators' man) is in the following form :

*Respondeat, A.B. Coll.———*  
*Martii 5, 18— C.D. Modr.*

This person, who is now called the Respondent or Act waits upon the Moderator soon after with three propositions or questions, the truth of which he is to maintain against the objections of any three students of the same year, whom the Moderator (from the reports prefixed to the names in his book) shall think proper to nominate, and who on this occasion are called Opponents.

The questions proposed by the Respondent are written upon four separate papers according to a form of which the following is a specimen :

Q.S.

*Recte statuit Newtonus in Septima sua sectione Libri primi.*  
*Iridis primariæ et secundariæ Phænomena solvi possunt ex*  
*principiis Opticis.*

*Recte statuit Lockius de Qualitatibus Corporum.*

———*Resp. Martii 5, 18—*  
*Coll.——— .*

The first question is in general taken from the Principia of Newton, the second from some other writer on Mathematics and Natural Philosophy; the third is called the moral question, and is generally taken from Locke, Paley, or Butler.

At the bottom of three of these papers, the Moderator writes the name of a student, whom he thinks capable of opposing the questions of the Respondent, with the words *Opponentium, primus, secundus, or tertius*, denoting the order in which the three opponents are to appear. One of these papers is sent to each opponent.

When one Moderator has thus given out the exercises for a week, or five acts (exercises being held for five days in a week during term), the other proceeds according to the same method for the following week.

The fortnight of preparation being expired, the Respondent enters the Schools at one o'clock; the Moderator, attended by one of the Proctors' servants, appears at the same time, and, ascending the chair, says, "*Ascendat Dominus Respondens.*"

The Respondent mounts the rostrum, and reads a Latin dissertation, called a thesis, upon any one of the three questions he thinks proper; generally upon the third or moral question. As soon as the Respondent has finished his thesis, the Moderator calls upon the first opponent to appear. ("*Ascendat Opponentium primus.*") He immediately ascends a rostrum opposite to the Respondent, and opposes his arguments against the questions in syllogistic form.

Eight arguments, each consisting of three or four syllogisms, are brought by the first, five by the second, and three by the third opponent.

The opponent is dismissed by the Moderator with such a compliment as he deserves; and after the other two opponents have performed their parts, the exercise closes with the dismissal of the Respondent in a similar manner.

The distinguished men of the year appear eight times in this manner in the Schools, twice as acts and six times as opponents; that is, twice in each character of opponent. One act and three opponencies are kept before the Commencement, and one act and three opponencies are kept during the Michaelmas Term.

In order to check the practice of Degradation, which has, of late years, been so frequent, a Syndicate was appointed to take the same into consideration, and they have made the following Report, which was confirmed by Grace of the Senate, Feb. 27, 1829.

Conceiving the Practice of *Degradation without any limitation* to be liable to abuse, they recommend to the Senate the adoption of the following Regulations:

1. That from and after the tenth day of October, 1830, no person who has degraded, be permitted to become a Candidate

for University Scholarships or any other Academical Honors during his Undergraduateship, or for Honors in the Mathematical Tripos, unless he shall previously have obtained special permission for so doing, from a Syndicate hereafter to be appointed for that purpose.

2. That the Syndicate do consist of the Vice-Chancellor, the Public Orator, the Greek Professor, and the two Moderators for the time being, who shall be invested with full power to examine into the cases of applicants for permission to become candidates for Honors after they have degraded, and to grant or withhold such permission, as they may think proper.

3. That this Syndicate do meet on a certain day in October in each year, of which notice is to be given by the Vice-Chancellor, for the purpose of taking into consideration the cases of applicants; and that all applications be made in writing by the Tutor of the person or persons making such application, accompanied with certificates of ill health, or such other certificates as he may consider necessary.

The following Report of a Syndicate, appointed to consider of what standing candidates for the degree of B.A. ought to be before they are allowed to be examined for that degree, and also to consider for what period after examination the certificate of approval signed by the Examiners shall remain in force—was confirmed by Grace of the Senate, May 8, 1833 :

1. The Syndics recommend to the Senate that hereafter no person should be admitted before Ash-Wednesday in the Lent Term of each year, *ad respondendum quæstioni*, who shall not have been publicly examined at the usual time of examination in the month of *January* of that year, and produce a certificate from the Examiners of examination and approval; except those who in consequence of ill health may by the permission of the Examiners, have absented themselves from such examination.

2. That no person be admitted to examination for the degree of B.A. until he has entered into his eleventh term, he having previously kept nine terms exclusive of the term in which he was admitted, and that no certificate of approval, in the case of a person so examined in his eleventh term, shall be valid, unless it shall appear when such person applies for his admission *ad respondendum quæstioni*, that he has kept the said eleventh term.

These regulations shall not apply to those persons whose names shall appear in the List of Honors at the examination in *January* 1834.

## SENATE-HOUSE EXAMINATION.

IN consequence of the great increase in the number of Students in the University, this Examination which hitherto occupied *five*, is now extended to *eight* days. The Moderators having formed the Questionists (this being the appellation of the Students during the last six weeks of preparation) into alphabetical classes, according to their performance in the Schools, the first four are exhibited at Messrs Deightons' shop, previously to the Examination Day.

On the *Thursday* morning preceding the first Monday in the Lent Term, the Candidates for Honors enter the Schools a little before nine o'clock; the other Questionists enter the Senate-House on the following morning at the same hour, preceded by a Master of Arts, who, on this occasion, is styled the Father of the college to which he belongs. The classes to be examined are called out, and proceed to their appointed tables.

The examinations of those who contend for *HONORS* then commences, according to the following NEW REGULATIONS.

*Report of the Syndicate appointed to consider "Whether any and what Alterations can be made with advantage in the mode of Examination of Candidates for Mathematical Honors."*

[Confirmed by a Grace of the Senate, April 6, 1832.]

It appears desirable to increase the duration of the Examination.

There are at present four days of Examination in Mathematics; on each of the two former the Examination occupies  $7\frac{1}{2}$  hours, whilst on each of the two latter it occupies only 4 hours. It is recommended that in future there be five days of Examination in Mathematics, commencing on the Thursday preceding the first Monday in Lent Term; and that the time of Examination each day be  $5\frac{1}{2}$  hours.

By this arrangement  $4\frac{1}{2}$  hours will be added to the whole time of Examination; and it is recommended that four of these additional hours be appropriated to the answering of questions from books, and the remaining half hour to the solution of problems, according to the Plan subjoined.

It is further recommended that the Candidates be arranged in four Classes, determined, as at present, by the public Exercise in the Schools; but that during the first four days of the Examination the same questions be proposed to all the Classes.

That, as at present, the Examination on the first day extend only to such parts of pure Mathematics and Natural Philosophy as do not require the methods of the Differential Calculus.

That on the second and third days, the questions from books include, in addition to the above subjects, the parts of Natural Philosophy somewhat more advanced, and the simpler applications of the Calculus.

That on the fourth day, the Examination extend to subjects of greater difficulty, care however being taken that there be some questions suitable for the lower Classes.

That on the fifth day, the Classes be arranged for Examination according to the Plan subjoined.

That the questions proposed to all the Classes on this day be fixed upon by the Moderators and Examiners in common; but that the duty of examining the answers to these questions be apportioned amongst the Moderators and Examiners, according to the Plan.

That, as recommended by a former Syndicate, "there be not contained in any paper more questions than Students well prepared have been generally found able to answer within the time allowed for that paper."

That the result of the Examination be published in the Senate-House on the morning of the following Friday at eight o'clock: but if it should happen that the relative merits of any of the Candidates are not then determined to the satisfaction of the Moderators and Examiners, that such Candidates be re-examined on that day.

That this mode of Examination commence in January 1833.

A Grace passed the Senate, December 3d, 1834, proposing that in future, the Examination of the Candidates for Mathematical Honors shall commence on the Wednesday (instead of the Thursday) preceding the first Monday in the Lent Term: and that the days and plan of the examination shall be as follows:

On two pillars at the entrance of the Senate-House are hung the classes, and a paper denoting the hours of examination, of which the following is a copy:

- 1

- Examiner.**

- CONFIDENTIAL

- Examiner.**

- tors.

**N.B.** The effect of this alteration will be, not to extend the Hours, or change the order of the Examination, but solely to afford the Moderators and Examiners an additional Day, for examining the Answers given to their Questions.

THE Examination of the other Questionists, viz. the Fifth and Sixth Classes, who are *not candidates for Honors*, takes place according to the following plan, confirmed by Grace of the Senate, *May 21, 1828*.

“The Syndicate appointed to ‘consider whether any, and what alterations may be made with advantage in the Examination for the degree of B.A.’ have made the following Report to the Senate, with reference to the final examination of the Questionists, *not candidates for Honors* :

*It appears to them expedient,*

That of the six Examiners, two confine themselves to the Mathematical subjects, two to Homer and Virgil, and two to Paley’s Evidences, Paley’s Moral Philosophy, and Locke’s Essay on the Human Understanding.

That on the Monday previous to the commencement of the examination, the Examiners publish the names of the candidates arranged in alphabetical order, and separated into two equal divisions.

That these divisions be examined at separate times.

That the distribution of the subjects and times of examination be according to the following Table.

	Div.	9 to 12.	Div.	12½ to 3½.
Friday.....	1	Homer .....	2	Paley’s Evidences.
Saturday....	2	Euclid .....	1	Virgil.
Monday.....	1	Euclid .....	2	Paley’s Philos. and Locke.
Tuesday .....	2	Homer .....	1	Paley’s Evidences.
Wednesday .	1	Arith. and Alg.	2	Virgil.
Thursday ...	2	Arith. and Alg.	1	Paley’s Philos. and Locke.

That the examination be conducted entirely by printed papers.

That each of the Euclid papers contains twelve propositions, selected from the first four Books, with additional questions apart from the former, in the fifth, sixth, and eleventh Books, and in Trigonometry, at the discretion of the Examiners.

That each paper in Arithmetic and Algebra consist of questions entirely elementary; to which may be annexed Questions in the elementary parts of Natural Philosophy, at the discretion of the Examiners.

That the papers in Homer and Virgil, consist of passages to be translated, which may be accompanied with such plain questions in Grammar, History, and Geography, as arise immediately out of those passages\*.

That the Examiners be strictly enjoined to take care, that the number of questions to be answered, and the length of the passages to be translated, in any one paper, do not exceed what a person well prepared may be expected to answer and translate in the time allowed.

That the Pro-Proctors attend in the Senate-House during the examinations.

That two of the Examiners be present during each portion of the examination."

## EXAMINATION ON THURSDAY.

THE hours of attendance are the same this day as on the former. The examination of the first four classes is on this day confined solely to logic, moral philosophy, and subjects relating to natural and revealed religion.

The examinations conclude at the usual time; but the fatigue of the Examiners is by no means diminished; for during the whole of this, as on the preceding nights, they have a multitude of papers to inspect, and to affix to each its degree of merit; according to which a new arrangement of the classes is made out, called the Brackets.

## EXAMINATION ON FRIDAY.

ON Friday the examinations are resumed. At eight o'clock the new classifications or brackets, which are arranged according to the order of merit, each containing the names of the candidates placed alphabetically, are hung upon the

\* The portions in Homer and Virgil required in this Examination, are the first six books of the *Iliad* and of the *Æneid*.

pillars. Thus in the examinations of the preceding days, should any have distinguished themselves above the rest, and be nearly equal, they are included in the same bracket. The next who prove nearly equal to each other, are included in the second bracket. The next who are found to be nearly on a level with one another, are included in the third bracket; and thus the whole number are bracketed. Each bracket is then called out for examination, and the situation of each individual is thus finally determined. At five o'clock the examinations are finished, when a select number, thirty at least, (*Stat. Acad.*) of those who have most distinguished themselves, are recommended to the Proctors for their approbation, and their names are set down according to merit, and classed in three divisions, *viz.* Wranglers, Senior Optimes, and Junior Optimes, which constitute the three orders of Honor. The *fifth* and *sixth* classes are also arranged numerically, according to merit.

Those who take the degree of Bachelor of Arts at any other time than this, are said to go out in *Bye-Term*, and are examined in a similar manner at the Moderators' rooms. Having passed the examination, they are arranged alphabetically in classes according to their supposed acquirements, either as *Baccalaurei ad Baptistam*, or *ad Diem Cinerum*, and are inserted in the *list of seniority among the οἱ πολλοί*.

## SATURDAY MORNING.

### *Admission of the Questionists.*

THIS morning there is a Congregation; the bell begins to ring at nine o'clock, and at ten the whole number of Candidates appear in the Senate-House. Two papers exhibiting a list of the Questionists arranged according to their merits, or seniority, are hung on the pillars for public inspection\*.

One of the Bedells calls up the Houses, and the Senior Moderator makes a Latin speech; the Vice-Chancellor sitting in the chair, and the Moderator standing on his left hand.

The Junior Proctor delivers to the Vice-Chancellor the list of Honors and Seniority, subscribed thus, "*Examinati et approbati a nobis*;" (*viz.* the Proctors, Moderators, and other Examiners.)

\* For the honors of the present year, see p. 158.

The Caput is then called for passing the supplicats of the Questionists\*.

The name of each college is written on every supplicat, which is signed by the Prælector or Father of the college.

A certificate is also given to the Caput, signed and sealed by the Master of the college (or his locum-tenens), shewing that each Questionist has kept his full number of terms; and if otherwise, the deficiency is mentioned in the supplicat, and a certificate explaining the cause is delivered to the Caput by the Father. He also delivers a certificate of his having passed *the Previous Examination*.

The Registrary shews to the Caput that every candidate has subscribed that he is *bona fide* a member of the Church of England.

If any Questionist have been prevented by *illness* from keeping all his terms, the certificate to be delivered to the Caput is to be in the following form:

*I hereby certify to the Senate and University of Cambridge, that Mr A. B., of ——— College, has been under my care from the ——— day of ——— till the ——— day of ———; and that during that time he could not with safety, on account of his health, return to Cambridge.*

*Witness my hand this ——— day of ———, 18—.*

C. D.

(Residence,)

(M.D. or Surgeon.)

The Vice-Chancellor reads the supplicats to the Caput, and on those that are admitted he writes *Ad*.

When they have been all read, one of the Bedells carries them into the Non-Regent House, to be read by the Scrutators; and if all are approved, the Scrutators walk, and the senior says *Omnes placent*. But if any are disapproved of, he says, *A.B. &c. non placent, reliqui placent*.

Those supplicats in which any cause is assigned for not keeping the whole number of terms are read separately; but those which are of the same kind are read together in the usual manner.

The supplicats are then carried into the Regent-House, where the Senior Proctor reads them in the same manner as the Scrutators did in the Non-Regent House. If all are approved of, the Proctors walk, and the Senior says, *Placent*

\* For a Student of King's College, who undergoes no examination for his Bachelor's degree, but claims it by a composition between the University and his college, no supplicat is offered. A Grace is shewn to the Vice-Chancellor, and read by the Senior Proctor in the Regent-House only.

*omnes ; placeat vobis ut intrent.* If any are disapproved of, he says as above.

The supplicats are then delivered to the Registry, who writes on them, *Lect. et concess. die — Jan. —*

In the mean time the candidates put on their hoods over their undergraduate gowns, and the School-keeper gives to each of them a printed copy of the oath he is to take at his admission.

The Vice-Chancellor takes the chair, and a Bedell having desired the respective Fathers to be in readiness with their Sons, he precedes the Father of the Senior Wrangler (the rest of the Fathers following with their Sons) to the Vice-Chancellor.

The Father, taking the Senior Wrangler by the right hand presents him in these words :

*Dignissime Domine, Domine Pro-Cancellarie et tota Universitas ; præsentō vobis hunc juvenem, quem scio, tam moribus quam doctrinâ, esse idoneum ad respondendum quæstioni, idque tibi fide meâ præsto, totique Academiæ.*

The Senior Wrangler then takes the oaths of allegiance and supremacy ; and the Senior Proctor (with his colleague standing by him) reads to him the following oath :

*Jurabis, quod nihil ex iis omnibus sciens volens prætermisisti, quæ per leges aut probatas consuetudines, hujus Academiæ ad hunc gradum quem ambis adipiscendum, aut peragenda aut persolvenda requiruntur ; nisi quatenus per gratiam ab Academiâ concessam tecum dispensatum fuerit. Jurabis etiam, quod Cancellario et Pro-Cancellario nostro comiter obtemperabis : et quod statuta nostra, ordinationes, et consuetudines approbatas observabis. Denique jurabis, quod compositionem inter Academiam et Collegium Regale fuctam sciens volens non violabis. In hæc autem verba jurabis, secundum tenorem Senatus-Consulti in cautelam jurantium facti.*

*Ita te Deus adjuvet, et sancta Dei Evangelia.*

He then kneels down before the Vice-Chancellor, who, taking his hands between his own, admit him in these words :

*Authoritate mihi commissâ, admitto te ad respondendum quæstioni : in nomine Patris, et Filii, et Spiritus Sancti. Amen.*

The Father of King's next presents his Sons : then the Questionists of Trinity and St John's are presented, and after them those of the other Colleges according to the seniority of the Fathers. Four or five are presented at once, the Father saying, *Præsentō vobis hos juvenes, quos, &c.*

As they are presented, they are directed by one of the Bedells to the south side of the Senate-House.

When all have been presented, the Senior Proctor administers to them (four or five at a time) the same oaths which have been taken by the Senior Wrangler, saying, *Eadem juramenta, quæ præstitit A.B., in suâ persona, vos quoque præstabitis, &c.*

When all have been sworn, they are admitted, by the Vice-Chancellor, in the order in which their names stand in the list signed by the Proctors and Examiners.

As the Questionists are admitted, they go to the Sophs' Schools, to answer the question which is asked them by the respective Fathers.

When the admissions are concluded, the Vice-Chancellor dissolves the Congregation.

In addition to the Examination thus described, it is also necessary to insert the following Plan of Examination, confirmed by Graces of the Senate, May 28, 1822, and March 18, 1826 :

*Plan of Classical Examination after Admission  
ad Respondendum Quæstioni.*

1. On the fourth Monday after the general Admission *ad Respondendum Quæstioni* in January 1824, and every subsequent year, shall commence an Examination in classical learning of such persons as shall *voluntarily* offer themselves to be examined, provided that every person so offering himself shall have obtained an honor at the Mathematical Examination of the preceding January. Provided also that persons entitled to Noblemen's degrees, shall be competent to offer themselves for the above-named Classical Examination, having kept nine terms, and having passed the usual examination before Admission *ad Respondendum Quæstioni* of the preceding January.

2. At this Examination in classical learning, Translations shall be required of passages selected from the *best* Greek and Latin Authors, as well as written answers to questions arising immediately out of such passages. No original composition, either in Greek or Latin, shall be required.

3. The Examination shall continue four days, the hours of attendance on each day being from half-past Nine o'clock in the Morning till Twelve, and from One till Four in the Afternoon.

4. The names of those persons who shall pass the Examination *with credit*, shall be arranged in three Classes, according to their respective merits.

5. To conduct the Examination, four Examiners appointed by Colleges according to the Cycle of Proctors and Taxors, shall be elected by the Senate at the first Congregation after October 10.

6. Each of the Examiners shall receive £10. from the University Chest.

7. The foregoing Regulations shall not interfere with the Composition between the University and King's College.

### FIRST TRIPOS DAY.

ON the day after Ash Wednesday, at one o'clock, the bell rings for the first Tripos.

At two, the Vice-Chancellor and the Proctors meet in the vestry of Great St Mary's church.

The whole company then proceed to the Law Schools; the Vice-Chancellor, preceded by a Bedell, goes into the gallery; the Senior Proctor with a Bedell into the Respondent's seat, and the Junior Proctor into the Opponent's seat.

The Tripos papers containing the names of the Wranglers and Senior Optimes of the year, and two copies of verses, written by two undergraduates whom the Proctors choose to honor on this occasion, are distributed among the undergraduates and the company present.

A Bedell reads from a Tripos paper:

*Baccalaurei quibus sua reservatur Senioritas Comitibus prioribus.*

He then pronounces the name and college of the Senior Wrangler, to which the Junior Proctor answers:

*Nos reservamus ei Senioritatem suam.*

To the second the Junior Proctor answers, *et ei*, and so on to all the names on the Tripos paper.

When all the names are read, the Junior Proctor says:

*Nos continuamus hanc disputationem in horam primam diei Jovis post quartam Dominicam hujus Quadragesimæ.*

## SECOND TRIPOS DAY.

THE second Tripos is on the Thursday after Midlent Sunday; the bell begins to ring at one. The Moderators, dressed in the Proctors' Congregation habits, meet the Vice-Chancellor in the vestry of Great St Mary's church at two o'clock, and from thence proceed to the Law Schools. The Vice-Chancellor, preceded by a Bedell, goes into the gallery; the Senior Moderator, with a Bedell, into the respondent's seat; and the Junior Moderator into the opponent's seat.

The Tripos papers, containing a list of the Junior Optimes of the year, and two copies of verses, written by two undergraduates at the request of the Moderators, are then distributed amongst the undergraduates and company present.

A Bedell reads from a Tripos paper, *Baccalaurei quibus sua reservatur Senioritas Comitibus posterioribus*.

He then reads the name and college of the first Bachelor, and the Junior Moderator answers, *Nos reservamus ei Senioritatem suam*.

To the second, the Junior Moderator answers, *et ei*, and so on, as in the first Tripos.

When all the names have been read he says:

*Reliqui* (i. e. the *οἱ πολλοί*, &c.) *petant Senioritatem suam et Registro*.

And lastly, *Authoritate qua fungimur, decernimus, creamus, et pronunciamus omnes hujus anni determinatores, finaliter determinasse, ET ACTUALITER ESSE IN ARTIBUS BACCALAUREOS*.

## PROCEEDINGS IN DIVINITY.

A Master of Arts must be of at least seven years standing before he can be admitted to the Degree of Bachelor in Divinity; for which degree the requisite Exercises are, one Act, two Opponencies, a Latin Sermon (*Concio ad Clerum*), and an English Sermon. The Act cannot be kept by a Master of Arts of less than four years standing: the other Exercises may be kept at any time after the Degree of Master of Arts has been completed.

A Master of Arts, proceeding in this faculty, calls upon the Regius Professor of Divinity, for his approbation of the Question for his Act; on which Question a Latin Thesis must be written.

A second Question is given by the Professor; who also appoints the day on which the Act is to be kept.

A copy of these Questions is to be left with the Vice-Chancellor, the Senior Doctor in Divinity resident in the University, and the Regius Professor of Divinity.

Eight days, at least, before the Act is to be kept, three copies of the Questions are to be delivered to a Bedell, for the Opponents; and one copy to the University Marshall, to be affixed to the School doors.

The Act commences, in the Divinity Schools, a quarter before two o'clock. The Professor having addressed the Respondent with the words "*Agas Domine*"—the Respondent begins with the following prayer :

*Actiones nostras singulas, Domine, elementissimo tuo favore præveni, et perpetuo auxilio prosequere, ut in omnibus operibus nostris in te inceptis, continuatis et finitis, sanctum tuum nomen glorificemus, et tandem miseratione tuâ vitam æternam consequamur, per Jesum Christum Dominum nostrum. Amen.*

The Respondent then states his two Questions; and reads a Thesis, which lasts half an hour, upon the first. After this, the Opponents are in succession called up by the Professor; who, at the close of the Disputation, reads a *Determination* upon the second Question.

The regular time for proceeding to this Degree, in the case of a Master of Arts of seven years standing, is on the eleventh of June. Masters of Arts of more than seven years standing may be admitted on other days. For this Degree two Congregations are required; at which the Candidate must be present, in his gown and cassock, and a black hood.

#### BACHELOR IN DIVINITY, *by the 9th of ELIZABETH.*

A person of the age of twenty-four years, having been admitted of any College, and having continued a member during ten years at the least, during the last two of which he has resided in College the greater part of three several Terms, may proceed to the Degree of Bachelor in Divinity. The Exercises to be performed in this case are precisely the same as those required of a Master of Arts. The Candidate is moreover examined by the Regius Professor of Divinity, for the purpose of ascertaining whether he has complied with the provisions of the Statute, and actually devoted himself to the study of Theology.

It is recommended, to all persons who intend to proceed to the Degree of Bachelor in Divinity under this Statute, to call upon the Regius Professor of Divinity, at the commencement

of their residence in the University, in order that due arrangements may be made for the performance of the requisite Exercises.

## PROCEEDINGS IN THE CIVIL LAW.

PREPARATORY to the Degree of Bachelor in the Civil Law, a student is obliged to pass the *Previous Examination*; to attend the Lectures of the Professor for the space of three terms; and to be examined by the Professor; and after four years standing, and a residence of nine terms, he may keep his Act\*. Prior to this exercise, he carries his Questions to the Vice-Chancellor for his approbation; after which they are affixed to the door of the Lecture-room under the Public Library.

### FORM of a Notice for an ACT.

#### Q. S.

*Bona fide possessor fructus percipiendo suos facit.*

*Legatarius in Testamento Testis esse potest.*

*Coll. — 4to die Maii.*

*A.B. Resp.*

The first question is proposed by the Respondent, the second by the Professor.

On the day of the Act, the University bell begins to ring at one in the afternoon, and twenty minutes before two, the Respondent is waited on by a Bedell, who precedes him to the Law Schools, followed by the Father and other Members of his college. During this procession, the Respondent walks with his cap off, and on arriving at the Schools, he ascends a rostrum opposite the Professor.

The Professor in his robes, preceded by a Bedell, then takes the chair, and the Father, seated in the Opponent's rostrum, directs the Respondent to begin—"Agas Domine."

The Respondent then commences his exercise by reading a Latin dissertation, which occupies about half an hour on the first question. The arguments against both the questions are then propounded in syllogistic form, by a candidate for the degree of D.C.L., or more usually by the Professor.

The disputation having thus proceeded for an hour, the Professor gives the Respondent an appropriate honor. The

\* Zouche's or Vinnius's Questions deserve to be consulted by a person preparing for this Act, as also the Commentaries of Vinnius and Voet.

exercise then concludes with the Professor's determination upon the second question.

The habit worn by the Respondent in the Schools, and by the candidate in both Congregations, is a full-sleeved gown, and a Bachelor of Arts' hood.

At the expiration of six years, the supplicat and the certificates of standing, residence, attendance on the Professor's Lectures, having declared for Law, and passed the Previous Examination, are presented to the Caput, and the supplicat is afterwards read in both Houses. At the next Congregation, after the supplicat has again been read, and approved in both Houses, the Candidate is admitted to the degree of Bachelor in the Civil Law.

A Bachelor of Arts of four years' standing may be admitted to this degree. His exercise is one Act, and he is not required to attend the Professor's Lectures.

Every candidate for B.C.L., or D.C.L., pays to the Professor £7. 7s. for each Act.

## PROCEEDINGS IN PHYSIC.

A Student, before he can proceed to the degree of Bachelor in Physic, must have entered on his sixth year, have resided nine terms, and have passed the *Previous Examination*. The Exercises for this degree are one Act and one Opponency. The form of notice, ceremonies, and mode of keeping the Act, are precisely similar to those described in the last article, under the head of Proceedings in the Civil Law. The questions for the Act generally refer to some practical point, or to some physiological or pathological subject. The Act must be kept either during the Term in which the degree is taken, or during the preceding Term.

Candidates for the degree of M.B., in addition to an Examination by the Regius Professor of Physic, and a diligent attendance on a complete course of his Lectures (*see p. 27*), are required to produce certificates of Examination by the Professors of Anatomy, Chemistry, and Botany, before they proceed to the performance of the Exercises in the Schools. They are also required to have attended a course of the Lectures of each of these Professors, in case the courses of the two former may have extended to fifty Lectures each, and of the latter to twenty.

By a Grace passed March 5, 1834, all candidates for this degree after 1835, must, before passing their examination,

deliver to the Regius Professor a certificate of diligent attendance on the practice and lectures of some well known Hospital for the space of two years, or for so long a time as they shall have been absent from the University after keeping their Terms.

By a Grace, passed the same day, Bachelors in Physic may be admitted *Licentiates* in the Term next following that in which they have taken their degree, after examination by the Regius Professor and another Doctor in the Faculty.

Every candidate for M.B. pays the Professor for his Act £7.: and for M.D. £11. 11s. for the two Acts which are required.

A Bachelor of Arts may proceed to the degree of Bachelor in Physic as soon as he is of sufficient standing, provided that one year at least shall intervene between the two degrees, during which he must attend the Lectures of *the Professor of Physic*.

A student who has declared for Law or Physic, may put on a full-sleeved gown when those of the same year, who go out at the regular time, have taken their degree of Bachelor of Arts. He is then styled a Harry-soph, (*επισοφος*.)

If, on or before the 1st of February in his fourth year, the candidate for B.C.L. or M.B. does not declare, in writing, to the Master of his college, that it is not his intention to proceed to B.A. he forfeits £3. to the University Chest, over and above the usual fees; and if *after* this declaration he proceeds to B.A. he also pays £3. extra to the Senior Proctor.

## EAST INDIAN EXAMINATION.

By a late regulation of the Court of Directors of the Honourable East India Company, with the approbation of the Board of Commissioners for the Affairs of India, an Examination has been appointed in this University for those Candidates for Writerships in the service of the Company, who have not resided in the College at Haileybury.

Two Examiners are appointed by the Vice-Chancellor and the Regius Professors, with an annual stipend of £80. and one of them is to be annually replaced. The following is the plan of the Examination.

The candidates are examined in the Greek Testament, and in some of the works of the following Greek Authors,

viz. Homer, Herodotus, Demosthenes, or in the Greek Plays; also in some of the works of the following Latin Authors, viz. Livy, Cicero, Tacitus, and Juvenal, which part of the Examination includes collateral reading in Ancient History, Geography, and Philosophy.

They are also examined in Mathematics, including the four first and sixth Books of Euclid, Algebra, Logarithms, Plane Trigonometry, and Mechanics.

In Modern History, principally taken from 'Russell's Modern Europe;' and in 'Paley's Evidences of Christianity.'

### THE UNIVERSITY LIBRARY.

FOR the supplying this and certain other Libraries with books, provision was made by statute of the 8th of Queen Anne, entitled "An Act for the encouragement of learning," to which certain provisions were added by an Act of the 41st of George III. and still further by an Act passed in the 56th year of the same reign, in which last it is enacted, "that eleven printed copies of the whole of every book, and of every volume thereof, upon the paper upon which the largest number or impression of such book shall be printed for sale, together with all maps and prints belonging thereto, which, from and after the passing of this Act, shall be printed and published, on demand thereof being made in writing to, or left at, the place of abode of the publisher or publishers thereof, at any time within twelve months next after the publication thereof, under the hand of the warehouse-keeper of the Company of Stationers, or the librarian or other person thereto authorized by the persons or body politic and corporate, proprietors or managers of the libraries following; *videlicet*, the British Museum, Sion college, the Bodleian library at Oxford, the public library at Cambridge, the library of the faculty of Advocates at Edinburgh, the libraries of the four Universities of Scotland, Trinity college library, and the King's Inns library at Dublin, or so many of such eleven copies as shall be respectively demanded on behalf of such libraries respectively, shall be delivered by the publisher or publishers thereof respectively, within one month after demand made thereof in writing as aforesaid, to the warehouse-keeper of the said Company of Stationers for the time being; which copies the said warehouse-keeper shall and he is hereby required to receive at the hall of the said Company, for the use of the library for which such demand shall be

made, within such twelve months as aforesaid; and the said warehouse-keeper is hereby required within one month after any such book or volume shall be so delivered to him as aforesaid, to deliver the same for the use of such library: and if any publisher, or the warehouse-keeper of the said Company of Stationers, shall not observe the directions of this Act therein, that then he and they so making default in not delivering or receiving the said eleven printed copies as aforesaid, shall forfeit besides the value of the said printed copies, the sum of five pounds for each copy not so delivered or received, together with the full costs of suit; the same to be recovered by the person or persons, or body politic or corporate, proprietors or managers of the library for the use whereof such copy or copies ought to have been delivered or received; for which penalties and value such person or persons, body politic or corporate, is or are now hereby authorized to sue by action of debt or other proper action in any Court of Record in the United Kingdom.

“And be it further enacted, That no such printed copy or copies shall be demanded by or delivered to or for the use of any of the libraries herein before mentioned, of the Second Edition, or of any subsequent edition of any book or books so demanded and delivered as aforesaid, unless the same shall contain additions or alterations: and in case any edition after the first, of any book so demanded and delivered as aforesaid, shall contain any addition or alteration, no printed copy or copies thereof shall be demanded or delivered as aforesaid, if a printed copy of such additions or alterations only, printed in an uniform manner with the former edition of such book, be delivered to each of the libraries aforesaid, for whose use a copy of the former edition shall have been demanded and delivered as aforesaid: provided also, that the copy of every book that shall be demanded by the British Museum, shall be delivered of the best paper on which such work shall be printed.”

To the same purpose the rents of the University's estate at Ovingdon in Norfolk are applied. This estate was bought with the money given to the University in 1666, by Tobias Rustat, Esq. M.A. Yeoman of the Robes to King Charles II. to be laid out in land, the rents to be applied in the purchase of *choice* books for the Public Library, and the income of it is nearly £200. per annum.

William Worts, M.A. Fellow of Caius college, formerly one of the Esquire Bedells of this University, ordered by his Will that the annual surplus of the rents and profits of his estate at Landbeach, in this county, producing about £500. per annum, after the discharge of the other outgoings (*see p. 46*), should be applied to the use of the Public Library. The Rev. John

Manistre, M.A. late Fellow of King's college, lately bequeathed £5000. to purchase books. A quarterly contribution of one shilling and sixpence each from all members of the University, excepting Sizars, is likewise made for the support of the Library.

The management of the Library is committed to Syndics, who are the Vice-Chancellor, the Heads of colleges, all Doctors in each faculty, the Orator, and all public Professors, the Proctors and Scrutators. They meet in the Library on the first Monday after the division of every Term, and oftener if necessary; and to them, or the major part, not less than five, of whom the Vice-Chancellor must always be one, full powers are committed for the better regulating of the same.

All members of the Senate, Bachelors in the Civil Law and Physic, and Bachelors of Arts, are entitled to the use of the Library.

The Syndics have at various times issued regulations to the following effect:

That no person be allowed to have in his possession at any one time, more than ten volumes\* belonging to the Library, except by a dispensation from the Vice-Chancellor and the Librarian, to continue in force no longer than to the end of the quarter in which it shall be granted; but upon fresh application it may be renewed by the same authority.

That no one take or borrow any book out of the Library, without first delivering to one of the Library-Keepers a note for the same, in his own hand-writing, expressing his name and college, and the year and day of the month on which such book is taken or borrowed, on pain of forfeiting five pounds, or double the value of such book.

That the Library-Keepers preserve carefully all such notes, till the book so taken out be returned again to the Library, duly entering the same in a book to be kept for that purpose, together with the day of the said return, and any damage done to any book, on pain of five shillings for every omission, to be paid by them, or any of them.

That every one who shall borrow or take any book out of the Library, return it thither again on or before the next of the four following days, *viz.* Michaelmas-day, St Thomas, Lady-day, and Midsummer-day, or oftener, if the Syndics see occasion and require it, under the penalty of two shillings for every folio or quarto, and one shilling for every book of less size; the penalty to be repeated every month till the book be returned.

\* Bachelors of Arts are restricted to five Volumes.

or another of the same edition and equal value placed in its room.

That a list of the books omitted to be returned at the end of the quarter, together with the name of the borrower, be suspended in some public place in the Library.

That no person shall have more than five volumes out of the lock-up classes of the Library, by a note countersigned by the Vice-Chancellor; and that such books be returned at the end of each quarter, as all other books are, under *double* penalties.

That for the purpose of allowing the Librarian sufficient time to inspect the books at the end of each quarter, all books be kept in the Library on the day appointed for their return, and the whole of the day following.

That no manuscript whatever be taken out of the Library, without a Grace for its removal being obtained from the Senate.

That no volume containing a collection of prints or drawings, shall be taken out of the Library on any account whatever.

That every year, on the Friday next after the Commencement, or oftener if they see occasion, the Syndics shall meet in the Senate-House, or elsewhere, at the appointment of the Vice-Chancellor, to give orders, and appoint inspectors, for a general survey of the Library the Monday following. These inspectors, with the Librarian, shall make a full and true catalogue of all books wanting or much damaged, expressing in whose custody such books are, or by whom damaged, and deliver the same, signed by them, to the Vice-Chancellor.

That all books in this catalogue be returned to the Library perfect and undamaged, or others of the same edition and equal value, placed in their room there within thirty days after notice given, on pain of forfeiting five pounds for every volume not so returned, or the full value of the same, to be paid by him who stands charged with it; or, in case no one shall be charged with it, by the Library-Keepers or their deputies, or any of them; unless it shall appear to the Vice-Chancellor that such loss or damage has not happened through any neglect or default of the said Library-Keepers, or their deputies.

That if, after the said thirty days, on enquiry and report to be made by the said inspectors, or otherwise, it appears to the Vice-Chancellor, that any books be still wanting in the Library, or much damaged, he shall order others, without delay, to be procured, at the expense of the public chest, and put in their places.

That no Undergraduate or person not belonging to the University, be allowed to examine the catalogue, or take down

books, unless in company of a Master of Arts, or a Member of the Senate, or Bachelor of Law and Physic; and that the Library-Keepers report to the Vice-Chancellor and Proctors any persons in *statu pupillari* who come into the Library not in their Academical dress.

That all the penalties above-mentioned shall be levied as other penalties are, by the Queen's statutes, chap. 50, and go one-third to the Bedells who collect them, the rest to the public chest.

The Library is closed on Sundays, and on the following days: Christmas-Day; the Epiphany; the Purification; Ash-Wednesday; Good Friday; Easter Monday and Tuesday; Holy Thursday; Whit Monday and Tuesday; November 5; appointed Fast days and Thanksgivings; the day after each Quarter-day; and for four days immediately following September 29, exclusive of Sunday.

On Saturdays it is open from ten till one; on Saints' days from twelve till three; and on other days from ten till three.

## THE UNIVERSITY PRESS.

THE management of the University Press is committed by the Senate to Syndics, who meet to transact business in the Printing-office, and cannot act unless five are present, the Vice-Chancellor being always one: the Syndics are,

The Vice-Chancellor,  
The Lord Bishop of Peter-  
borough,  
Hon. and Rev. George  
Neville Grenville,  
Dr Cory,  
Dr Procter,  
Dr Wordsworth,

Mr Veasey,  
Mr R. Tatham,  
Professor Scholefield,  
Professor Musgrave,  
Mr Turnbull,  
Mr Lodge,  
Mr Gibson.

## THE FITZWILLIAM MUSEUM.

**RICHARD**, Viscount FITZWILLIAM, formerly of Trinity Hall, (M.A. 1764,) who died 5th February, 1816, bequeathed to the University his splendid collection of books, paintings, drawings, engravings, &c., together with the dividends, or annual proceeds of £100,000. South Sea annuities, for the erection of a Museum for their reception.

The old Free School behind Corpus Christi College has been fitted up for the temporary reception of this splendid collection, until the directions of his Lordship's Will (inserted in former editions of the Calendar) can be complied with.

The Museum has been augmented by many valuable presents of Paintings, Prints, Books, Statues, Models, and Curiosities : a list of which may be seen in the donation book.

### REGULATIONS *of the* FITZWILLIAM MUSEUM.

1. The Museum shall be open for inspection every day on which the Public Library is opened, from ten o'clock in the morning till two in the afternoon, and from four o'clock till six in the evening, during the months of April, May, June, July, August, and September; and from eleven in the morning till three in the afternoon, during the remainder of the year.

2. Any member of the Senate may introduce two persons in *statu pupillari* at one time, or any strangers or friends who do not belong to the University.

3. No pecuniary gratification shall be received by the Keeper on these occasions.

4. The Fitzwilliam Museum shall be inserted with the Library, in the oath of admission to degrees.

5. No member of the University shall be admitted into the Museum, unless he appear in his Academical habit.

*Keeper of the Museum*—William Key Ridgway.

## THE MESMAN MUSEUM.

THE late Mr MESMAN bequeathed a valuable collection of Pictures to the University. His brother, the Rev. Mr Mesman (to whom they were bequeathed for his life), having given up his life-interest in the bequest, the collection has come into the immediate possession of the University. The Fitzwilliam Museum not having at present space enough for these Pic-

tures, the Syndics of the University Press have given permission for them to be suspended in one of the apartments at the Pitt Press; where they will probably remain, until the building of the proposed Fitzwilliam Museum is sufficiently advanced for their reception. The collection amounts in number to 248 Paintings and 33 Drawings and Prints. Among the Painters are many very distinguished names, Vandyck, Schidoni, P. Brill, Ruysdael, Canaletti, Teniers, Gerard Dow, Cuyp, Wouvermans, Tintoretto, the Carracci, Holbein, L. Van Leyden, Castiglioni, Van Goyen, &c. &c. &c. The majority of the Pictures are of the Flemish and Dutch schools; and they are considered to be a very *genuine* collection of the masters whose names they bear.

The Regulations of the Mesman Museum are the same as those of the Fitzwilliam.

*Keeper of the Museum*—John Massey.

## THE BOTANIC GARDEN

OCCUPIES between three and four acres, on the east of the Fitzwilliam Museum, conveniently disposed, and well watered. This piece of ground, with a large and ancient edifice that formerly belonged to the Augustine Friars, was purchased by the late Dr Richard Walker, Vice-Master of Trinity College, for £1600.

The old building having been sold, a new building has been erected, for the use of the Lectures in Chemistry and Botany.

This garden is under the government of the Vice-Chancellor, the Provost of King's, the Masters of Trinity and St John's, and the Professor of Physic.

*Curator*—Arthur Biggs, F.L.S.

## THE CAMBRIDGE OBSERVATORY

WAS erected in 1822-4, after the designs of Mr J. C. Mead, of London, at an expence of upwards of £18,115. About £6000. of this sum was contributed by subscriptions, and the remainder was granted from the public chest of the University.

The principal instruments in the Observatory are a Transit Instrument of 10 feet focal length, by Dollond, a Mural Circle of 8 feet diameter, by Troughton and Simms, which was graduated on its pier; and an Equatoreal of 5 feet focal length with Declination Circle of 3 feet diameter, and Hour Circle of 2 feet diameter, by Jones. The Transit clock is by Hardy. There are also two other clocks, one by Molyneux and Cope, and one by Graham, with several smaller instruments, of which some have been purchased by the Plumian Professors according to the regulations of their foundation, and others have been bought by the University, or have been presented to the Observatory by individuals.

On Feb. 27, and March 18, 1829, Graces passed the Senate, by which the former regulations for the appointment of the Assistants were revoked, and the following substituted. The Plumian Professor (under whose superintendence the Observatory is placed) is authorized to appoint, with the consent of the Vice-Chancellor, one or two Assistant Observers, as he may see necessary: and they or either of them are removable from the office by the authority of the Plumian Professor, with the consent of the Vice-Chancellor: and their annual salaries are to be determined by Graces of the Senate, and to be paid out of the common chest. And on June 11, 1829, and May 14, 1834, the annual salaries of the assistants were fixed by Grace at £80.

By the Grace of Feb. 27, 1829, it was also ordered, that on the first congregation of November in each year, a Syndicate should be appointed by Grace of the Senate, who with the Plumian Trustees and the Plumian and Lowndean Professors, should visit the Observatory at least once in each Term; and should in the month of May (after inspecting the instruments, &c., with such members of the Senate, and strangers distinguished for their knowledge of Astronomy, as the Vice-Chancellor and the Plumian Professor might invite to assist them) make a report to the Senate of the state of the Observatory, and the proceedings of the previous year.

The volumes of Observations made in the years 1828, 1829, 1830, 1831, 1832, and 1833, have been published (the expence of which was defrayed by the Press Syndicate), and copies have been distributed to the principal Observatories and Academies in Europe, as well as to several private Observers. The Observations of 1834 are in the press.

The Observatory is open to Members of the University and their friends every day (except Sunday), between half-past Twelve and half-past One. No stranger is admitted except in company with a Member of the University.

## COMBINATION PAPERS, &amp;c.

THE Sermons before the University at Great St Mary's, are preached by Bachelors in Divinity and Masters of Arts who have completed their first year, beginning with the former. The two papers, one published in July, and the other in December, are made out by the Esquire Bedells and signed by the Vice-Chancellor. The *Prior Combinatio* contains the Sunday morning turns, and is made after the following order:—The colleges are divided into seven classes, each of which (Trinity Hall and Downing excepted, which send no morning preacher) provides a preacher every seventh turn. In the first three colleges the name is omitted, in the remaining twelve the preacher's name and college are set down.

Persons of sixty years of age, and upwards, are excused from preaching.

The *Posterior Combinatio* contains the Sunday afternoon turns and Saints' days, and is made according to the order in which the members stand in the Registry's book. The names as well as the colleges are here mentioned.

The Combination Papers are, immediately on their publication, sent to the Tutors of the respective colleges, who communicate to the persons named in the Paper the time appointed for them to preach. Substitutes procured by such as omit to preach in their turn, receive three guineas a sermon. The Vice-Chancellor appoints the preachers for the Lent and Summer Assizes, and for extraordinary Fasts and Thanksgivings. The payment is five guineas a sermon.

## SELECT PREACHERS.

A GRACE having passed the Senate: "That those to whom the Sunday afternoon turns at St Mary's, and the turns for Christmas-day and Good-Friday, are assigned, shall, from the beginning of November 1834, to the end of May 1835, provide no

other substitute than such as are appointed in conformity with that Grace ;"—The following persons have been elected, each for the month to which his name is affixed :—

## CHARITIES.

### CRANE'S CHARITY FOR THE RELIEF OF SICK SCHOLARS.

JOHN CRANE, apothecary in Cambridge, and M.A. died in 1654, and left by his Will money to buy an estate of £62. per annum\*, to be settled on the five corporations following, *viz.* the University of Cambridge, the towns of Wisbech, Cambridge, Lynn and Ipswich†. The rents to be received in order, and to be applied by the University in their turn towards the relief of sick scholars. The distribution to be made by the Vice-Chancellor, the Professors of Divinity, Civil Law, and Physic, and the chief Apothecary of the town. The Master of Caius college is requested to assist the Distributors. Meetings of the Distributors, to consider and determine the claims of applicants for the benefit of this charity, take place on the third Tuesday of *May*, and the third Tuesday of *November*, in every year, and all applications of Scholars must be made by the Tutors of their respective colleges.

The gift to the town was to accumulate until it amounted to £200. which sum was to be disposed of in loans of £20. each bearing no interest, to ten young men, in order to set

\* The present rent of the estate is above 300*l.* per annum.

† The first payment was made about the year 1660.

them up in trade, they giving good security to repay the same at the end of twenty years. As each sum is repaid, it is to be again lent out in the same manner, and the persons to whom the loans are made are to be selected by the Vice-Chancellor, the three Professors of Divinity, Civil Law, and Physic, the chief Apothecary, the Mayor, Recorder, and three Aldermen, or greater part of them.

After the sum of £200. had been set apart, Mr Crane directed that the rents of the estates should be employed in the relief of persons confined for debt, and of poor men and women of good character, at the discretion of the above-mentioned Distributors, who hold half-yearly meetings in May and November to consider the claims of applicants.

## FREE GRAMMAR SCHOOL.

STEPHEN PERSE, M.D. Senior Fellow of Caius College, by a clause in his Will\*, dated September 27th, 1615, bequeathed certain property in charge to his executors, to purchase divers grounds and tenements, to be applied, amongst other purposes, to that of erecting and establishing within three years (if possible,) after his decease, a convenient house capable of containing one hundred scholars to be used for a Free Grammar School, with apartments for a Master and Usher, who are required to be graduates in this University; the former a Master, the latter a Bachelor of Arts at least. The Scholars are to be natives of Cambridge, Barnwell, Chesterton, or Trumpington, and educated *gratis*. In case of a vacancy in the place of a Master or Usher, preference is to be given to one who has received his education at the School.

Scholars educated three years at least at this School, are to be admitted (*ceteris paribus*), before all others, to the Perse Fellowships and Scholarships at Caius College.

*Master*, James Bailey, M.A. *Trin.*  
*Usher*, George Barber, B.A. *Queens'.*

\* A copy of the Will is in Baker's MSS. Vol. xxvi. p. 131.

## NEW FREE SCHOOL,

*In St Peter's Parish.*

THIS institution was founded in 1808, for the education of the poor of this town and the adjacent villages. It was originally established upon the plan of Dr Bell and Mr Lancaster, but is now placed wholly upon that of the former, as adopted by the National Society. The children are admitted between the ages of 6 and 11, and are instructed in reading, writing, and arithmetic, on paying 6*d.* per month each. They are also instructed in the catechism and parts of the liturgy of the Church of England.

The institution is under the management of Governors, who are constituted by a donation of ten guineas, or an annual subscription of one guinea. By means of a liberal subscription they have been enabled to purchase a piece of ground, and to build a spacious school-room, calculated to hold 300 boys; and by the aid of a donation of £150. from the University, donations from some of the colleges, the Members of the University, and other individuals, a house has been built for the Master contiguous to the School. A meeting of the Governors is held on the first Thursday in every month, at 2 o'clock, in the school-room. A sermon for the benefit of this institution is preached annually in the spring; and the yearly statement, published in June, may be had of Messrs Deightons, book-sellers, by whom subscriptions are received, and by any of the bankers in Cambridge.

## OLD CHARITY SCHOOLS.

*Commonly called WHISTON'S Charity Schools.*

THIS institution was set on foot in the year 1703, and is supported by voluntary contributions. It owed much of its first establishment to the activity of William Whiston, M.A. and amongst its earliest patrons are found the names of Sir Isaac Newton, Bishop Patrick, Dr Bentley, &c. The design of it was to educate charity children of both sexes.

The New Free School in St Peter's Parish, for the education of boys, having been united to the National Society, June 22, 1813, it was thought expedient to transfer the boys to that institution, to which this allows in consequence, the sum of £30. annually. In the year 1816, a new school-room for the girls was built in King-street, capable of containing 300 children, and likewise a house for the mistress, and the

establishment was put on the plan of the National Society, to which it was then united.

The girls are taught reading, writing, something of accounts, needle-work, and knitting. They learn the catechism and other religious books, and are required to attend divine service in their parishes on Sundays. The Lord Bishop of Ely is the patron. The Ministers and Lecturers of the parishes in Cambridge are the governors. There is also a committee of ladies, who superintend the detail of the School. The governors and subscribers nominate the girls who are educated; each guinea subscriber has the right of nominating four children, or ten guineas paid at one time entitles the donor to recommend four children annually.

Subscriptions are thankfully received by Professor Farish, the Treasurer; by the Governors; by Messrs Deightons, book-sellers; or by any of the bankers in Cambridge.

### ADDENBROOKE'S HOSPITAL.

JOHN ADDENBROOKE, M.D. formerly Fellow of Catharine Hall, in the year 1719, left about £4000. to erect and maintain a small Physical Hospital; but the money being insufficient for the support of it, an Act of Parliament was obtained to make it a general Hospital. It was opened at Michaelmas 1766, and the number of patients annually cured and relieved is upon an average 1000. The expenses of late years have been about £1700. per annum, of which sum about £600. arises from the permanent funds, and the remainder from the voluntary contributions of the public.

Mr JOHN BOWTELL, late a bookbinder and stationer in Cambridge, by his Will bearing date the 22d day of September, 1813, bequeathed a legacy to the Hospital in the following words:—"I give and bequeath unto the President and Governors of Addenbrooke's Hospital, in the town of Cambridge, £7000. in the 3 per cent. Consolidated Bank Annuities, to be by them applied in enlarging the said Hospital, if necessary, for the purpose of receiving persons of other descriptions than those of sick patients, such as poor married women during their confinement, or otherwise, as they shall see fit and advisable."

Between three and four thousand pounds of this sum have been appropriated to the erection and furnishing two wings to the Hospital. These are now completed and open for the reception of patients.

Benefactors of 20 guineas or upwards are governors for life; annual subscribers of two guineas or upwards are governors during payment. Each person may recommend patients according to the amount of the subscription.

An accurate statement of the accounts and a list of subscribers is printed annually, and may be had *gratis* by any of the contributors, at Messrs Deightons, or at the Hospital.

Benefactions and annual subscriptions are thankfully received by Messrs Mortlocks, Bankers; Messrs Deightons, booksellers; Miss Wilkinson, Wisbeach; Mr Edwards, Ely; and by the Apothecary and Matron at the Hospital.

This Hospital has lately become a School of Medicine, and Lectures on Surgery are delivered by Mr Okes. Certificates of attendance upon the practice of this Hospital are recognized by the Royal College of Surgeons and by the Society of Apothecaries in London.

## UNIVERSITY ALMS HOUSES.

THESE Alms Houses, situated in King Street, were founded in 1505, by MATTHEW STOKYS, M.A. of Caius College, one of the Esquire Bedells, for six poor women, who are appointed by the Vice-Chancellor. The value of the original endowment was 7*d.* a week for each poor woman, and 8*s.* a piece at Stourbridge Fair, to buy them frieze gowns and linen veils; but between the years 1695 and 1796 the annual stipend to each person was only 10*s.* In the latter year, a Grace passed the Senate for the increase of the stipend from 10*s.* to 50*s.* Since that time it has been materially increased, and for some years each person has been in the receipt of £9. 2*s.* 0*d.* per annum.

## PERSE'S ALMS HOUSES.

THE Alms Houses, S.E. corner of Free School Lane, near the Botanic Garden, for six poor single persons, not less than forty years of age, and belonging to the parishes of St Edward, St Michael, and in failure of such being found there, of St Benedict, in the town of Cambridge, were built and endowed with a salary of £4. per annum to each person, by Dr PERSE, whose numerous acts of charity and beneficence are justly recorded on a handsome monument in the chapel of Caius college. The present income of each person is now £26. per annum.

## STOREY'S ALMS HOUSES.

EDWARD STOREY, gent. left by will (1692) all his property for founding Alms Houses: one for four clergymen's widows, another for two widows and one maiden of the parish of St Giles, and three maidens of the parish of the Holy Trinity, in the town of Cambridge. "Every of which widows and maidens to be forty years of age at the least, and of sober life and conversation. And to each widow and maiden a house to live in, and £10. per ann. payable half-yearly; and to each, one gown, two pair of shoes, and one pair of stockings."—Dr GODDARD, late Master of Clare Hall, left a legacy to augment the stipends of the four clergymen's widows, with which the trustees purchased £410 stock, 4 per cent. All the widows receive yearly other perquisites.

Mr. J. MERRILL, late bookseller in this town, left by Will (Oct. 1805) £1667. in the 3 per cents. to this charity.

*The Trustees are,*

The Rev. F. Barnes, D.D. Master of St Peter's.  
The Rev. R. T. Cory, D.D. Master of Emmanuel.  
The Rev. G. Thackeray, D.D. Provost of King's.

*Steward and Reeceiver,——*

### KING'S COLLEGE ALMS HOUSES.

THESE houses, adjoining the college, are for four poor persons, who are allowed £10. per annum each, and receive the remains of the Scholars' commons.

### QUEENS' COLLEGE ALMS HOUSES.

THESE Alms Houses, situate in Silver Street, are appropriated to eight poor widows, appointed by the President of Queens'. Each person receives 2s. and a pound of meat a week, and a chaldron of coals every year. They have also an additional gratuity of £1. the 25th of September, and 2s. 6d. on the 24th of December.

*N.B.*—Most of the colleges have certain funds appropriated for charitable purposes.

## ST PETER'S COLLEGE.

(FOUNDED 1257.)

*Copies of the Statutes in the British Museum ; Old Statutes*  
MSS. HARLEY, No. 7032, p. 187. *New.*—No. 7046  
p. 132.

**A**T this most ancient College, or House, founded by HUGH DE BALSHAM, Bishop of Ely, there are fourteen Fellowships on the foundation, into which no person who is M.A. or of sufficient standing to take that degree, can be elected; and there cannot be more than two Fellows of a county, (except of Cambridge or Middlesex,) seven of whom must be in the northern and seven in the southern division. Westmoreland, Northumberland, Cumberland, Durham, York, Lancaster, Chester, Derby, Stafford, Nottingham, Leicester, Lincoln, Salop, Worcester, Warwick, Rutland, Northampton, Norfolk, Bedford, and Huntingdon, with the Welsh counties of Anglesea, Caernarvon, Flint, Merioneth, Montgomery and Denbigh, are esteemed northern. With regard, however, to Cambridge, or Middlesex, there may be four Fellows of either county. One fourth part only of the Foundation Fellows are required to be in Priest's orders. By Queen Elizabeth's licence, the five senior Clerical Fellows may hold any livings with their Fellowships, provided they are not more than £20. in the *Liber Regis*, and within 20 miles of the University of Cambridge. The ten bye Fellowships, which are perfectly open and unrestricted, are distinct from the former: the possessors of them are not entitled to any office or voice in the affairs of the College. Two founded 1589, by Andrew Pern, D.D. Two 1601, by Lady Ramsay. And four 1637. by Thomas Park *Esq.*

Two Fellowships of £70. per annum each, and four new Scholarships, of £30. per annum each, have recently been added to the patronage of the college, from the donation of the Rev. Francis Gisborne, M.A. late Fellow of St Peter's.

This foundation bears the name of the donor. The two Gisborne Fellowships are tenable for seven years, and any person may be elected from either of them into a Foundation Fellowship before he is of standing to take his M.A. degree. These Fellowships are vacated by marriage, or by the possession of any permanent income amounting to £250. per annum.

The rest of the Scholarships, fifty-five in number, of different value, are paid in proportion to residence. A few of them are in the patronage of Lord Melbourne, and preference is given to scholars from Hertford School. There is an exhibition from the Company of Cloth-workers, and one from the Iron-mongers. The Bishop of Ely appoints to the Mastership one of two candidates presented to him by the Society. The candidates must be Bachelors in Divinity; one of the north, and one of the south side.

Annual Prizes are given, together with the vacant Scholarships, to those who are most successful in the Midsummer Examination, and a deserving Person, who may hold one or more Scholarships, is not thereby precluded from obtaining others.

## CLARE HALL.

(FOUNDED 1326.)

*Copies of the Statutes in the British Museum, New Mss. HARLEY, No. 7932, p. 319. Old.—No. 7041, p. 43. New University Library, Mss. Mm. 3. 5.*

**T**HIS ancient College, Hall, or House, founded by Lady ELIZABETH, sister and co-heir of GILBERT, Earl of CLARE, consists of a Master, ten Senior or Foundation Fellows, nine Junior, and three bye-appropriation Fellows, besides Scholars, Students, and Foundation servants. All these Fellowships, with the exception of those which are appropriated, are perfectly open to all persons who are Bachelors of Arts, or of a higher degree, no one being superannuated, or incapable of being a candidate on account of age or length of standing in the University. An election must take place within ten weeks and three days after a Fellowship has become vacant. The electors are, the Master, Senior and Junior Fellows; and, in case there be an equal division, the Master has the casting vote. The Master is elected by the above-mentioned Fellows within eleven days after a vacancy is known, and a candidate must be either a Bachelor or Doctor in Divinity. Fellows neglecting to take the degree of M.A. at the regular time, are punishable by a fine; but the degree of B.D. has not of late years been required. The Seniors must all be divines except two, who, with the consent of the Master and major part of the Fellows, may practise Law and Physic.

The nine Junior Fellowships were founded by different benefactors, (*viz.* three by Lord Exeter in 1612, two by John Freeman, Esq. in 1622, and four from the estates bequeathed to the college by Joseph Diggon, Esq. in 1658.) Of these, two

may be held by laymen, the other seven require Priest's Orders after a certain standing. They enjoy the same privileges as the Seniors.

The three bye-appropriation Fellows have no voice in any college business, can hold no college office, and are incapable of being ever elected into any other Fellowship. They are obliged to take Priest's Orders within seven years after they are Bachelors of Arts. Two of these Fellowships, founded by Mr Philpot, are appropriated to natives of Kent, with a preference to those born in the hundred of Blackheath. The third was founded by Mr Borage, for his name and kindred, or a Norfolk or a Norwich man. This Fellowship is not tenable by a Non-Regent Master of Arts.

There are eight Scholarships lately increased, four of which are £50. per annum each, and the other four £20. each, besides a weekly allowance in the butteries of 3s. 3d. during residence. They are tenable by undergraduates only, and are so arranged that one on each foundation shall be vacant every year. There are also,

One founded by Sir John Trott, value £20. per annum, and tenable till M.A.

One founded by Mr Ralph Scrivener, value about £14. per annum.

Two by Mr Cave, appropriated to Scholars from Wakefield School, value one guinea and a half each per week during residence.

One by Alexander Metcalfe, appropriated to a Scholar from Hull School, value 12s. per week during residence.

Besides these there are upwards of thirty other Scholarships, varying in value from two to six shillings per week, and are allowances in the butteries during residence.

All the above Scholarships (except the three specified) are perfectly open to all competitors, and the annual examination takes place on the same Monday and Tuesday as the Senate-House Examination for the degree of B.A.

Four exhibitions of £20. per annum each, were founded by Archdeacon Johnson, with a preference to persons educated at Oakham and Uppingham Schools.

The present Society wish to admit no more than three Sizars.

## ANNUAL PRIZES.

ONE of ten pounds, left by Mr Greaves, of Fulbourn, to any Bachelor of Arts (not a Fellow of the college) who shall compose the best Dissertation on the character of King William III. It must be sent to the Master on or before Michaelmas day, and that which is adjudged to be the best is recited on the 4th of November in the Hall of the college.—Last year adjudged to Ds Mann.

Two silver cups, with appropriate inscriptions, value £6. each, left by Dr Robert Green, of Tamworth; the first as the reward of regularity of conduct, the second of general learning.—The first adjudged this year to Ds Scott, the second to Ds Wilkinson.

Prizes are given for the best déclamation and theme; and to the best reader in chapel.

There is also an annual examination immediately before the division of the Easter Term, when those who distinguish themselves are rewarded with a prize of books, bearing the college arms.

## PEMBROKE COLLEGE.

(FOUNDED 1343.)

*A Copy of the Statutes in the British Museum.*

MSS. HARLEY, No. 734, p. 124.

**T**HIS College was founded under the name of VALENCE-MARY by Mary de St Paul, the widow of Aymer de Valence, Earl of Pembroke; and King Henry VI. was so liberal a benefactor to it, as to obtain the name of a second Founder.

There are *fourteen* Foundation Fellowships open to persons of every *nation* with this limitation, that no more than two be filled by persons of the same consanguinity, nor more than three by natives of the same county; London and Middlesex however being reputed separate counties. There is also in the election to that Fellowship, which was established by Archbishop Grindal, formerly Master of the College, a preference given to a Scholar educated at St Begh's School in Cumberland.

Although there may be no Fellowship vacant, yet a Candidate is never considered as superannuated.

When more than ten of the Fellowships are filled, six of the Fellows must be in orders.

There are also *two* Bye-Fellowships, one founded by William Smart, Esq. of Ipswich, with a preference for the Scholars on his own foundation in this College; the other founded by Benjamin Lany, D.D. formerly Bishop of Ely and Master of the College.

---

The Scholarships belonging to the College are,  
*Six* Foundation of the yearly value of £12. each.

*Eight* Greek, seven founded by Thomas Watts, D.D. formerly Archdeacon of Middlesex, and the other by Thomas James, Esq. of the yearly value of £8. each.

*Six* others, two founded by William Smart, Esq. of the yearly value of £3. each, and four by Ralph Scrivener, Esq. of about £4. or £5. each, with a preference for those who have been educated at the Grammar School in Ipswich.

*Three*, founded by Archbishop Grindal, of the yearly value of £12. each, for Scholars educated at St Begh's School.

There are several others founded by Serjeant Moses, who presided over the College during the time of the Commonwealth, of the yearly value of £50. each, for Scholars educated at Christ's Hospital, which Exhibitions they hold in addition to others of the yearly value of £60. each, allowed by the Governors of the School.

*One*, of the yearly value of £70., founded by Mr John Holmes, for a Scholar educated at Blackrode School in Lancashire. This Exhibition is given by the Governors of the School, and the Scholar who holds it also receives from the College an additional Exhibition, the gift of Mr Warren, formerly a Blackrode Scholar, of the yearly value of £5.

*Six*, founded by Charles Parkin, M.A. formerly Rector of Oxburgh in Norfolk, of the yearly value of £50. Of these five are for such Scholars of Merchant Tailors' School as have been there four years at the least immediately before their appointment to these Exhibitions, with a preference for such of them as are superannuated; and the other for one who has been a Scholar of the Free School at Bowes in Yorkshire for two years at the least immediately before appointment. When there are no Candidates, these Scholarships are at the free disposal of the Master of the College.

*One*, founded by William Stuart, D.D. formerly Chancellor of the Diocese of Exeter, of the yearly value of £60., for a superannuated Scholar of Merchant Tailors' School, who has been there five years at the least immediately before appointment.

*One*, of the yearly value of £6., founded by Roger Long, D.D. formerly Master, for a Scholar appointed by the Master to keep the key of the room in which Dr Long's Sphere is placed.

Besides the above there are other Exhibitions, given to the College by Robert Mapletoft, D.D. formerly Master, and by others, to which the College have made such an addition that *three* Sizars may have £12. each yearly.

The enjoyment of one Scholarship does not preclude a deserving person from holding others, excepting such as are appropriated to Scholars educated at the same school with himself.

There is an annual Examination at the division of the

Easter Term, when prizes in books are given to the best proficient in each year.

Two prizes of books are also given annually for the best compositions in Latin verse and Prose, for which any Junior Soph or Freshman may be a candidate.

## GONVILLE AND CAIUS COLLEGE.

(FOUNDED 1348.)

*A Copy of the Statutes in the University Library.*

Mss. Mm. 4. 20.

**T**HIS College originally styled Gonville Hall, was founded in 1347 by EDMUND GONVILLE, son of Sir Nicholas Gonville, rector of Terrington in Norfolk, and endowed for a Master and four Fellows: the revenues were afterwards augmented by various benefactors; but were subsequently increased by the new foundation of Dr JOHN CAIUS in 1558, and a new charter obtained, by which the college was to be designated "Gonville and Caius College." There are now twenty-nine Fellowships; twelve are called Senior Fellowships, being all that were founded at the time of the second charter granted to Dr Caius, in 1558; of these, three are of the old foundation open to all counties, and to laymen; three founded by Dr Caius, to be possessed by Norfolk men, two of whom must be physicians; and the remaining six, all by different founders, two confined to the Norwich Diocese, and the other four open to all counties; one of the six is open to laymen. In all the Senior Fellowships which are not particularly confined, there is, in case of equality among the candidates, a preference given by statute to those who are born in the Norwich Diocese. Eight are termed Junior Fellowships, open to all counties, and likewise to laymen, except one, which must be held by a priest born in the Norwich Diocese; from these eight the Senior Fellows are elected. Of the remaining nine, six were founded by Dr Perse, open to all counties, and to laymen, with a preference to Scholars educated three years at the Free Grammar School founded by him in Cambridge, and afterwards elected to a Perse Scholarship; and three by Mr Wortley, one of which is confined to a part of Devon, and one to Norfolk.

There are also twenty-six Scholarships, of which

Three	are	£56.	per annum each.

open to all counties.

There are likewise eight Exhibitions, which are given in addition to the Scholarships:

One	.....	£20.	per annum.
Three	.....	£18	.....each.
One	.....	£16	.....
Three	.....	£10	.....

open to all counties.

Two Scholarships of £52. 10s. per annum each, for Students from Harrow School, have recently been founded by John Sayer, Esq. M.A. Barrister at Law, formerly a Senior Fellow of this College. Present possessors, H. Drury, and Meade.

There is also a Scholarship in Chemistry of £20. per annum, founded by John Mickleburgh, M.A. formerly Professor of Chemistry in this University; and four Studentships, now £113. 8s. per annum each, founded by \* C. Tancred, Esq. for Students in Physic; whenever a vacancy occurs, the successful candidate, if of another college, is obliged to remove to Caius. These Students are required to take the degree of Bachelor in Physic as soon as they are of sufficient standing for the same, and they may hold the Studentships for three years after their degree. Those therefore who are elected previous to admission to any college, can hold them eight years. The present possessors are Branson, Lockley, Sutton, and Merriman.

The electors to the Studentships are, the Masters of Christ's and Caius College, the President of the College

\* C. Tancred, Esq. (who died August 1754) also founded four Studentships of nearly the same annual value, appropriated to Law, to be held only by Students of Lincoln's Inn, who are not required to be Members of the University.

of Physicians, the Treasurer of Lincoln's Inn, the Master of the Charter House, and the Governors of Greenwich and Chelsea Hospitals.

### ANNUAL PRIZES.

**PLATE** to the value of £10. for the best proficient in Mathematics amongst the commencing Bachelors of Arts.

The Classical Examination is held at the end of the Lent Term. The Mathematical Examination is at the division of the Easter Term. After each of these examinations prizes, in books, of five and three guineas value, are given to the first and second of the Junior Sophs; and, of the same value, to the first and second of the Freshmen.

## TRINITY HALL.

(FOUNDED 1350.)

*Copies of the Statutes in the British Museum.*

MSS. HARLEY, No. 7029, p. 385.

**A**T this College, more peculiarly appropriated to the study of Civil Law, there are twelve Fellowships, unrestricted as to counties. Bishop BATEMAN, the founder and noble benefactor of this institution, originally intended to have augmented the number to twenty; but dying before the designed foundation was completed, (*viz.* A.D. 1355, at Avignon,) his legacy was only deemed sufficient for the maintenance of a Master, three Fellows, and two Scholars. The nine remaining Fellowships were founded by the following benefactors:—Two by Simon Dalling; three by Bishop Nix; one by Robert Goodnape; one by Dr Hewke; one by Dr Mowse; and one by the College. It is usual that ten of the Fellows should be laymen, and two in holy orders. Graduates in Arts, not of less standing than within one year of the degree of M.A. and Students of three years' standing in Civil Law, are eligible.

There are two Scholarships (of which the present value is about £12. per annum, and which are tenable with other Scholarships) founded by Dr Allen, with preference—first, to founder's kin; secondly, to Scholars from the Free Grammar School at Richmond, Yorkshire; thirdly, to Scholars from any other School in Yorkshire; fourthly, to Scholars from the Norwich Diocese; and fifthly, to Scholars from the town or county of Cambridge. A provision of about £60. per annum, including a Scholarship, is annexed to the office of Chapel Clerk, for holding which the college admits one resident Sizar. There are also three Scholarships of twenty

guineas a year each, not tenable with the office of Chapel Clerk, one of which will be awarded annually to the most deserving Undergraduate at the Midsummer Examination in his first year, and which will be payable for that and the two following years. There are besides eleven Scholarships worth four guineas a term each. All the above Scholarships are tenable only during residence.

## CORPUS CHRISTI COLLEGE.

(FOUNDED 1351.)

*The Statutes have been printed in Dr Lamb's edition of Masters' History of the College. A Copy is in the University Library. Mss. GG. 4. 8.*

**T**HIS College was founded by the benevolence of two Societies or GUILDS in Cambridge termed "GILDA CORPORIS CHRISTI," and "GILDA BEATÆ MARIÆ VIRGINIS:" there are twelve Fellowships; eight are perfectly open; two are appropriated to natives of Norfolk, and two to the Norwich Scholars on Archbishop Parker's foundation. All the Fellows are required to take orders within three years after their election, and the degree of B.D. within eight years after that of M.A.

*The Scholarships and Exhibitions are as follow:*

\* Eight on the old foundation not appropriated.

Three 1567, two 1569, by Archbishop Parker; patrons, the Mayor and Aldermen of Norwich. The former are appropriated to men born at Norwich; the latter to natives of Norwich, Wymondham, or Aylsham, students of their respective schools.

§ Three, 1569.—The right of nomination belongs 1st, To the Dean and Chapter of Canterbury, who are to appoint such sons of their Norfolk, Suffolk, and Lincolnshire tenants as are educated at the school of that city. 2dly, To the Dean and Chapter of Westminster, for students from Westminster School. 3dly, To the Master and Fellows, for students from any seminary in the province of Canterbury. Value £20. a year.

*Note*—All the Scholarships marked § were founded by Archbishop Parker, and to those with the asterisk preceding, the Master and Fellows are the patrons.

\* All the Scholarships to 1618 inclusive, vary from 12. to 20. 3½d. a week; and to those founded in 1567, 1569, (except that founded by Mr Meres) 1574, and 1577, nine rooms are appropriated.

§ Two, 1569, patrons, the Dean of Canterbury and the Master of Eastbridge Hospital, appropriated to natives of Kent, educated at Canterbury School.

§ One, 1574, patrons, the Mayor and Aldermen of Norwich; appropriation the same as in the other scholarships of this patronage.

\* One, 1652, by John Mere, appropriated to a native of Cambridgeshire.

Six, 1577, by Sir Nicholas Bacon, Lord Keeper; patrons, 1st, Heirs male of Sir Nicholas, with the advice of a Fellow sent by the College, and the Master of Redgrave School. 2dly, The Master and Fellows. Appropriation, 1st, to students from Redgrave School. 2dly, In default of such, to any students.

Three, 1580, by John Parker, Esq.; patrons of one, the Archbishop of Canterbury; of the other, the Master and Fellows. Appropriation, the Archbishop to appoint a native of Canterbury, from the school there; the Master and Fellows, natives of Aylsham and Wymondham, educated at their respective schools.

Four, 1695, by Roger Manners, Esq. unappropriated; patrons of three, the Master and Fellows: of the fourth, the Master only.

\* Three, 1618, by Alice Caston, not appropriated; the names of Caston, Clench, Brownrig, and Amfield, to have a preference.

\* One, 1636, by John Borage, value £5. a year; the name and kindred of the founder to be preferred; in default of such, a native of Norfolk or Norwich.

\* One, 1659, by Edward Colman, value £20. a year; appropriated to one or more of the founder's name; in default of such, to four scholars from Norwich and Wymondham Schools.

\* Two, 1677, by Archbishop Sterne, value £10. a year each; appropriated to natives of York and Mansfield; 2dly, to natives of the York Diocese.

One, 1693, by Dr Spencer, the Master patron, not appropriated; value £20. a year with rooms.

\* Three, 1700, by Samuel Chapman, value 1s. a week.

\* Four, 1766, by George Sykes, value £10. a year each; appropriated to students from St Paul's School.

One, 1781, by John Stock, Esq., patrons, Governors of St Paul's School; value £30. a year, with the accumulation during a vacancy, except £15. paid to the college: appropriated to a student from St Paul's School.

\* Twelve, 1794, by Bishop Mawson, given to such students as excel in an annual examination; present value, eight of £30. four of £40. a year each.

### MANUSCRIPT LIBRARY.

The valuable Manuscript Library, left by Archbishop Parker to this college, is under the following particular restrictions:— Every year on the 6th of August, it is to be visited by the Masters or locum-tenentes of Trinity Hall and Caius College, with two scholars on Archbishop Parker's foundation, and if on examination of the library, twenty-five books are missing, or cannot be found within six months, the whole collection devolves to Caius. In that case, the Masters or locum-tenentes of Trinity Hall and Corpus Christi College, with two scholars on the same foundation, are the visitors; and if Caius College be guilty of the like neglect, the books to be delivered up to Trinity Hall: then the Master or locum-tenentes of Caius and Corpus Christi, with two such scholars, become the inspectors; and in case of default on the part of Trinity Hall, the whole collection reverts back to its former order.

## KING's COLLEGE.

(FOUNDED 1441.)

*Copies of the Statutes in the British Museum, MSS. HARLEY, No. 7323.—A Specimen in the University Library, MSS. BAKER, Vol. xxxii. p. 219.*

**T**HIS royal foundation consists of a Provost and seventy Fellows and Scholars; the latter are supplied by a regular succession from Eton College, which was founded and endowed about the same time, by King HENRY VI. The Society of Eton now consists of a Provost, seven Fellows, and Scholars; and the vacancies at King's for the last twenty years, have averaged at above five in the year. The time of electing scholars into the royal foundation of Eton, is about the end of July or beginning of August; at which time a general examination as to their proficiency in classics takes place, before the Provost of each college, the Vice-Provost and Head-Master of Eton, and two *posers* or examiners nominated by King's. After such examination the scholars are placed in the order of their future succession to King's, and on a vacancy in the latter, they are admitted upon that foundation: and after the expiration of three years from the day of their admission, they are chosen \*Fellows, or are no longer Members of the College.

Some *peculiar* privileges appertain to King's. The Provost has absolute authority within the precincts, and by special composition between this Society and the University, its undergraduates (under certain restrictions) are exempt from the power of the Proctors and other University Officers, within the limits of the college: neither by usage do they keep any public exercises in the Schools, or are any way examined for their Bachelor of Arts degree.

\* This and Trinity Hall are the only colleges at which undergraduates can be elected Fellows. Here, however, they are obliged to take both Bachelor's and Master's degree in the University when of sufficient standing, or otherwise they will not be entitled to the full proportion of their dividends.

## ANNUAL PRIZES.

Dr COOKE, (formerly Provost) left £6. to such scholar or scholars as shall be adjudged to have deserved well by application to their studies and general orderly behaviour.—Last year adjudged to Measor, Williams, and Wilkinson.

Dr Glynn bequeathed £20. to be equally divided towards the end of Easter Term, between such scholars of the said college, as have in the course of the year been most distinguished for learning and regularity of conduct.—Last year adjudged to Goodford and Abraham.

There are two £5. prizes for Latin declamations, left by Dr James.

There is also a prize of £5. given by the College to the best translation of an English dramatic writer into Greek Iambics.—The prizemen for the last year were

## QUEENS' COLLEGE.

(FOUNDED 1446—RE-FOUNDED 1465).

*The Statutes have been printed, for the use of the Society. Copies exist in the Univ. Library, MSS. BAKER, XXXII. p. 241, also Brit. Mus. MSS. COLE, XLVII. p. 357.*

**T**HIS College was founded by the two Queens, MARGARET of Anjou, consort of Henry VI. (in 1446,) and ELIZABETH WIDVILLE, consort of Edward IV. (in 1465.)

The President must be elected by a majority of the whole existing body, on the eighth day after a vacancy, and must be (at least) a B.D. possessed of property to the amount of £20. per annum.

There are nineteen Foundation Fellowships. This number may be increased or diminished under certain circumstances pointed out by the statutes. They are restricted as follows:—In general, there can be only *one* Fellow of a county and *two* of a diocese. Middlesex, however, has a title for two Fellows, which (though not in the statutes) was declared valid by the Lord Chancellor, giving judgment for the Visitor, in 1821; there may be also two Fellows for any county in which the college has property sufficient for the maintenance of a Fellow (this privilege is said to include Cambridgeshire, Essex, Huntingdonshire, Kent, and Surrey). There may be three Fellows for the diocese of Lincoln; there may be also three Fellows for the diocese of York, the third (Trotter's Priest) being admitted upon a particular foundation. Wales must be considered as one county and one diocese; Durham, as part of Northumberland; and Rutland, as part of Northamptonshire. All the Fellows within four years from commencing B.A. must proceed to M.A.; those who are on the ecclesiastical foundation must, within two years from M.A. be in Holy Orders, and within nine years from M.A. proceed to B.D. Trotter's Priest must be in Holy Orders at the time

of his election, and, by the will of his founder, is required to preach in York cathedral in the fifth year of his regency. Only two Fellows may remain Laymen, who proceed to M.A. like the rest, and within twelve years from M.A. the one must proceed to D.C.L. the other to M.D. The Vice-President and the five Seniors hold their Fellowships with property; the others recede from the Society when possessed of a real annual income stated in the oath before admission. The five senior Divines may hold livings not exceeding £20. per ann. and within twenty miles of Cambridge. On the petition of the Society, the Crown has frequently *dispensed* with some of the above restrictions.

A *Bye-Fellowship* was founded in 1694, by D. Edwards, gent. This is perfectly open, may be held by a Layman, and is tenable with any property or preferment, except ecclesiastical to a certain amount. Edwards' Fellow has no vote in the Society, and his privileges consist chiefly in a title to rooms and commons.

The *Scholarships* have recently been consolidated into twenty-six, and augmented by college grants, many of them being inconsiderable: they are payable weekly, but only according to residence, on the following scale:—

Eight *Foundation Scholarships* £25. per annum; restricted precisely as the Fellowships, with regard to counties and dioceses; but there must also be one of the diocese of Lincoln. Tenable till M.A. standing; but not when in Holy Orders. Vacated *ipso facto*, if the degree of B.A. be postponed longer than four years after admission into the college. These Scholars are to be preferred *cæt. par.* in the elections to Fellowships.

One *Smith's Scholarship* £20. per annum; with preference to his kin, his name, and Saffron Walden Scholars, then to the name Alston, or to Suffolk men. Tenable till M.A. standing; but not when in Holy Orders.

Three *Smithies' Scholarships*, about £16. per annum; restricted to B.A.'s. Tenable with other Scholarships, till M.A. standing.

Three *Stoke's Scholarships*, £15. per annum; restricted to two of a county, except of Bedfordshire (which is quite open). Tenable till M.A. standing; but not when in Holy Orders. Two of these Scholars are to be the *Chapel Clerks*, and are eligible to any other exhibitions.

\*† Two *Sedgwick's Scholarships*, average £15. per annum, capable of increase to £20. but subject also to diminution;

\* The Scholarships thus marked are in the sole appointment of the Master; the rest are in the appointment of the Master and Fellows present.

one restricted to Bucks, the other to Northamptonshire; (sons of poor Clergymen to be preferred). Require residence of *whole* terms; vacated *ipso facto*, by absence of *two* terms. Tenable with other Scholarships, or even Fellowships, till M.A. standing.

\*† One *Clarke's Scholarship and Librarianship*, £15. per annum.

One *Mountaigne's Scholarship*, £13. per annum. Tenable till M.A. standing.

Two *James's Scholarships*, £13. per annum. Tenable till M.A. standing.

Three *Clarke's Scholarships*, £10. per annum. Tenable till M.A.

Two *Davenant's Scholarships*, £9. per annum. Tenable till M.A. standing.

## ANNUAL PRIZES.

ONE for the best Composition in Divinity by a Bachelor of Arts, 10 guineas.—Last year given to Ds Gibbs.

Two to the best proficient in Mathematics, of the third and second year, five guineas each.—Last year no Mathematical Prize was adjudged to the third year. The prize for the second year was adjudged to Clarke.

Mrs Ramsden also founded ten Scholarships, with the same preference to Yorkshire, and Lincolnshire men, which are now £35. per annum each, with chambers rent free.

Mr Franklin also founded one of £10. per annum, which is appropriated to a person educated at Tamworth School.

Mr Holway founded two of £6. per annum each, which are appropriated to persons educated at Eton, or Merchant Taylors' School.

There are also three Scholarships of £20. 14s. 4d.—eight of £20.—one of £12.—five of £5.—seven of £4.—two of £3. 6s. 8d.—two of £2. 13s. 4d.—and two of £2. per annum each; all perfectly open.

Bishop Sherlock founded the Librarianship, worth £20. per annum, with rooms rent free. He also considerably augmented the salary of the Master's Sizar, present value £34. per annum, with chambers rent free. The Chapel Clerk receives £20. per annum and Commons, with chambers rent free.

## ANNUAL PRIZES.

Books to the value of £5. are given on the Thursday preceding the division of Easter Term, to the best proficient in classics on Mrs Ramsden's foundation. Last year the Prize was adjudged to Stackhouse.

There is annually a Classical and Mathematical examination of the Junior Sophs and Freshmen at the division of the Easter Term, when prizes in books are adjudged to the best proficient in each year.

## JESUS COLLEGE.

(FOUNDED 1496.)

*A copy of the Statutes in the University Library, Mss. Gg. 3. 42. and in the British Museum, Mss. HARLEY. No. 7044, p. 1.*

**A**T this College, founded by JOHN ALCOCK, Bishop of Ely, there are sixteen Foundation Fellowships open to natives of England and Wales, without any restriction or appropriation whatsoever; five of the original foundation, four founded by Dr Fuller, Master of the College, and the rest by various benefactors. Six of the Fellows are required to be in Priest's orders. On every vacancy of a Fellowship, the Master and Fellows nominate two candidates, of whom the Bishop of Ely elects one. There is one Fellowship founded by James Stanley, Bishop of Ely, to which the Bishop has an exclusive right both to nominate and appoint. The Mastership of this college is in the absolute appointment of the Bishop of Ely.

The following is a list of the principal Scholarships and Exhibitions, founded by different benefactors:—

Four, £10. per annum each, appropriated to natives of Nottinghamshire and Yorkshire (i).

Eleven, about £40. per annum each, for clergymen's orphans of all counties in England and Wales. These Scholars must be admitted before they have completed their nineteenth year. The possessors of these Scholarships, founded by Tobias Rustat, Esq. have a classical examination annually on the Thursday in Easter week, at which time, according to their respective merits, a gratuity to each from £20. to £30. (included in the above sum) is given. The visitors are, the

Vice-Chancellor, the Provost of King's, the Master of Trinity, and the Master of Jesus; and in case of the non-attendance of any of these four, the Master of St John's (*a*).

## CHRIST'S COLLEGE.

(FOUNDED 1505.)

*Copies of the Statutes in the British Museum, Mss. HARLEY, No. 7046, p. 155.—No. 7044, p. 61.—No. 3848, and No. 7352.*

**T**HIS College was originally founded (1456) by King HENRY VI. under the name of God's House; and consisted of a Master, three Fellows, and twenty-five Scholars. The building occupied the present site of King's College Chapel, and was removed to make room for that noble structure to its present situation.

In 1505, Lady MARGARET, Countess of Richmond and Derby, mother of King Henry VII. changed the name, incorporated the former Society and its revenues with the present College, and endowed it liberally, to maintain a Master and twelve Fellows. This foundation is for Divinity, and the Fellows are required to take Priest's orders within twelve months after they have attained the proper age. The only appropriation of these Fellowships is to the counties of England and Wales; and the restrictions are, that there shall not be two natives of the same county Fellows at the same time, and that there shall be *six*, and only *six*, of the following nine counties, *viz.* Northumberland, Cumberland, Durham, Westmoreland, Lancashire, Derbyshire, Nottinghamshire, Yorkshire, and Richmond, (this *cum adjacentibus* the Countess calls a county).

King Edward VI. added another Fellow, who shares in emoluments with those on the original foundation. He may be of any county, and is not obliged to take Holy Orders.

Sir John Finch and Sir Thomas Baines founded two more Fellowships, unappropriated as to county, but with preference to the kindred of the founders; the revenues are independent of the college. They may be held by laymen.

These fifteen Fellows have an equal claim to the college patronage, and are allowed by the statutes to hold preferment with their Fellowships, provided it does not exceed the value of ten marks, after the deductions found in the *Liber Regis*.

Lady Margaret founded forty-seven Scholarships of 2s., now augmented to 15s. per week during residence. Three persons only of the same county can be Scholars at the same time.

King Edward the Sixth founded three additional Scholarships.

Besides these, various other Scholarships and Exhibitions have been founded by private benefactors; the principal of them are the following, viz.

Two, founded by Sir John Finch and Sir Thomas Baines, with preference to the kindred of the founders, about £10. per annum each.

Three, founded by the Rev. T. Wilson, appropriated to Scholars from Kirby Lonsdale School, Westmoreland, about £20. per annum.

Three, founded by Bishop Otway, appropriated to Scholars from Kirby Lonsdale School aforesaid, or in default of such, to Scholars from Sedbergh School, Yorkshire, £7. per annum.

One, founded by Dr Patynson, with preference to a native of Northumberland, or in default of such, to a native of the diocese of Durham. Of the same value as the foundation Scholarships.

Eight, founded by the Rev. R. Carr, appropriated to Scholars from Giggleswick School, Yorkshire, £5. per annum.

Three, founded by Mr Petyt, to Scholars from Skipton School, in Craven, Yorkshire, £6. 13s. 4d. per annum.

Two, founded by the Rev. R. Risley, with preference to natives of Lancashire, £4. per annum.

One, founded by the Rev. R. Risley, with preference to the kindred of the founder, secondly, to the county of Huntingdon, about £25. per annum.

One, founded by Mr Broadbanke, to a native of the town of Huntingdon, about £15. per annum.

Four, founded by Dr Seth Ward, Bishop of Salisbury, with preference to natives of Hertfordshire, educated at Buntingford School, £12. per annum.

One, founded by Dr Plume, with preference to a Scholar from Maldon School, or secondly, from Chelmsford School, or thirdly, from Brentwood School, Essex, £6. per annum.

Two, founded by Lady Drury, with preference to Scholars from Scarning, Holt, Swaffham, or Norwich Schools, about £20. per annum.

One, founded by the Rev. C. Clarke, with preference to a native of Norfolk, educated at Norwich School, £10. per annum.

One, founded by Sir Mauris Berkeley, appropriated to a native of Gloucestershire. Of the same value as the Foundation Scholarships.

One, founded by Mr Harvey, with preference to a native of Bedfordshire, £5. per annum.

One, founded by C. Tancred, Esq. with preference to a native of Newmarket, secondly, of the county of Cambridge, about £35. per annum.

Most of these appropriated Scholarships are tenable with the Foundation Scholarships.

Mr Tancred also founded four Divinity Studentships\*, which now amount to £113. 8s. per annum, and are tenable till M.A. The present possessors are, Hildyard, Vaughan, Haslewood, and Green, jun.

\* For the Electors to these Studentships, see Caius college.

\* Scholars.

§ The college nominates two Fellows, Lord Berkeley must present one of them.

## ST JOHN'S COLLEGE.

(FOUNDED 1511.)

*Copies of the Statutes in the British Museum. MSS. HARLEY, No. 7050, (printed in the 5th Report of the House of Commons on Education, p. 404) and in the University Library, MSS. BAKER. Vol. xxix. p. 1.*

**T**HIS College was founded by Lady MARGARET, Countess of Richmond and Derby, mother of King Henry VII. and foundress of Christ's College. The original endowment was for fifty Fellows; but part of the foundation estates having been seized by King Henry VIII. the funds were found to be sufficient for thirty-two only. These are now open to natives of England and Wales, *without any restriction or appropriation whatsoever*\*, except one of them, which is in the appointment of the Bishop of Ely, but he is to elect according to the statutes in every respect, agreeably to an arrangement between James Stanley, Bishop of Ely, and the executors of the Countess of Richmond. In this case, the Master is Visitor to the Bishop.

There are also 21 founded by different benefactors, which have all the privileges of the other Fellowships, and an equal claim to the College patronage.

Candidates for Fellowships must be B.A. at least; and no person is superannuated, provided he has proceeded regularly to his degrees. This being a divinity college, the Fellows are obliged to be in Priest's Orders within six years from the degree of M.A. except four, who are allowed by the Master and Seniors to practice Physic and Law. The rest

\* By Letters Patent from George IV.

must proceed to the degree of B.D. at the regular time. The electors are, the Master and eight Senior resident Fellows, in whom is vested the entire management of all college concerns; and the day of election is the second Monday after Mid-lent Sunday.

The following are the appropriated Fellowships, with their founders :

Four by Mr Ashton; two appropriated to the county of Lancaster or Diocese of Chester; one to the county or Diocese of York; and one to the Bishopric or Diocese of Durham.

One by Mr Bailey, which was augmented by his executor, to the parish of Tamworth, or to the county of Stafford or Derby, or the Diocese of Lichfield and Coventry. The person elected must be a priest at 24 years of age, or within twelve months after.

Two by Mr Beresford, to the name and kin of the founder; then to the parishes of Chesterfield, Wirksworth, and Ashbourne, Derbyshire; or Alconfield, Staffordshire; and next to the counties; and for default of such, to the most apt and able within the University, after the form of the statutes of the college.

One by Sir M. Constable, to a priest of the county of York.

One by Bishop Dee, to his name and kin from Peterborough or Merchant Taylors' School.

One by Dr Fell, to Furness Fell, Lancashire.

Two by Mr Gregson, one to the county of Lancaster, and one to the county of Norfolk.

One by Mr Hebblethwaite, and two by Dr Lupton, to be chosen from scholars on their foundation from the Free Grammar School of Sedbergh, Yorkshire.

Two by Dr Keyton, to the choristers of Southwell, Notts.

One by Lady Rokeby, to Beverley, or the county of York. The person elected must be in Priest's Orders within six months after election.

One by Mr Halytreholm, to Beverley, or any place in the county of York, adjacent to the same. The Fellow must be in Priest's Orders within twelve months from the time of election.

One by Mr Simpson to Cumberland, Northumberland, Westmoreland, or Richmond, Yorkshire.

One by Dr Thimbleby, to the county of Cambridge.

To most of the preceding appropriations, however, is added the following or similar limitation:—"If any such person in learning and manners be found, and virtuous and disposed to learning," &c. and in default of these qualifications, then

the said Fellows to be chosen of such persons "as be most singular in manners and learning, of what county soever they be, and be then abiding in the said college and University."

In addition to the preceding Fellowships there are three founded by Mr Platt, which have been increased in number by the college; open to all candidates, but perfectly distinct from the rest. These Fellows are not entitled to the same privileges as the others; they cannot hold any college office, or succeed to a Foundation Fellowship or living.

## SCHOLARSHIPS AND EXHIBITIONS.

THE number of Scholarships at this College is one hundred and fourteen; four of which, founded by Mr Platt, have been since increased by the college to nine; and are tenable, like the Fellowships founded by him, by candidates born in any county. Nine likewise, founded by the Duchess of Somerset, have been augmented by the Society to sixteen, and are appropriated to those educated at Manchester, Hereford or Marlborough Schools. The remainder unappropriated, by various benefactors.

There are also a considerable number of Exhibitions of different value, the principal of which are the following:—

One, about £100. and two £15. per annum each, founded by Mr Nadin, for students in divinity; founder's kin, or men born in the province of Canterbury.

One, £12. per annum, left by Mrs Jones, to her kindred, or natives of Shropshire.

Two, about £10. per annum each, founded by Mr Robins, to founder's kin, or men born in Kent, with preference to scholars from Sutton Valence School.

Two, £20. per annum each, for scholars from Grantham School, Lincolnshire.

Four, about £9. per annum each, left by Mr Hewytt for scholars from Linton School, Yorkshire.

Two, about £10. per annum each, by Dr Gower, for clergymen's sons, with preference to those educated at St Paul's, London, or the Free School, Dorchester.

Four, about £20. per annum each, by Archdeacon Johnson, for scholars educated at Oakham, or Uppingham Schools.

Thirty unrestricted, about £20. per annum each, left by Sir Ralph Hare, Knight of the Bath.

Six, about £8. per annum each, left by Mr Baker, with preference to founder's kin.

Four, about £14. per annum each, for Scholars from Shrewsbury School.

Three, about 7s. per week during residence, by Mr Mount Stephen, with preference to scholars from Peterborough School.

Four, £70. per annum each, for seven years, for scholars from Shrewsbury School.—Electors, the Trustees of that School.

One, £17. a year, to a scholar educated at some school in Shropshire.—Patron, Wm. Cludde, Esq.

One of £4. per annum, payable by the Fishmongers' Company, who generally considerably augment this Exhibition.

Mr Wright left about £120. per annum, to be disposed of at the discretion of the Master and four Seniors.

Sir Isaac Pennington directed by his Will that good Exhibitions should be given to students born in the parishes of Hawkshead and Colton. Their number and value are at the discretion of the Master and Seniors.

The Sizars at this College are chosen by an Examination which takes place early in the October previous to their commencing residence. The Subjects are the Elements of Geometry, Arithmetic, Algebra, and Plane Trigonometry, and a few Classical Authors fixed upon in the preceding January.

There are nine Sizars, called *Proper* Sizars, on Dr Dowman's Foundation, who have their Commons free, and usually hold Exhibitions, &c. They are chosen from the other Sizars, (after a residence of, at least, three terms), by the Master and Seniors, preference being usually given to those who have ranked high in the classes at the general examinations, and by their conduct have obtained the approbation of the College.

---

A Sermon is preached by one of the Fellows every year at Hatfield, the second Sunday after St Michael, and at Burleigh on the Sunday after St Luke.

All livings under £30. in the King's books, are tenable with College Preacherships, which are thirteen in number.

## ANNUAL PRIZES.

£5. to the best proficient in Moral Philosophy, among the commencing Bachelors of Arts, whose names have appeared in the list of honors. The examination, and decision of the prize are usually before the publication of the first Tripos.—Last year adjudged to Ds Creuze.

Those who are in the first class at two general examinations, one about the 16th of December, the other about the 1st of June, are entitled to a prize of books.

Those whose Themes, Verses, and Declamations, are thought deserving of notice receive a similar reward.

There is also a Voluntary Classical Examination of those who are in their second and third years at the beginning of the Easter Term, and such as distinguish themselves in this and the two general Examinations of the same year receive additional prizes of books.

About £100. is allotted annually for the above purposes.

The Rev. W. Wilson, B.D. formerly Fellow, has given prizes of books to the best readers of the Lessons in Chapel, whose general good conduct entitles them to the approbation of the college.

<sup>1</sup> To this School the Mayor of Stamford appoints a Master, with the advice and consent of the Master of St John's.

<sup>2</sup> In the election to the Mastership of this School the College nominates three, and the Brewers' Company elect one of the three.

<sup>3</sup> The College has the alternate turn of presentation: that turn is the next.

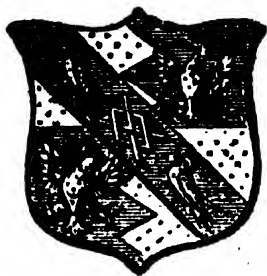

<sup>4</sup> The Living of Marwood must be presented by the College within a month after it is vacated.

\* These five Livings are in the nomination of the Duke of Norfolk, but they must be given to the Foundation Fellows only.

1 This college and Brasenose college, Oxford, present alternately.

2 The Living of Brandesburton must be filled up within one month after it is vacated.

## MAGDALENE COLLEGE.

(FOUNDED 1519.)

*A Copy of the Statutes in the British Museum,  
MSS. SLOANE, No. 3644—10.*

**I**N this College, founded by THOMAS, Baron AUDLEY of Walden, there are four Foundation and thirteen Bye Fellowships, which (two excepted) are equally unrestricted as to counties. All the other Fellows are required to take Orders within three years after election "*si ita Magistro videatur bonum.*"

The foundation Fellowships were left by Lord Audley. The Bye Fellowships were founded by the following benefactors:—

Two by Mr Smith, and an estate at Longstanton, Cambridgeshire, left for their maintenance; the Fellows are obliged, by the will of the founder, to proceed to the degree of B.D. at the regular time.

Two by Dr Goch, may be held by laymen, if the Master pleases.

Two by Mr Dennis, ditto.

Two by Sir Christopher Wray, ditto.

One by Lady Ann Wray, ditto.

One by Mr Spendluffe, tenable for five years only.

One by Dr Millington, appropriated to Shrewsbury School.

One, a Travelling Fellowship, left by the Rev. Drue Drury, worth upwards of £200. per annum, but tenable for only nine years, and appropriated to the county of Norfolk. The Master has the sole appointment to this Fellowship, and the person must either be in holy orders or designed for such.

One by the Countess of Warwick.

Mrs Margaret Dongworth, by a legacy, augmented four of the smallest Bye Fellowships.

The Mastership of this College is in the gift of the possessor of the estate at Audley End.

The following Scholarships were founded by the under-mentioned benefactors.

In default of Shrewsbury men, the Scholarships on Dr Millington's foundation are tenable for three years by natives of any county.

The annual Pepysian Benefaction, value £50. is in the Master's gift.

The foundation estate of Lord Audley consists of the impropriate parsonage of St Catharine Cree Church, in London; and also a considerable part of the city, anciently called Covent Garden Christ Church.

\* In the gift of the Haberdashers' Company.

**T**HIS noble and magnificent College, the Mastership of which is in the appointment of the Crown, was originally endowed by King HENRY VIII. and afterwards augmented by his daughter Queen MARY, for the maintenance of a Master, sixty Fellows, and sixty-nine Scholars.

The government of the College is vested in the Master and the eight senior Fellows; and to such of these as are absent, the resident Fellows next in seniority are considered as deputies, without any express appointment.

The Fellows of this Society are chosen from the Scholars, ineligible if M.A. or of sufficient standing to take that degree: no appropriation whatsoever: all required to go into Priest's Orders within seven years after they commence Masters of Arts, except two, who are appointed by the Master, and permitted to remain Laymen. The one is supposed to study Law, the other Physic. The Scholarships are open to men of any county, except three or four, which are appropriated to Scholars chosen annually from Westminster School; and one of £37. per annum, founded by Mr Newman, for a native of Kent and Cambridgeshire alternately.

Of the value and number of the Exhibitions, the following is a statement\*.

† Four, Dr Lewis, £8. 6s. per annum each, to four scholars who are natives of North Wales.

One, Lady Jermyn, £7. 10s. to the payment of which Scholarship a non-resident Bachelor is equally entitled. Appointed by the Master.

\* Exhibitions marked † are paid by the Representatives of their respective founders.

One, Mr Elwes, £6. for a Scholar appointed by the Master.

Five, Mr Perry, £10. per annum each, to Scholars from St Paul's School, London. If the number is incomplete, the £50. is shared equally amongst them.

† One, Mr Hope, £3. 8s. 8d. for Scholars from Lynn School.

† Two, Lady Verney, (estate at S. Littleton,) for Scholars from Cranbrook or Warwick School.

Various benefactions to the amount of £136. are consolidated and divided among the resident Sizars; to whom also all Noblemen pay two guineas, and Fellow-Commoners one guinea each per quarter.—There are also sixteen Sizars upon the foundation, who are entitled to commons, rooms, and the principal part of the emoluments: to these the supernumerary Sizars succeed in the order of their places in the classes at the Annual Examinations.

### ANNUAL PRIZES.

Dr Paris left a prize of £4. for the best Latin Declamation. The successful student delivers on the 6th of December (the day after the audit) a panegyric upon some illustrious character. A second Latin Declamation prize has been instituted by the College.—These prizes were last year adjudged to Rawle and Howes.

Dr Hooper left three silver goblets as prizes, one of £20. the other two £10. value each, for the three best English Declamations, upon subjects relating to the History of England. The person who gains the first prize, delivers on the Commemoration-day another Declamation on a general subject.—Last year adjudged to Rawle, Goulburn, and Musgrave.

Any junior Bachelor of Arts who writes the best Essay on the conduct and character of King William III. is entitled to a prize of £10. left by Mr Greaves of Fulbourn.—Last year none adjudged.

Two prizes have been instituted by the College, for the best compositions in Latin Verse; in Lyrical, Heroic, and Elegiac metres: a subject is proposed at the beginning of each term, and the prizes are awarded to the authors of the *three* Exercises, the aggregate merits of which are considered the greatest.—Last year adjudged to Mansfield and Selwyn.

Dr Walker gave £10. to purchase books for one or more poor Scholars, who shall appear to the Master, Vice-Master, and Senior Dean, most deserving at the time of taking the Bachelor's degree.—Last year adjudged to Ds Seager.

The best reader in Chapel receives £4. the second ditto £2. at the discretion of the Senior Dean. Last year adjudged to Goulburn and Merivale.

A prize has been instituted by the College for the best English Essay, on some Literary, Moral, or Antiquarian subject.—Last year none adjudged.

Immediately after the division of the Easter Term, the Sophs, Junior Sophs, and Freshmen, are publicly examined in the hall, and divided into classes according to their respective merits; those who are in the *first class* of each year, are intitled to a prize of books which are distributed on the Commemoration-day. The examiners are, the Head-Lecturer, the Greek and Latin Lecturers, and the four Sub-Lecturers. The following are the respective first classes, as settled at the last Examination. The names are arranged alphabetically :—

## EMMANUEL COLLEGE.

(FOUNDED 1584.)

*Copies of the Statutes in the British Museum.*

MSS. SLOANE, No. 1739.

**T**HIS College was founded by Sir WALTER MILD MAY, Chancellor of the Exchequer and Privy Counsellor in the reign of Queen Elizabeth. The number of Foundation Fellowships is twelve; besides one founded by Mr Gillingham, the possessor of which receives a dividend arising from a distinct Estate, but is in most other respects on an equality with the Foundation Fellows. These thirteen Fellowships are open to Englishmen of all counties, with this restriction, that there cannot be more than one Fellow of the same county at the same time; and no man can be a candidate till he has taken the degree of M.A. or is at least B.A. of the third year. He must be twenty-one years of age, and have been six years a member of the University. All the Fellows are obliged to proceed to the degrees of M.A. and B.D. as soon as they are of sufficient standing. The four Seniors are obliged to take Priest's Orders.

Besides these thirteen there are two on Sir Wolstan Dixie's foundation, who are obliged to proceed to their degrees equally with those on the original foundation, but they have no vote in any college affairs, nor any claim to the offices or dividends of the college. Candidates for these Fellowships must have taken the degree of B.A. and must be related to the founder, or have been educated at Market Bosworth School in Leicestershire. The heirs of the founder nominate and the college admits the nomination. There are likewise four Scholarships of Sir W. Dixie's foundation, subject to the same restrictions.

The Foundation Scholarships are open to Englishmen of all counties; but there cannot be more than three Scholars of the same county, at the same time. The Scholars receive upwards of £12. per annum in addition to the weekly payment of 7s. 6d. during residence. Besides these there are many Scholarships and Exhibitions, founded by various benefactors, to be given to the candidates most distinguished for learning and exemplary conduct.

Five by Dr Thorpe, of £24. per annum, with a preference, *cæteris paribus* to the sons of orthodox clergymen.

One by Mr Hubbard, of £12. per annum, to the best of Dr Thorpe's scholars.

Ten by Mr Ash, of £10. per annum.

Four by Archdeacon Johnson, of £24. per annum, with a preference to candidates from Oakham and Uppingham Schools.

One by Dr Smith, of £16. per annum, with a preference to Durham and Newcastle Schools.

Two by Mr Richards, of £12. per annum, with a preference to Christ's Hospital. The Scholars receive an allowance towards the expence of their B.A. and M.A. degrees.

Four by Dr Whicheot, of 4s. per week during residence, who are entitled to the same privileges as those of the foundation.

One by Sir Busick Harwood, of £10. per annum, with a preference to a medical student.

There are several others of weekly payments, which, in addition to the former, are given to the most deserving candidates.

## ANNUAL PRIZES.

At the division of the Easter Term, there is a general Examination of the Undergraduates, when a prize of Books is given to the best proficient in each year.

## SIDNEY SUSSEX COLLEGE.

(FOUNDED 1598.)

*A Copy of the Statutes in the British Museum.*

MSS. COLE, XLVI, p. 193.

**A**T this College, founded by Lady FRANCES SIDNEY, Countess of Sussex, there are nine Foundation Fellowships, all open to the natives of any part of his Majesty's dominions. Besides the Foundation Fellowships, there are two founded by Mr Peter Blundell, appropriated to his scholars of this College; and one Fellowship founded by Leonard Smith, the nomination of which is vested in the Warden and Company of Fishmongers. The Blundell Fellowships are tenable for only ten years after the degree of M.A., but in other respects the Fellows have nearly the same privileges, authority, &c. as the Foundation Fellows.

A Mathematical Lectureship, present value £140. per annum, was founded by Mr Taylor. The Lectureship is not tenable with a Fellowship, but may be held by a layman.

This is a Divinity College, and all the Fellows of every description are obliged to take orders within three years from the time of their election, and the degree of Bachelor in Divinity, at the regular period prescribed by the University Statutes\*.

No Fellow of this College derives any benefit from his Fellowship unless he be a Master of Arts complete.

\* Seven years after M.A.—*Stat. Acad.* p. 166.

## SCHOLARSHIPS.

**TWENTY** Foundation Scholarships, perfectly open, value 7s. each per week during residence.

Two Scholarships founded by Mr Peter Blundell, appropriated to Scholars from Tiverton School.

## EXHIBITIONS.

**ARCHDEACON** Johnson left four Exhibitions, now £20. per annum each, with preference to those educated at the Schools of Oakham or Uppingham, in Rutland.

Mr Lovett founded two Exhibitions for Clergymen's sons, now £45. per annum each. Preference is given to candidates who have been three years at Grantham or Oakham School.

Mr Bearcroft left two Exhibitions for Clergymen's sons, value £12. each per annum.

The College has also two Exhibitions, value £12. each per annum, from the Company of Haberdashers, and one of the value of £6. from the Company of Fishmongers.

The College has lately established several Exhibitions on the foundation of Mr Taylor; one Exhibition is to be declared vacant annually. The examination is confined to Mathematics only, and is open to Candidates from any College in the University; but the successful candidate, if elected from another College, must remove to Sidney on his election. The present value of each Exhibition is £50. per annum, with rooms in College rent free.

## EXHIBITIONERS, 1835.

Bickersteth, Sidney.  
Osbourne, St John's.

## ANNUAL PRIZES.

A PRIZE of £10. for the best proficient in Mathematics at the time of taking the degree of B.A. provided his name appears on the first Tripos.

An annual examination takes place immediately before the division of the Easter Term, when prizes in books to the value of £9. and £6. are adjudged to the best proficient in Mathematics and Classics respectively.

A third sum is now given for creditable attainment in the elements of Divinity.

There are likewise prizes for the best Latin and English Declamations, the best Latin Theme, and one for the best Reader in Chapel.

## DOWNING COLLEGE.

(FOUNDED SEPT. 22, 1800.)

*The Charter and Statutes are printed.*

**T**HIS College will consist of a Master, two Professors (one of the Laws of England and one of Medicine,) sixteen Fellows (two of which only are Clerical,) and six Scholars. The objects of the foundation are stated in the Charter to be Students in Law, Physic, and other useful arts and learning. At present only the Master, Professors, and three Fellows, are appointed, for the purpose of taking possession of the estates, administering the revenues, superintending the building of the College, and for the other necessary purposes. The appointment of the remaining Fellows is reserved until after the erection of the buildings necessary for the College.

The Scholars will also be elected after that period; but not more than two in each year. There are also two Chaplains, nominated by the Master.

The Master is elected by the Archbishops of Canterbury and York, and the Masters of St John's and Clare Hall, from among those who are or have been Professors or Fellows. The electors to the Professorships are the same as to the Mastership, with the addition of the Master.

The Professor of Law must be, at the time of his election, D.C.L. M.A. or B.C.L. of Cambridge or Oxford, of ten years' standing from matriculation, and a barrister at law. The Professor of Medicine must be M.A. licensed to practise Physic for two years, or M.D. or M.B. of Cambridge or Oxford, or a Member of a Scotch University of seven years' standing, and twenty-five years of age, and who shall have attended the medical lectures in one of the Scotch Universities for four years. The Professors are bound to read a course of lectures in their respective faculties, on the usual terms upon which public lectures are given in the University. The Professor-

ships are not vacated by marriage, or by the possession of any property, and the Professors are capable of holding any of the lay offices in the College.

The electors to the Fellowships are, the Master, Professors, and Fellows of the degree of M.A. After the building of the College is completed, the elections will be annually on the 21st of February. All graduates of Cambridge or Oxford are eligible; but, after the completion of the College, Lay Fellows must be under the age of 24, and Clerical Fellows under 30, and above 23, at the time of election. The only restriction is, that there shall never be eight Fellows natives of the same county at one time. While the College remains uncompleted, the elections to Fellowships are at uncertain times, depending upon the vacancies, and not subject to the conditions of the statutes.

The Clerical Fellowships will be tenable for life; and subject to residence for a certain part of each term. The Lay Fellowships continue only for twelve years, and are not subject to any residence. Every Lay Fellow must declare either for Law or Physic. Those who declare for Law must be called to the bar within eight years after their election; and the Medical Fellows must take the degree of M.D. within two years after they are of sufficient standing. A Lay Fellow may also take orders after six years, without thereby vacating his Fellowship. Under certain circumstances, the four electors to the Mastership have a power to suspend the vacancy of a Lay Fellowship; but this power is limited to two Fellows living at any one time.

The sole founder of this College was Sir GEORGE DOWNING, Bart.\* of Gamlingay Park, in this county; who, by a will, dated 20th December, 1717, devised his estates in the counties of Cambridge, Bedford, and Suffolk, first to Sir Jacob Garrard Downing, and afterwards to other relations in succession, and, in failure thereof, to build and found a College in this University, upon a plan to be approved by the two Archbishops and the Masters of St John's and Clare Hall. This direction was the reason for giving them the power which they possess in elections and other matters, by the charter and statutes.

Sir George died in 1749, and Sir Jacob in 1764, and (the other devisees having previously died without issue) upon this event the foundation ought immediately to have been carried into execution. But the estates were in the possession of Lady Downing, and afterwards of her devisees, without any real title, and when the University sued in Chancery

\* He was installed a Knight of the most honorable Order of the Bath, June 30, 1732.

for the establishment of the College, the party in possession resisted the suit in that court. In 1769, a decree was obtained in favour of the foundation.

The persons named as trustees in the founder's will having died in his lifetime, the execution of the trusts devolved upon the heirs at law; who, after combating a long series of opposition and litigation, and overcoming obstacles of various descriptions, preferred a petition to the Crown for a Charter; and at length, in 1800, the Privy Council decided to recommend the foundation to his Majesty.

On the 22d of September, 1800, the Great Seal was affixed to the Charter by Lord Loughborough. By this Charter the College is incorporated, with all the privileges belonging to any College in the University, and endowed with the estate devised by the founder, with a power to hold landed property (in addition thereto) to the value of £1500. per annum.

The Charter directs statutes to be framed for the government of the College, which was done in July 1805, and shortly afterwards the stipends of the members began to be paid.

By the statutes, no beneficial leases of the College estates are allowed, nor any fine to be taken for a grant or renewal. It is also provided that no new foundation shall be ever engrafted on this College, which shall be inconsistent with the Charter and statutes. But the College may accept any additions to their property in augmentation of the number or value of their present appointments, or to be applied in any other manner consistent with their present constitution.

There is also a power given to the four electors and the Master, to alter the statutes, on application by a certain portion of the College.

The members appointed in the Charter were, Francis Annesley, D.C.L. *Master*: Edward Christian, M.A. and Barrister, *Law Professor*; Busick Harwood, M.D. *Professor of Medicine*; John Lens, Sergeant at Law, and M.A., William Meeke, Barrister, and M.A., and William Frere, B.A. *Fellows*.

The late Mr John Bowtell, of this town, who gave by his will a considerable property to charitable uses, bequeathed to Downing College a collection of books, manuscripts, fossils, and antiquities, with a request that the book-cases containing them might be placed in the college library. Among the manuscripts is a History of the Topography and Antiquities of this town, prepared for publication by Mr Bowtell.

A piece of land nearly thirty acres having been purchased for the site, and for grounds and walks, on the 18th of May, 1807, the first stone was laid; since which time the building has proceeded at intervals, at the expence of above £60,000.

In 1821, buildings sufficient for opening the College, and comprising nearly two sides of a large court, were completed : and in May, 1821, undergraduates were admitted to reside and keep Terms.

EXAMINERS.

EDWIN STEVENTON, M.A. Corpus Christi College.  
FRANCIS MARTIN, M.A. Trinity College.

WEDNESDAY, *January* 14, 1835.

9 o'clock, to 11½.

*First, Second, Third, and Fourth Classes.*

1. THE opposite sides and angles of parallelograms are equal to one another, and the diameter bisects them. If both the diameters be drawn, the parallelogram will be divided into four equal parts.

2. Upon the same base and upon the same side of it there cannot be two similar segments of circles not coinciding with one another.

3. Required the amount of £819. 4s. in 6 years, allowing £12. 10s. per cent., both simple and compound interest.

4. Investigate the rules for the multiplication and division of algebraical fractions; and reduce  $\frac{x+\sqrt{x^2-1}}{x-\sqrt{x^2-1}} - \frac{x-\sqrt{x^2-1}}{x+\sqrt{x^2-1}}$  to its simplest form.

5. If  $a$  be prime to  $b$ , there is no other fraction equal to  $\frac{a}{b}$ , whose terms are not equimultiples of  $a$  and  $b$ .

6. When four quantities are proportionals, the sum of the first and second is to their difference as the sum of the third and fourth to their difference.

Having given two sides and the included angle of a plane triangle, find the remaining side and angles.

8. Prove that

$$(\cos a + \sqrt{-1} \sin a) (\cos b + \sqrt{-1} \sin b) (\cos c + \sqrt{-1} \sin c) \\ = \cos (a+b+c) + \sqrt{-1} \sin (a+b+c) :$$

$$\text{also, } (\cos a + \sqrt{-1} \sin a)^{\frac{1}{3}} = \cos \left( \frac{4n\pi + 2a}{3} \right) + \sqrt{-1} \sin \left( \frac{4n\pi + 2a}{3} \right).$$

9. Find the equation to a straight line passing through a given point and perpendicular to a given straight line. Shew that the equation

$$y^2 - xy - 2x^2 + 5x - y - 2 = 0$$

represents two straight lines.

10. Investigate the polar equation to an ellipse, the focus being the pole; and find the position of the distance which is half the sum of the greatest and least distances.

11. If  $E$  be the point of intersection of  $SP$  and  $CD$  in an ellipse, shew that  $PE = AC$ .

12. Supposing  $a_1 a_2 \dots a_n$  to be the  $n$  roots of an equation  $X=0$ , shew that  $X = (x-a_1)(x-a_2)\dots(x-a_n)$ .

13. Shew how the solution of a biquadratic equation may be made to depend upon that of a cubic; and exhibit the roots of the biquadratic in terms of the three roots of the cubic.

14. Shew how the logarithm of a number consisting of 6 digits may be found from a table calculated for numbers not exceeding 5 digits, and having given  $\log 33819 = 4.5291608$ ,  $\log 33818 = 4.5291479$ , find  $\log 338185$ .

$$15. \text{ Express } \frac{a+b\sqrt{-1}}{c+d\sqrt{-1}} \text{ and } \log_e(a+b\sqrt{-1}) \text{ in the form } A+B\sqrt{-1}.$$

16. If the two sides  $CA$ ,  $CB$  of a spherical triangle  $CAB$  be quadrants, shew that  $C$  is the pole of the arc  $AB$ .

17. In applying Napier's rules to the solution of quadrantal spherical triangles, what are to be considered the circular parts? Having given the two sides, find the angle opposite to the quadrantal side.

18. Shew how to transfer a number from one scale of notation to another, and express 123.45 in a scale whose radix is 5.

19. Investigate those sections of an oblique cone which are circular.

WEDNESDAY, *January* 14, 1835.....1 to 4.

*First, Second, Third, and Fourth Classes.*

1. EXPLAIN the construction and graduation of the common steel-yard. On what account is the common balance preferable in determining small weights?

2. Find the relation of  $P$  to  $W$  in the isosceles wedge.

3. Shew in what case a body will remain at rest, when placed on a horizontal plane.

4. Define Mass and Weight ; and state the measures of moving and accelerating force. Describe some simple experiments by which it appears, that when pressure communicates motion directly, the momentum communicated in a given time is proportional to the pressure.

5. A body is projected vertically downwards with a given velocity, find the time of describing a given space ; and explain the two roots of the quadratic equation.

6. A body is projected from the top of a tower with a given velocity and in a given direction, find the range on the horizontal plane passing through the foot of the tower, and the time of flight.

7. What is the nature of the transmission of fluid pressure ? Apply the principle to explain Bramah's press.

8. Compare the specific gravities of a solid and fluid, the specific gravity of the solid being less than that of the fluid.

9. Having given the graduations of two thermometers for freezing and boiling water, determine the graduation of one, when the other marks  $t^{\circ}$ .

10. An object is placed between two plane mirrors inclined at an angle of  $20^{\circ}$ , find the locus of the images and their number.

11. A small pencil of rays is incident directly on a convex spherical refractor of a denser medium, find the focus of emergent rays. When the incident pencil is converging, determine for what positions of its focus the convergency is increased by the refraction.
12. Explain the construction and use of Hadley's Sextant: when applied on land to determine the altitude of a star, how is the want of an accurate horizon supplied?
13. Enunciate and prove Newton's eleventh Lemma. What is meant by saying that every curve of finite curvature is ultimately a parabola? How is it proved?
14. Prove that  $F=2$  limit  $\frac{QR}{T^2}$ , and find the space due to the velocity at any point by the action of the force at that point continued uniform.
15. A body is projected with a given velocity at a given distance from a center of force varying inversely as the square of the distance, shew that the axis major of the orbit described is independent of the direction of projection.
16. State the observations by which the changes in the Sun's right ascension and declination are determined. How does it appear that the section of his apparent orbit with the celestial sphere is a great circle?
17. Compare the lengths of the longest day at two given places. What is the least latitude, in which the Sun does not set for 24 hours?
18. Explain the nature and cause of Aberration. In what plane does it take place? Supposing the right ascension of  $\gamma$  Draconis to be  $270^\circ$ , describe the effects of Aberration on this star at the equinoxes and solstices, which led Bradley to the discovery of Aberration; and illustrate your explanation by a figure.

THURSDAY, *January 15, 1835.....9 to 11½.*

*First, Second, Third, and Fourth Classes.*

1. If three forces keep a point in equilibrium, and three lines be drawn making with the directions of the forces three equal angles towards the same parts; these three lines will form a triangle whose sides will represent the three forces respectively.

2. By what experiments is it proved that the friction between the same substances depends only upon the pressure? Shew how the coefficient of friction may be practically determined.

3. If in a system consisting of any number of particles a point be taken, and if each particle be multiplied by the square of its distance from the point, the sum of these products will be the least when the point is the centre of gravity.

4. In the direct impact of two perfectly elastic bodies the sum of each body multiplied by the square of its velocity is the same before and after impact. Shew that the same is true when the bodies impinge obliquely.

5. A heavy body oscillates in a circular arc, find the tension of the string in any position of the body.

6. If a rigid body move in any manner whatever, its *vis viva* at any instant is equal to the *vis viva* of the whole mass collected at its centre of gravity, together with the *vis viva* round its centre of gravity.

7. Find the magnitude and direction of the resultant of the pressure of a fluid on the surface of a solid immersed in it.

8. Describe the common barometer, and find the correction to be applied when a small quantity of air remains in the upper part of the tube. What other circumstances affect the accuracy of the apparent altitude?

9. Define the term *critical angle*; and prove that a pencil of rays cannot pass through a prism whose refracting angle is greater than twice the critical angle of the substance of which it is composed.

10. Find the magnitude and position of the least circle of aberration when a pencil of diverging rays is refracted directly at a plane surface.

11. In the astronomical telescope, whether with a simple or compound eye-piece, determine the magnifying power; and shew that it is equal to the  $\frac{\text{breadth of the object glass}}{\text{breadth of the emergent pencil}}$ . How does this enable us to determine practically the magnifying power?

12. Determine the coefficient of refraction from observations of circumpolar stars. If the declination of any one star be known correctly, shew how a table of refraction may be formed.

13. Shew from observation that the curve which the Earth describes round the Sun is an ellipse, and determine its eccentricity.

14. Supposing an approximate value of the longitude of any place on the Earth's surface to be known, shew how a more correct value may be found from an observed occultation of a fixed star by the Moon. How may the possible errors of the lunar tables be obviated?

15. Whilst the Earth moves from perihelion to aphelion, the mean motion of the Moon is retarded, and conversely. NEWTON. *Prop.* 66. *Cor.* 6.

## AFTERNOON PROBLEMS.

THURSDAY, *January* 15, 1835.....1 to 4.

1. If the diameter of the Earth, supposing it a sphere, be 7916 miles, find the length of a French metre, which is one ten-millionth part of a fourth of its circumference.

2. Shew that if  $a, b, c$  be in geometric progression,  $\log_a N, \log_b N, \log_c N$  are in harmonic progression; and that if  $u$  represent any root of the equation  $x^n - 1 = 0$ , two roots of the equation  $x^{2n} - 2x^n \operatorname{cosec} 2\alpha + 1 = 0$  are represented by  $(\tan \alpha)^{\pm \frac{1}{n}} \cdot u$ .

3. Three circles whose radii are  $a, b, c$ , touch each other externally; prove that the tangents at the points of contact meet in a point, whose distance from any one of them  $= \left\{ \frac{abc}{a+b+c} \right\}^{\frac{1}{2}}$ .

4. A billiard ball  $A$  in motion is struck by an equal one  $B$  moving with the same velocity, and in a direction making an angle of  $\alpha^\circ$  with that in which  $A$  is moving, in such a manner that the line joining their centers at the time of impact is in the direction of  $B$ 's motion; find the velocities of the bodies after impact, and shew that that of  $A$  will be a maximum, when  $\tan \frac{\alpha}{2} = \left( \frac{1+e}{2+e-e^2} \right)^{\frac{1}{2}}$ ,  $e$  being the elasticity of the bodies.

5. If  $S$  be the surface of a spherical triangle, each of whose angles is  $120^\circ$ , and  $S'$  that of its supplemental triangle,

$$\tan \frac{S}{3} : \tan \frac{S'}{3} = 6\sqrt{2} + \sqrt{3} : 2\sqrt{2} - \sqrt{3}.$$

6. When the price of barley is  $p$  shillings a quarter, a farmer gains  $r$  per cent. on the capital he expends on a farm of  $n$  acres, in which the produce of each acre increases in an arithmetic progression, and the worst acre repays only the cost of its cultivation. When the price falls

to  $(p-q)$  shillings, shew that in order that each acre may at least repay the capital expended upon it, which is the same for all, *not fewer* than  $\frac{50(n-1)q}{r(p-q)}$  acres must be thrown out of cultivation.

7. Three equal rods  $AW$ ,  $BW$ ,  $CW$  without weight support a weight  $W$ ; their lower ends rest on a smooth horizontal plane and are connected by strings in such a manner that the rods and strings form the edges of a regular tetrahedron; if the string  $BC$  be cut, and the point  $A$  be prevented from sliding, compare the velocities of the ends of the rod  $BW$ , and shew that they are equal, when the string  $AB$  has revolved through  $15^\circ$ .

8. In the spiral, whose equation is  $r = a \sec \frac{\theta}{2}$ , the area included by the curve, the asymptotes and the tangent at the apse  $= 4a^2$ .

9.  $S$  is a center of force, which varies as  $(\text{dist.})^{-2}$ . From different points in the straight line  $SA$ , bodies are projected at right angles to  $SA$  with velocities, which are inversely as their distances from  $S$ . Shew that the orbits described will all pass through the circumference of a fixed circle, and that the periodic times will be as the cubes of the minor axes.

10. Compare the duties of an atmospheric steam engine for one oscillation of the piston, (1) when the cylinder as usual is open at the top, (2) when hermetically closed.

11. Determine the distance at which a short-sighted person can see distinctly, from observing the angle through which a glass prism is turned from its position of minimum deviation, in order that he may see distinctly through it a line of homogeneous light.

Where must an eye be situated, in order that when a luminous point is placed in the axis of a convex lens, the lens may appear wholly illuminated?

12. Find the center of gravity of the surface of an equilateral spherical triangle.

13. The Earth is touched by two equal conical surfaces, the planes of whose bases coincide with that of the equator; and its surface appears projected upon them to an eye placed in its center. Shew that by a proper assumption of the form of the cones, the Earth's surface may be thus projected on a plane circle; and illustrate the formation of the chart by laying down the position of a place of given latitude and longitude.

14. Determine the position of the place nearest to the north pole, at which the Sun rises on a given day at the same instant as at Greenwich. If  $y, z$  be the zeniths of the place and Greenwich, and  $yzx$  a quadrant of a great circle on the celestial sphere, the projection of the locus of  $x$  on the horizon of  $z$  is an arc of an ellipse, whose eccentricity = cos. lat. of Greenwich.

15. A luminous point is placed at a given distance from a plate of glass bounded by two parallel planes ; required the form of the emergent wave of light at a given time.

16. If in a given right-angled triangle elliptic quadrants be inscribed, of which the axes coincide with the sides of the triangle, the locus of the points of intersection of their chords is the evolute of a quadrant of an ellipse.

17. The area of a section of an ellipsoid, made by a plane passing through the center and inclined at angles  $\alpha, \beta, \gamma$  to the principal axes,

$$= \frac{\pi a b c}{\{a^2 \sin^2 \alpha + b^2 \sin^2 \beta + c^2 \sin^2 \gamma\}^{\frac{1}{2}}}$$

18. Integrate the following equations :

$$d_x u = \left( \frac{a}{x^2} - \frac{x}{a^2} \right)^{\frac{1}{2}}, \quad d^2_x y \cdot (d_x x)^2 - d^2_x y = y \text{ where } x = e^t + e^{-t},$$

$$d^2_x y + (d_x y)^2 = \frac{3}{4x^2}, \quad x^2 d^2_x z - y^2 d^2_x z = x y,$$

prove also that

$$(f_{x=0} - f_{x=\frac{a}{2}}) \frac{1}{\sqrt{2ax-x^2} (a^2-x^2)} = \frac{2}{3a} \left\{ F_{\frac{1}{2}}(0) - F_{\frac{1}{2}}\left(\frac{\pi}{2}\right) \right\},$$

and that

$$(f_{x=\infty} - f_{x=a}) e^{-x^2} = \frac{e^{-a^2}}{2a} \cdot \frac{1}{1 + \frac{1}{2a^2}} \cdot \frac{1}{1 + \frac{2}{2a^2}} \cdot \frac{1}{1 + \frac{3}{2a^2}} \cdot \frac{1}{1 + \&c.}$$

19. Find the equation to the surface, in which lie all the evolutes to the curve formed by the intersection of the surfaces,  $y^2=4a(x+z)$ ,  $z^2=4a(x+y)$ ; and determine the equations to that evolute, which cuts the axis of  $x$  at a distance  $7a$  from the origin.

20. A cone of given form, and supported at  $G$  its center of gravity, has a motion communicated to it, round an axis through  $G$ , perpendicular to the line joining  $G$  with a point in the circumference of the base, and in a plane passing through this point and the axis of the cone. Determine the position of the invariable plane; and explain clearly the motion of the cone's vertex.

21. The pole of the Earth, affected only by the Sun's attraction, traces out a curve on the celestial sphere, whose equation is

$$\frac{\tan i}{n} \cdot \theta = \cos^{-1} \frac{\phi-i}{n} - \left\{ 1 - \left( \frac{\phi-i}{n} \right)^2 \right\}^{\frac{1}{2}},$$

where  $\phi=KP$ ,  $\theta$  equal the inclination of  $KP$  to an arc drawn through  $K$  and the first point of  $\varphi$ ,  $n$  a constant quantity, and  $i$  the mean value of  $\phi$ .

22. Explain the method, by which the parallax of a fixed star has been attempted to be found by observations on the fixed double stars; and investigate an equation for determining the times of the year, at which the observations on a given star for this purpose may be most advantageously made.

If at one of these times  $u$  be the difference of the longitudes of the Sun and star,  $\lambda$  the latitude of the latter,  $\delta$  the angular distance between the two stars, and  $\alpha$  the change of position of the line joining them in the course of half a year, shew that the parallax of the greater star  $= \alpha \sin \delta \sqrt{1 + \cos^2 u \cdot \cot^2 \lambda}$ .

23. Define the axes of elasticity of a crystal; and supposing the displacement of a molecule to be exceedingly small compared with the distances between the molecules, and proportional to the force resulting from it, prove that there are three axes of elasticity in every crystal at right angles to each other.

24. The error, arising in the computation of the velocity of sound in any gas from neglecting the change of temperature, is corrected by the introduction of a factor  $\sqrt{K}$ , explain the *physical* meaning of  $K$ : and shew that if its value for atmospheric air be known, its corresponding

value for any known gas may be found by comparing with a monochord the fundamental notes in two equal tubes of the air and gas under the same pressure and at the same temperature.

FRIDAY, *January* 16, 1835.....9 to 11½.

*First, Second, Third, and Fourth Classes.*

1. IN equal circles sectors have the same ratio which the circumferences on which they stand have to one another.
2. If a solid angle be contained by three plane angles, any two of them are greater than the third. How may the magnitudes of two solid angles be compared?
3. A number is divisible by 9, if the sum of its digits is divisible by 9; and by 11, if the sum of the 1<sup>st</sup>, 3<sup>rd</sup>, 5<sup>th</sup>... digits is equal to the sum of the 2<sup>nd</sup>, 4<sup>th</sup>, 6<sup>th</sup>... digits.
4. Explain the method of solving the indeterminate equation  $ax+by=c$  by continued fractions; and shew how the number of solutions may be determined.
5. Shew that all the rational roots of an equation can always be found. Apply the general method to solve the equation
 
$$2x^3-3x^2+2x-3=0.$$
6. Resolve  $x^{2n}-1$  into its quadratic factors, and write down the result when  $n=5$ .
7. If  $\theta$  be a small arc,  $\sin \theta = \theta - \frac{\theta^3}{6}$  nearly. What alteration must be made in this formula when  $\theta$  is given in seconds?
8. Express the cotangent of the angle of a spherical triangle in terms of another angle and the sides including it; and reduce the formula to one adapted to logarithmic computation.
9. In the ellipse  $PV \cdot VG : QV^2 :: CP^2 : CD^2$ .
10. Having given the equation to a plane, determine the constants in terms of the distances from the origin of the intersections of the plane with the co-ordinate axes, rectangular or oblique. In the

former case, what are the equations to a line perpendicular to the plane, and passing through the origin?

11. Shew that  $Ay^2 + By + Cx + D = 0$  is the equation to a parabola, and determine the position of the vertex and magnitude of the latus rectum.

12. Express  $f(x)$  in a series ascending by powers of  $x$ , when the expansion is possible. Apply the method to  $\log(a+bx)$ .

13. Determine the values of  $x$  which make  $(x-a)(b-x)^2$  a maximum or minimum, distinguishing between them.

14. Explain on what the contact between two curves at an assigned point depends. Find the radius of curvature at a given point of the curve determined by the equations

$$x = a(1 - \cos \theta), \quad y = a(\theta + \sin \theta).$$

15. Having given the equation to a spiral between  $r$  and  $\theta$ , find the equation between  $p$  and  $r$ . Ex.  $r = a \sec n\theta$ .

16. Find the differential coefficient of the volume of a solid of revolution, and determine the volume generated by the revolution round the axis of  $x$  of the area of the curve whose equation is

$$ay = x\sqrt{a^2 - x^2}.$$

17. Integrate the differential coefficient  $\frac{1}{x^2(x^2 - x - 2)}$ ,

and make  $\int_x \frac{x^n}{\sqrt{2ax - x^2}}$  depend on  $\int_x \frac{x^{n-1}}{\sqrt{2ax - x^2}}$ .

### AFTERNOON PROBLEMS.

FRIDAY, *January* 16, 1835.....1 to 4.

1. SUPPOSING  $\frac{ad-bc}{a-b-c+d} = \frac{ac-bd}{a-b-d+c}$ , each of them  $= \frac{a+b+c+d}{4}$ .

Eliminate  $\theta$  and  $\theta'$  from the equations  $a(\sin \theta)^2 + a'(\cos \theta)^2 = a$ ;

$$a'(\sin \theta')^2 + a(\cos \theta')^2 = a'; \quad a \tan \theta = a' \tan \theta';$$

$$\text{and shew that } \frac{1}{a} + \frac{1}{a'} = \frac{1}{a} + \frac{1}{a'}.$$

2. If  $n$  be any whole number not divisible by 4 ; then will

$$\left\{ \tan \frac{\theta}{n} + \tan \frac{2\pi+\theta}{n} + \tan \frac{4\pi+\theta}{n} + \dots + \tan \frac{2(n-1)\pi+\theta}{n} \right\} \\ \times \left\{ \cot \frac{\theta}{n} + \cot \frac{2\pi+\theta}{n} + \cot \frac{4\pi+\theta}{n} + \dots + \cot \frac{2(n-1)\pi+\theta}{n} \right\} = n^2. \quad \text{Prove it when } n=3.$$

3. The tangent at any point of a parabola will meet the directrix and latus rectum in two points equally distant from the focus.

4. If in a right-angled spherical triangle  $\alpha, \beta$  be the arcs drawn from the right angle respectively perpendicular to, and bisecting the hypotenuse  $c$ , shew that  $\sin \frac{c}{2} = \frac{\sin \beta}{\sqrt{1+(\sin \alpha)^2}}$  : determine also the cosine of a side in terms of  $\alpha$  and  $\beta$ .

5. Let  $a, b, c$  be the middle points of the sides of the triangle  $ABC$  ; and  $S, s$  the sums of the squares of the three triangles whose bases are the sides of the triangles  $ABC, abc$  respectively, and common vertex any other point within or without the plane of  $ABC$  ;

$$\text{shew that } S-4s = \frac{(ABC)^2}{4}.$$

6. The equation to that logarithmic spiral which is *its own* evolute, is  $\log_e \left( \frac{r}{c} \right)^{\frac{1}{\theta}} = \left( \frac{c}{r} \right)^{\frac{(4n-1)\pi}{2\theta}}$ , where  $c$  is arbitrary, and  $n$  any whole number.

7. If  $l$  be the latitude of a place between the tropics ;  $\alpha$  and  $\delta$  the Sun's right ascension and declination ; the times when the ecliptic is vertical are determined from the equation  $h = \alpha + \sin^{-1} (\sin \alpha \tan l \cot \delta)$ .

8. The extremity of the shadow intercepted by a line drawn in the dial plane perpendicular to the substyle of a horizontal or vertical south dial, will move uniformly round some fixed point  $A$  in the substyle.

If the hour lines be graduated from this property ; and a small error be committed in assuming the position of the point  $A$  ; the error of the time indicated by the dial at the time  $t$  will be  $2a \sin 30t$ , where  $a$  denotes the error at 1 o'clock.

9. The area of the segment included between the arc  $PP'$  and chord of an ellipse or hyperbola, is equal to the area of the segment included between the conjugate arc  $DD'$  and chord of the ellipse or opposite hyperbola.

10. To an eye placed at the aperture of the large mirror in Gregory's telescope there will appear an inverted image of both mirrors near the smaller; and if the axis of the smaller be slightly disturbed, the images will be shifted towards that part of it which is most inclined from the larger. Prove this property, and explain its use in the practical adjustment of the telescope.

11. A circular arc without weight, whose length is  $l$  subtending an angle  $\alpha$  at the center, is placed upon a plane and acted upon at every point by a constant repulsive force  $f$  tending from one extremity of the arc; shew that it will rest with its chord  $c$  parallel to the plane if  $\text{friction} \div \text{pressure} > \cot \frac{\alpha}{4}$ .

If the position of equilibrium be slightly disturbed and friction sufficient to prevent all sliding, the time of a small oscillation

$$= \pi \operatorname{cosec} \frac{\alpha}{4} \sqrt{\frac{l-c}{2f}}.$$

12. Let any two chords  $AA'$ ,  $BB'$  in a surface of the second order be drawn through a fixed point; the locus of the points of intersection of  $AB$ ,  $A'B'$  is a plane.

13. If  $b$ ,  $b'$  be the breadths of the  $p^{\text{th}}$  and  $q^{\text{th}}$  rainbows respectively, and  $\delta$  the Sun's apparent diameter; shew that

$$b' = b + \left( \sqrt{\frac{(q+1)^2 - \mu^2}{(p+1)^2 - \mu^2}} - 1 \right) (b - \delta) \text{ nearly.}$$

14. The pressure on a quarter of the surface of a hemispheroidal bowl filled with fluid (bounded by two planes passing through the axis  $c$  which is vertical) will be equivalent to a single force acting in the straight line whose equations are  $x=y=\frac{cz}{\pi a} + \frac{3}{16}, \frac{a^2 - c^2}{a}$ .

15. A sphere will roll from rest between two given curves in the shortest time possible down an involute of a cycloid. The curve will have its axis vertical, and cusp at the point from which the sphere begins to fall. It will cut the lower curve at right angles, and the two curves in points at which the tangents are parallel.

16. Prove that

$$(f_x = \infty - f_x = 0) e^{-n(\cot^2 \beta)^{x^2}} \sin(n x^2 + \alpha) = \sqrt{\frac{\pi \sin 2\beta \{\sin(\alpha + \beta)\}^2}{4n}}.$$

Also, if  $R = f(r, \theta) = F(t, e)$ ;  $r = \phi(\theta, e)$ ,  $t = \psi(\theta, e)$ ,  $\theta = \chi(t, e)$ ;

$$\text{shew that } d_e \theta = -\frac{1}{d_\theta t} f_\theta d_e(d_\theta t);$$

$$\text{and } d_e R = \frac{d_e r}{d_\theta r} (d_t R \cdot d_\theta t - d_\theta R) - d_t R f_\theta d_e(d_\theta t).$$

17. The talent of each of two individuals  $A$  and  $B$  being known to be at least  $\frac{1}{m}$ th of that of his opponent, the chance that each of them will have been successful in one of the two first trials of ability is  $\frac{1+4m+m^2}{3(1+m)^2}$ .

Also, having given  $A$ 's talent at least  $\frac{1}{m}$ th of  $B$ 's, and  $B$ 's talent at least  $\frac{1}{n}$ th of  $A$ 's; find their respective chances of success in both trials.

18. The equation to a curve so drawn that every chord passing through the pole shall subtend a right angle from a fixed point is

$$r \cos \left( \frac{2\lambda \pm 1}{2} \theta + f(\theta) \right) = a \cos \left( \frac{2\lambda \mp 1}{2} \theta + f(\theta) \right)$$

where  $\lambda$  is any whole number, and  $f(\theta + \pi) - f(\theta) = 0$ ; give also a complete solution of the latter equation.

19. At midnight, two known stars appear in their real verticals, one at the vernal, the other at the autumnal equinox; shew that their azimuths are supplementary; determine also the latitude of the place and the obliquity of the ecliptic.

20. Let  $SY$  be drawn from the origin  $S$  perpendicular to the tangent plane at any point  $P$  of a surface; then will  $\frac{SY^2}{SP}$  be the perpendicular on the tangent plane at the corresponding point of the surface which is the locus of  $Y$ .

21. If  $N, n, F$  be the focal centers and principal focus of a lens; the distances of the conjugate foci measured from two points  $N', n'$ , so situated in the axis that  $nn' = p \cdot NN' = (1-p)nF$ , are connected by the equation  $\frac{p}{v} - \frac{1}{pu} = \frac{1}{nF}$ :  $p$  being any constant quantity.

22. An uniform slender rod acted upon by gravity  $g$  is placed between two planes (one horizontal and the other vertical) having at a point in their common intersection an attractive force  $\propto \frac{1}{(\text{dist.})^2}$  which at the centre of gravity of the rod *always*  $= \frac{g}{2}$ . Shew that it will rest in a position of *unstable* equilibrium at an inclination of  $\frac{3\pi}{8}$  to the horizon.

If the rod be originally placed in any given position, determine the motion.

23. The centre of gravity of a system of bodies, *placed* in any given position, and acted upon only by the force of gravity and the reactions of the surfaces upon which the particles move, will *continually* descend *until* it becomes the lowest possible.

24. Force  $\propto \frac{1}{(\text{dist.})}$ , shew that the attraction of an ellipse in a direction parallel to its axis major, on a point whose co-ordinates are  $f, g$ , is equal to

$$(1 \pm 1) \frac{\pi k b f}{a+b} + (1 \mp 1) \frac{\pi k b}{a e^2} \left\{ f - \sqrt{\frac{\sqrt{(g^2 + a^2 e^2 - f^2)^2 + 4 f^2 g^2} - (g^2 + a^2 e^2 - f^2)}{2}} \right\},$$

the upper or lower signs being used according as the attracted point is within or without the ellipse. Find also the value of the expression when  $g$  and  $e$  vanish.

## MORNING PROBLEMS.

SATURDAY, *January* 17, 1835.....9 to 11½.

1. REDUCE  $\frac{\sqrt[3]{5.12} + \sqrt[3]{.03375}}{\sqrt[3]{80} - \sqrt[3]{.01}}$  to its equivalent simple decimal.

2. THE coefficient of the  $(r+1)^{\text{th}}$  term of  $(1+x)^{n+1}$  is equal to the sum of the coefficients of the  $r^{\text{th}}$  and  $(r+1)^{\text{th}}$  terms of  $(1+x)^n$ ; prove this, and express  $(1+x)^n$  in a continued fraction.

3. Every biquadratic equation of the form  $x^4 + p x^3 + q x^2 + r x + s = 0$  can be solved by means of a quadratic equation, if  $p^3 - 4 p q + 8 r = 0$ .

4. The frustum of a cone, the radii of whose ends are  $R$ ,  $r$ , and altitude  $h$ , is cut by a plane, which touches the circumference of each end; find the axes of the section, and shew that the frustum is divided into parts, which are to each other as  $R^{\frac{2}{3}} : r^{\frac{2}{3}}$ .

5. From any point  $Q$  in the line  $BQ$ , which is perpendicular to the axis  $CAB$  of a parabola, whose vertex is  $A$ ,  $QP$  is drawn parallel to the axis to meet the curve in  $P$ ; shew that if  $CA$  be taken equal to  $AB$ , the locus of the intersections of  $AQ$  and  $CP$  is a parabola.

6. A shot is fired at random with a given velocity towards a tower, whose horizontal distance from the cannon  $=\frac{1}{2}$  the greatest range, and whose altitude subtends an angle  $=\tan^{-1}\frac{3}{4}$  at the point of projection; supposing the cannon is capable of being elevated from a horizontal position through an angle of  $80^{\circ}$ , shew that the odds in favour of the balls striking the tower are 3 : 1.

7. The lines, drawn from the angles of a spherical triangle to the middle points of the opposite sides, meet in one point; and if  $E$  be the spherical excess,  $a'$  the arc joining the middle points of the sides  $b$  and  $c$ ,  

$$\cos a' = \cos \frac{a}{2} \cdot \cos \frac{E}{2}.$$

8. Explain the application and use of the pendulum in the common clock. Describe the dead-beat escapement, and shew in what its superiority over the recoil escapement consists.

9. If a small pencil of rays pass directly through a medium bounded by concentric spherical surfaces whose radii are  $r$ ,  $s$ ; the equation between the distances of the conjugate foci measured from the centre is

$$\frac{1}{v} - \frac{1}{u} = \frac{\mu-1}{\mu} \left( \frac{1}{r} - \frac{1}{s} \right).$$

10. Find the equation to a plane which passes through a given straight line and through the shortest distance between the line and the axis of  $x$ .

11. The altitude of a star on the prime vertical is observed with a sextant whose arc is not exactly  $60^{\circ}$ , but which is accurately *subdivided*; find the error in the arc from observing the difference between the sidereal time deduced from the altitude, and the real sidereal time.

12. Draw the asymptotes to the curve whose equation is  $y^2x = (x+a)(x-b)^2$ ; trace it, find its minimum ordinates and points of contrary flexure.

13. Form a given mass into a cone, such that the moments of inertia round all its principal axes may be equal.

14. Out of three white balls and two black ones, two are placed at random in one bag and three in another, after which a white ball is accidentally lost; find the probability that a person going to either bag will draw a white ball.

15. To an eye placed at the center every section of an ellipsoid whose projection on a tangent plane at the extremity of one axis is a circle, passes through a fixed point in the less of the remaining axes.

16. If  $u=f(x, y)=F(r, z)$ , and  $r=\phi(ax+cz)=\psi(ax-by)$ ,

$$\text{shew that } \frac{1}{a} d_x u + \frac{1}{b} d_y u + \frac{1}{c} d_z u = 0.$$

17. Integrate the following equations:

$$\sqrt{x} d_x y - 2y = a \sqrt{y}, \quad x^2 d_x^2 y - x d_x y + y = a \log_e x,$$

$$u_{x+2} - 2a u_{x+1} + (a^2 + b^2) u_x = X,$$

and shew that if

$$\Delta = \sqrt{1-c^2} (\sin \theta)^2,$$

$$\left( \int_{\theta=\frac{\pi}{2}} - \int_{\theta=0} \right) \frac{1}{\Delta^{2m+1}} = \frac{1}{(1-c^2)^m} \left( \int_{\theta=\frac{\pi}{2}} - \int_{\theta=0} \right) \Delta^{2m-1}.$$

18. If a string without weight be stretched between two points on any surface, the pressure at any point varies inversely as the radius of absolute curvature.

19. Having given the length of a string, the density of which at every point is a given function of the distance from one extremity, determine the form which when suspended at two given points it must assume, in order that its center of gravity may be the lowest possible.

20. A ray of light is incident on a plate of Iceland spar, which is bounded by planes perpendicular to the axis of the crystal; shew that if  $\phi'$  and  $\phi$ , be the angles of refraction for the ordinary and extraordinary rays, and  $e$  the eccentricity of the spheroid of refraction,

$$\frac{1}{\sin^2 \phi} - \frac{(1-e^2)^2}{\sin^2 \phi'} = e^2.$$

SATURDAY, *January 17, 1835*.....1 to 4.

*First, Second, Third, and Fourth Classes.*

1. EVERY number consisting of  $n$  digits will have  $2n$ , or  $2n-1$  digits in its square. Hence explain the rule for pointing in the extraction of the square root of a number.

2. Prove that in a plane triangle  $\tan B = \frac{b \sin C}{a-b \cos C}$ , and express  $B$  in a series proceeding according to sines of the multiples of  $C$ .

3. Explain the action of an oar when used in rowing; and determine the effect produced, having given the distances of the fulcrum and the hand of the rower from the side of the boat.

4. Find the equation to the tangent at a point of the curve whose equation is  $y^2=4mx$ , and the co-ordinates of the intersection of the tangent and perpendicular let fall upon it from the point  $(m, 0)$ .

5. If the equation  $d_x u=0$  contain several sets of equal roots, investigate the circumstances under which  $u$  will have maximum or minimum values corresponding to them.

6. If any number of forces act in the same plane on a rigid body, determine the condition that they may have a single resultant.

7. Prove that

$$u_{x+n}=u_x+n \Delta u_x+\frac{n(n-1)}{1 \cdot 2} \Delta^2 u_x+\dots\dots\dots$$

and determine from three observed values of a quantity near its maximum or minimum made at given equidistant times, when the maximum or minimum took place.

8. Shew that when the Moon's apse line is in syzygies it will progress from the effect both of the central and tangential disturbing forces. Supposing it to regress when in quadratures, by what considerations does it appear that upon the whole the line of apses progresses considerably?

9. Having given the focal lengths of two lenses, find that of the system formed by their combination when the lenses are placed (1) in contact, (2) at a given interval. Explain briefly the principle of the achromatic eye-piece.

10. Assuming the differential expression for the pressure at any point of a fluid mass in equilibrium when acted on by known forces, shew that the resultant of the forces at a point in the surface is in the direction of the normal ; and that the equilibrium is possible when the forces arise from the attraction to a fixed centre, or to every particle of a solid or fluid mass.

11. Integrate the equations

$$d_x^2 u = \sqrt{a^2 - x^2} \left( \frac{x=0}{x=a} \right), \quad \text{and} \quad d_x y = \frac{a y - \sqrt{x^2 + y^2}}{a x}.$$

12. Having given the heliocentric, find the geocentric place of a planet at any time. How is the time, in which a planet is in its node, determined ?

13. Determine the moment of inertia of a cylinder round its axis, and the time of its rolling down a given inclined plane.

14. A particle placed on the inner surface of a spheroidal shell, bounded by similar concentric spheroidal surfaces will remain at rest, supposing the force of attraction of each particle to vary inversely as the square of the distance.

15. A particle oscillates in a small circular arc acted on by gravity and by a small disturbing force ; determine the effect of the disturbing force on the time and arc of vibration.

16. Light diverging from a point falls on one side of a prism which has a very obtuse angle opposite to this side ; state the phænomena observed, and explain them on the theory of undulations.

**MONDAY, January 19, 1835.....9 to 11½.**

*First and Second Classes.*

1. THE three edges of a triangular pyramid which meet, and the angles which they make with each other being given, find its content.

2. Explain the mechanical effect of a locomotive engine.

3. Investigate formulæ for the transformation of co-ordinates from one system of three rectangular axes  $(x, y, z)$  to another  $(x', y', z')$ , the position of the latter being determined by the angle which the axis of  $x'$  makes with the plane  $xy$ , and that which its projection on the plane  $xy$  makes with the axis of  $x$ , the axis of  $y'$  being in the plane  $xy$ .

4. A pencil of diverging rays is refracted obliquely at the center of a thin lens, find the distances from the center of the foci of refracted rays in the primary and secondary planes.

5. Having given a solution of a differential equation, shew whether it is a singular solution or particular integral. Are  $y^2=2x+1$ , and  $y^2+x^2=0$  singular solutions or particular integrals of the equation  $y(d_x y)^2+2x d_x y-y=0$ ?

6. Find the horary motion of the Moon's nodes in a circular orbit. By what observations does it appear that the force by which the Moon is retained in her orbit tends to the Earth, and varies nearly inversely as the square of her distance from the Earth's center?

7. Compare the retardation of the spring and neap tides; and find the time of high water when the Moon is in syzygy.

8. The ratio of the apparent axes of Saturn's ring being known from observation, investigate an equation for determining its inclination to the ecliptic. Since Saturn's center does not coincide with that of the ring, what probable supposition will account for the stability of the equilibrium?

9. When a body is acted on by a central force, the velocity at any point of the brachystochronous path between two given curves varies as the perpendicular on the tangent from the centre of force. Shew also that the path cuts the curves at right angles.

10. The Moon's parallax is

$$P \left\{ 1 + e \cos(c\theta - \alpha) + m^2 \cos(\overline{2-2m} \cdot \theta - 2\beta) \right. \\ \left. + \frac{15}{8} m e \cos(\overline{2-2m-c} \cdot \theta - 2\beta + \alpha) \right\}.$$

Explain the effect of the last term of this expression on the form of the Moon's orbit.

11. Two convex lenses of small curvature are placed in contact; having given the intensities of the reflected <sup>(1)</sup> and transmitted <sup>(2)</sup> light, trace fully the phænomena of Newton's rings. By what probable analogy is the circumstance, that the rings formed by the reflected and transmitted light are complementary to each other, illustrated?

$$(1) \frac{4a^2 e^2 \sin^2 \frac{\pi}{\lambda} V}{(1-e^2)^2 + 4e^2 \sin^2 \frac{\pi}{\lambda} V}.$$

$$(2) \frac{a^2 (1-e^2)^2}{(1-e^2)^2 + 4e^2 \sin^2 \frac{\pi}{\lambda} V}.$$

MONDAY, *January* 19, 1835.....9 to 11½,

*Third and Fourth Classes.*

1. If a body  $a$  inches long weigh  $m$  pounds, find the length of a similar body that weighs  $n$  pounds.
2. In the expansion of  $(a+b)^n$  where  $n$  is an integer, the coefficients of terms equidistant from the two extremes are equal. Write down the  $p^{\text{th}}$  term of expansion of  $(1-x)^{\frac{1}{2}}$ .
3. Expand  $\tan(x+h)$  to four terms by Taylor's Theorem.  
Shew that  $f(a+h)-f(a)$  is positive, if  $d_x f(x)$  is positive for all values of  $x$  between  $a$  and  $a+h$ .
4. The time of an oscillation being  $\pi \sqrt{\frac{l}{g}}$ , find the alteration in the time corresponding to given small and contemporaneous alterations in  $l$  and  $g$ .
5. The length of the perpendicular upon the tangent from the centre of an ellipse is equal to  $a \sqrt{1-e^2} (\cos \phi)^2$ , where  $\phi$  is the inclination of the tangent to the axis major.
6. Having given the lengths of two degrees in the same meridian at different given latitudes, shew how the Earth's form and magnitude may be deduced. By what observations is it known (1) that the arc measured is exactly one degree; (2) that it lies in the same meridian?
7. Explain the method of setting the sidereal clock.  
A star rises at  $5^{\text{h.}} 47^{\text{m.}} 56^{\text{s.}}$  sidereal time, find the mean solar time, supposing the mean Sun's right ascension when last on the meridian to have been  $1^{\text{h.}} 47^{\text{m.}} 6^{\text{s.}}$ .
8. A body acted on by gravity is projected vertically upwards with a given velocity in a fluid in which the resistance varies as the square of the velocity; determine the accelerating force and the whole time of the ascent.
9. Why is the form of the rainbow circular? State the cause of the partial brightness of the sky within the bow.

10. Find the attraction of an oblate spheroid on a particle situated at its pole.

11. Find the horary motion of the Moon's nodes in a circular orbit. By what observations does it appear that the force by which the Moon is retained in her orbit tends to the Earth, and varies nearly inversely as the square of her distance from the Earth's centre?

12. The three edges of a triangular pyramid which meet, and the angles which they make with each other being given, find its content.

MONDAY, *January* 19, 1835.....1 to 4.

*First Class.*

1. Give a method of approximating to the greatest root of an equation without the aid of Lagrange's Theorem. Apply it to the equation  

$$x^3 + qx^2 + r = 0.$$

2. Find the radius and co-ordinates of the center of the circle of absolute curvature; and transform the expressions into others, in which the arc is the independent variable.

3. Find the law of attraction that a sphere may attract a particle without it in the same manner as if the whole mass were collected in the center.

4. The greatest probability of correctness in solving a small spherical triangle from three observed angles and a measured side is when the angle, opposite to the known side, is less than a right angle, and the other two sides are nearly equal. If two angles only be observed, for what value of the third angle will the errors probably be smallest?

5. Assuming the attraction of a homogeneous spheroid on any point to be known, enunciate all the propositions necessary for finding the attraction of a heterogeneous spheroid on a point within it; and supposing the latter given, and the density of equally dense spheroidal surfaces a known function of the polar distance, give the train of reasoning from which the ellipticity of the Earth may be determined.

7. If  $d_x^{2^n} y + p_1 d_x^{2^n-1} y + \dots + p_{2^n} = X$ ,

where  $k^{2n} + p_1 k^{2n-1} + \dots + p_{2n} = K = \{(k + \alpha)^2 + \beta^2\}^n$ ;

$$e^{ax}y = C_0 + C_1x + \dots + C_{n-1}x^{n-1}) \cos \beta x + (c_0 + c_1x + \dots + c_{n-1}x^{n-1}) \sin \beta x$$

$$+\cos \beta x \cdot f_x \{ \sec^2 \beta x \cdot f_x (\cos^2 \beta x \cdot f_x (\sec^2 \beta x \dots$$

$$f_x(\sec^2 \beta x \cdot f_x(\cos \beta x \cdot e^{ax} X))\},$$

8. Find the apparent differences of the latitudes and longitudes of the Sun and Moon at any assigned time during a solar eclipse.

$$V = \frac{1}{3(\alpha - \beta)^2} \{28x^2 + 20(\alpha + \beta)x + 10\alpha\beta + 3\beta^2 + 27\}.$$

10. Find the generating function of  $\Delta^n u_{x-mr}$ , and prove that

$$u_{x+n} = u_x + n \Delta u_{x-r} + \frac{n \cdot (n+2r-1)}{1 \cdot 2} \Delta^2 u_{x-2r} + \&c.$$

**11. Having given the equations**

$$(d, r,)^2 + r^2, (d, \theta,)^2 - \frac{2\mu}{r} + 2 \int_0^r d_1(R) = C,$$

$$d^2_i(r^2_i)=2C+\frac{2\mu}{r_i}-4\int_i d_i(R)-2r_i d_{r_i} R,$$

investigate the equation for the perturbation in longitude. What terms in the resulting equation are most important?

MONDAY, *January* 19, 1835.....1 to 4.

*Second and Third Classes.*

ELIMINATE the arbitrary function from the equation

$$y-bz=\phi(x-az).$$

2. Apply the equations of motion to shew that a body acted upon by a central force will describe a curve lying in one plane, and that the areas described about the centre of force are proportional to the times.

3. If  $i$  be the inclination of a plane to the horizon, and  $\alpha$  the inclination of a line in it to the intersection of the plane with the horizontal plane; shew that the inclination  $\theta$  of the line to the horizon is found from the equation  $\sin \theta = \sin i \cdot \sin \alpha$ .

4. Explain the use and construction of a Vernier; and if  $n$  divisions of the instrument are equal to  $n+1$  of the vernier, and the  $m^{\text{th}}$  divisions coincide, determine the true reading off.

5. Investigate the form of the surface whose equation is

$$\frac{x^2}{a^2} + \frac{y^2}{b^2} - \frac{z^2}{c^2} = 1,$$

and find the equation to the asymptotic surface.

6. Having given the moments of inertia of a body round three rectangular axes, find its moment of inertia round any other axis passing through the origin; and shew that the sum of the moments round any three rectangular axes passing through the same point is constant.

7. If there be  $a$  chances of an event's happening in any one trial,  $b$  of another, and  $c$  of a third; find the probability of the first event's happening  $p$  times, the second  $q$  times, and the third  $r$  times, in  $p+q+r$  trials.

8. Determine the centre of oscillation of a pendulum consisting of a uniform rod with a weight attached to it, and the effect produced on the time of an oscillation by a small change in the position of the weight.

9. A roof  $ACB$ , consisting of beams which form an isosceles triangle with its base  $AB$  horizontal, supports a given weight at  $C$ ; find the horizontal force at  $A$ . Why must a pointed arch carry a heavy weight at its vertex?

10. Determine the time corresponding to a given true anomaly in a very eccentric ellipse; and having given the anomaly in a parabolic orbit, find the anomaly in a very eccentric ellipse, the time and perihelion distance being the same in both orbits.

11. If a uniform force acting upon a body tend to give it a motion of rotation round an axis which is always perpendicular to the axis round which it is at each instant revolving, and the axes be always in the same plane, the angular velocity will be unaltered.

12. State the theory of universal gravitation, and point out generally the evidence on which it has been received. How is it shewn that bodies are attracted towards the earth by forces tending to *each part* of the mass?

MONDAY, *January* 19, 1835.....1 to 4.

*Fourth Class.*

1. COMPARE the areas of regular octagons described in and about a circle.

2. A body descending vertically draws an equal body 25 feet in  $2\frac{1}{2}$  seconds up a plane inclined at  $30^\circ$  to the horizon, by means of a string passing over a pulley at the top of the plane; determine the force of gravity.

3. Explain the use and construction of a Vernier; if  $n$  divisions of the instrument are equal in length to  $n+1$  of the vernier, and the  $m^{\text{th}}$  divisions coincide, what will be the true reading off?

4. Find the magnitude and position of the axes of the curve whose equation is  $3x^2 + 2xy + 3y^2 - 16y + 23 = 0$ .

5. A body describes an ellipse round a centre of force in the center, find the periodic time, and also the time of describing a given angle after leaving an apse.

6. A roof  $ACB$  consisting of beams which form an isosceles triangle with its base  $AB$  horizontal supports a given weight at  $C$ ; find the horizontal force at  $A$ . Why must a pointed arch carry a heavy weight at its vertex?

7. Having given the focus of a pencil of rays incident directly on a spherical reflector, find the focus of reflected rays to the first and second approximations.

8. Find the duration of a lunar eclipse. On what account are eclipses of the Moon more frequent at a given place than those of the Sun.

9. Express  $\cos^6 \theta$  in terms of the cosines of multiples of  $\theta$ , and find  $\int_0^{\frac{\pi}{2}} \cos^6 \theta$  between the limits  $\theta=0$  and  $\theta=\frac{\pi}{2}$ .

10. Explain Newton's method of finding the angle between the apsides in orbits nearly circular. Ex. Force  $\propto (\text{dist.})^n$ .

11. Investigate the differential expression for the area of a curve surface referred to three rectangular axes; and apply it to find that portion of the surface of a cone which is included between two planes perpendicular to the axis, and at a given distance from each other.

12. Find the center of pressure of the area of a quadrant of a circle, one side of the quadrant coinciding with the surface of the fluid.

## EXAMINATION PAPER

FOR

SMITH'S PRIZES.

PROFESSOR AIRY.

1. Form the equation for the squares of the differences of the roots of a given equation, and shew its use.

Give an instance of attempts to reduce the solution of equations of a high order to those of a lower or odd order, by the theory of permutations and the roots of  $x^n-1=0$ .

The equation  $x^{17}-1=0$  may be completely solved by quadratics.

2. Explain the rule for the change of the independent variable, and apply it to find  $\frac{d^2y}{dx^2}$  in terms of

$$\frac{dU}{dx}, \quad \frac{dU}{dt}, \quad \frac{dV}{dt}, \quad \&c. \text{ where } U=f(x, t)=0, \text{ and } V=f(y, t)=0.$$

When the equation to a curve is given in the form  $P=f(x, y)=0$ , shew the criterion of multiple points and the way of determining the values of the differential coefficient at those points.

3. Integrate  $\int \frac{1}{x^n-1} dx$ .

Investigate the surface of a sphere cut off by a cylinder of the same radius whose axis touches the sphere.

Solve the equation  $x^n \cdot \frac{d^n y}{dx^n} + A x^{n-1} \cdot \frac{d^{n-1} y}{dx^{n-1}} + \&c. = X$ .

The equation  $P \frac{dz}{dx} + Q \frac{dz}{dy} = R$  may be solved if we can make two resolvable combinations of the equations  $P dy - Q dx = 0$ ,  $P dz - R dx = 0$ ; and if these solutions be  $M=0$ ,  $N=0$ , the solution of the original equation will be  $M=\phi(N)$ .

4. Investigate the variation of  $\int V$ .

Explain and demonstrate the method to be used for ascertaining the nature of the curve which is to possess one property in a maximum or minimum degree, and another in a given degree.

5. In the application of the *method of quadratures* instead of integration (where integration is not practicable) the whole time through which the integration is required is divided into a number of equal parts, the value of the function to be integrated is calculated for the middle of each, and the sum of all is taken: find the correction which this sum requires, in terms of the differences of the calculated numbers.

6. Given the pressure on the sides of a given wedge, the coefficient of friction, the weight of the wedge and that of a hammer which strikes it, and the modulus of the elasticity between their surfaces: to find how far one blow of the hammer with given velocity will drive the wedge.

7. Prove D'Alembert's principle.

Apply it to investigate the motion of a pendulum rolling on a cylindrical axis.

Describe generally the methods of ascertaining the length of the seconds' pendulum, and the corrections which are required.

8. Investigate the place of the metacentre of a floating body.

Investigate the equation of continuity of a fluid.

A wave of air diverges symmetrically through a solid angle, as if it came from a center: determine the motion of the particles of air.

9. State the experimental reasons for believing that light of different colours is refracted rigorously according to the Cartesian law of refraction, the index varying with the colour.

Give the theory of the achromatic object-glass.

Explain what is meant by irrationality: and describe its practical inconveniences.

10. The axis of a small pencil of light, which diverges from a point, cuts the axis of a lens; find the position of the focal lines, after refraction, in the primary and secondary planes.

Extend the calculation to all the lenses of an eyepiece.

Describe the positive eyepiece and the negative eyepiece, and mention their respective advantages: point out the shape of lenses proper for each: and calculate the power of a telescope whose object-glass has a focal length of 10 feet, and whose eyepiece consists of two convex lenses of focal length 1 inch each separated  $\frac{3}{4}$  inch.

11. Assuming the undulatory theory of light, shew why the principle of interference or superposition of vibrations is necessarily to be received.

Mention experiments that prove the law of interference.

Investigate the intensity of light in the image of a star when the aperture of a telescope is divided by gratings into a number of similar parallelogrammic apertures.

Investigate the intensity of light in the neighbourhood of a caustic : shew that the solution will depend on  $\int_x \cos(x^2 + Ax)$  from  $x=0$  to  $x=\infty$ .

12. State the optical hypothesis of transversal vibrations.

State, in the terms of the undulatory theory, the law of double refraction of uniaxal crystals.

Investigate the form of rings, &c. exhibited by a plate of uniaxal crystal, cut perpendicular to its axis, when interposed between a polarizing and an analyzing plate whose planes of polarization are at right angles.

13. Describe the Mural Circle and its micrometer-microscopes.

Explain the method of determining its *zenith-point*.

14. Explain the method of determining the azimuthal error of a transit-instrument.

Describe completely the process for obtaining a planet's right-ascension.

Determine the geographical longitude of a place by transits of the Moon.

15. Atmospheric refraction varies nearly as the tangent of the zenith-distance.

Give an easy method of calculating refraction in right-ascension and polar distance out of the meridian.

16. Explain how the rotation of a hoop preserves it from falling.

Explain the physical cause of precession.

Shew that the velocity of rotation is not altered by the forces which cause precession.

Investigate solar nutation.

17. Prove that perpetual motion, in the sense in which it is understood in Mechanics, is impossible.

Shew that this principle is tacitly assumed in Stevinus' proof of the condition of equilibrium on the inclined plane, and in Lagrange's principle of pulleys.

18. Find the coefficient with which it is proper to affect the expression for the repulsion of two electro-magnetic currents moving in the direction of the line joining them, as compared with the attraction of two parallel currents.

19. \* Given

$$\frac{F}{f} = \frac{G}{g} = \frac{4\pi}{3} \left\{ \frac{1}{(f^2+g^2+h^2)^{\frac{1}{2}}} \phi(\gamma) - \frac{12h^2-3f^2-3g^2}{5(f^2+g^2+h^2)^{\frac{7}{2}}} \psi(\gamma) - \frac{2}{5} \{ \chi(c) - \chi(\gamma) \} + \frac{3\pi}{T^2} \right\}$$

$$\frac{H}{h} = \frac{4\pi}{3} \left\{ \frac{1}{(f^2+g^2+h^2)^{\frac{1}{2}}} \phi(\gamma) - \frac{6h^2-9f^2-9g^2}{5(f^2+g^2+h^2)^{\frac{7}{2}}} \psi(\gamma) + \frac{4}{5} \{ \chi(c) - \chi(\gamma) \} \right\},$$

investigate the equation to the external surface of the Earth.

Investigate the Earth's attraction on the Moon.

Given the reciprocal azimuths of two points on a spheroid, find the difference of longitude.

20. Prove the following propositions from general reasoning :

The major axes of the orbits of the planets have no secular variation, to the first order of the disturbing forces.

An additional force varying as the distance will make the line of apses regress.

21. Investigate the equations for the Moon's motion.

Given  $\frac{S-Ps}{u^3} = m's \cdot \frac{u'^2}{u^4} \cdot \left\{ \frac{3}{2} + \frac{3}{2} \cos 2(\theta-\theta') \right\}$ , solve the equation for the Moon's latitude to the second order of small quantities.

22. Give a method for calculating the true anomaly from the mean anomaly in an ellipse where the excentricity is not very small nor extremely large.

Two comets start from the same perihelion distance, one describing a parabola, the other a very long ellipse: to find at what time they will have described equal angles round the Sun.

23. In the planetary theory, investigate the equation for  $r \delta r$  and the expression for  $\delta \theta$ .

In the variation of elements, find  $\frac{de}{dt}$ , and express it in terms of  $\frac{dR}{d\varpi}$  and  $\frac{dR}{d\epsilon}$ .

Find  $\frac{dR}{de}$  (on the supposition that  $R$  is expressed in terms of  $t$ ) by expressions involving  $\frac{d\theta}{de}$ ,  $\frac{dR}{d\varpi}$ , and  $\frac{dR}{d\epsilon}$ .

# UNIVERSITY LIFE ASSURANCE SOCIETY.

INCORPORATED BY ROYAL CHARTER.

CAPITAL £600,000.

ASSURANCES may be effected on the Lives of all persons whose names are, or have been, at any time, on the Books or Boards of any College or Hall, at either of the Universities of OXFORD or CAMBRIDGE.

*Note.* Assurances may be effected on the Lives of such persons against the Lives of any person whatsoever.

A division of profits will be made every five years, and four-fifths appropriated to the ASSURED, either by a diminution of the rate of Premium, or by an increase of the amount of the Policy, at the option of the party.

The Society will be always ready to purchase, from the party in possession, any unexpired Policy.

Proposals for Assurances to be addressed to the SECRETARY, or to JOHN WRAY, Esq. Chairman of the Committee, at the Office of the Society, No. 24, Suffolk Street, Pall Mall East, London; or to the Corresponding Directors, the Rev. J. W. HUGHES, Oxford, and H. GUNNING, Esq. Cambridge, from whom proposals may be obtained.

## TERMS AND CONDITIONS.

**PERSONS** wishing to effect an **ASSURANCE**, must state the **Name**, **Residence**, and **Profession**, of the **Party** on whose behalf the **ASSURANCE** is proposed, and of the **Party** whose **Life** is proposed to be **Assured**; the **College** at which the latter party has been entered; the place and date of birth; the age next birthday; whether married or single; whether he has resided abroad, and if so, where and for what period; whether he has been employed in the military or naval service; whether he has had the small-pox, the cow-pox, or the gout; whether he has been, since his childhood, afflicted with rupture, fits, insanity, dropsy, asthma, or spitting of blood; whether during the last seven years he has been afflicted with any severe or constitutional disease or disorder; the sum proposed to be **Assured**; and the term for which the **ASSURANCE** is required.

Reference must also be given to two respectable persons for information, as to his present and general state of health, one of whom must be (if possible) the medical person who has usually attended him.

A declaration, as to all the points contained in the above statement, will form the basis of the contract between the ASSURED and the SOCIETY; and should any untrue allegation be contained in such declaration, the Policy will become void, and all payments of premium made on it will become forfeited.

The DIRECTORS have the power of fixing the premium in every case, where any extra risk may attend the Life to be Assured. Policies will not be considered to be in force beyond 30 days after the expiration of the year, unless the Premium then due shall have been paid to the Society. But should proof be given to the satisfaction of the DIRECTORS, that a party whose Life has been Assured continues in good health, the Policy may be revived at any time within six months, on the payment of a fine, to be fixed by the COURT OF DIRECTORS, not exceeding ten shillings per cent. on the sum Assured; or at any period within 13 months, on the payment of such fine as the COURT OF DIRECTORS may think reasonable.

Policies will become void, if the parties whose Lives have been Assured shall go beyond the limits

of Europe, or shall die at sea; (unless in passing direct from one part of the United Kingdom to another, or in passing from any part of the United Kingdom, in time of peace, to and from any part of the Continent situate between the Elbe and Brest, in steam or other decked vessels;) or being or becoming a military or naval man, shall be called into actual service; unless, in each case, permission shall have been granted by the DIRECTORS, which may be obtained on such parties attending personally, to give every requisite explanation, and paying a premium adequate to the extra risk, to be settled by the DIRECTORS.

ASSURANCES made by persons on their own lives, will become void if they die at any time by their own act, whether in a state of lunacy or otherwise; or by duelling, within a twelvemonth after the ASSURANCE is effected; or by the hands of justice. But if any person who has effected an ASSURANCE on his own life shall die by his own hands, and not be felo-de-se, the DIRECTORS shall, if they think proper to make any payment, be at liberty to pay any sum, according to their discretion, not exceeding what would have been payable in the event of natural death.

Policies may be assigned by a separate deed, without making any endorsement on the Policy, or giving any notice to the Office.

The time for payment of claims is within three calendar months, after proof of the death of the parties whose Lives are the subject of the ASSURANCE.

\*.\* Upon payment of these Premiums, the receipt of £100 is secured on the dropping of the Life within the time for which the Premium is paid, but not afterwards.

The University Life Assurance Society has adopted the Tables of the Equitable, deducting five per cent. on the Premiums payable on all ages up to 47 ;—this deduction is gradually lessened by equal decrements in each successive Year, up to the age of 56. After this period of Life, the rates are the same as the Equitable.
